[Tender No.: SDM(P&E)/T/28/2025-2026]
[E Tender No: 2026_KoPT_893751_1]

FOR

INTEGRATED DEVELOPMENT & MECHANIZATION OF BERTH NO. 9 AND 10 ON DBFOT MODE AT HALDIA DOCK COMPLEX.

CORRIGENDUM – III

CORRECTIONS / ADDITIONS / DELETIONS, ETC.

[Total Number of Pages : 2]
NOTE :

1. This "Corrigendum-III" should be read in conjunction with RFQ cum RFP & DCA Document (including Notice Inviting Tender).
2. Consequential changes, arising out of this Corrigendum-III, will be deemed to have been effected, even if the same were not incorporated specifically in the Tender Document.
3. One set of this "Corrigendum-III", shall have to be submitted along with the Offer (in with each page of it, duly signed and stamped, as token of acceptance).
4. All other terms and conditions of this office above RFQ cum RFP and DCA Document will remain unchanged.

CORRIGENDUM – III

RESPONSE TO QUERIES IN CONNECTION WITH THE PRE-BID

Sl. No.	Clause/Article No. /Page No./ Query Ref.	Pre-Bid Query	Response of HDC
1.	Appendix 4 – Scope of Work – Clause A2.9 & Article 3 – Conditions Precedent – Clause 3.1(a)(v)	**Item Description** Scope of Work **Query** Appendix 4 mentions installation of a new 750 m railway siding, whereas Article 3 refers to utilization of an existing 750 m siding valued at ₹3.95 crores, payable to the Concessioning Authority. Kindly clarify whether the railway siding is (a) already existing and usable, (b) to be newly developed by the Concessionaire, or (c) existing but requiring rejuvenation.	The total length of the railway line is 1500 meters, of which 750 meters is already developed and available for use. **Existing Siding (750 m):** An existing and usable 750 m railway siding is available. The Concessionaire is required to pay ₹3.95 crores to HDC for utilization of the existing Railway siding, as stipulated in Article 3. **New Siding to be Developed (750 m):** The remaining 750 m railway siding is to be newly developed by the Concessionaire during the construction period, as indicated in Appendix 4. Refer TEFR Drawing SMPK/PMS/2122-003/TEFR/P9/ 0707 & TEFR Pg- 9, 10, 232 & 233
2.	Article 2.1 of DCA	**Query** While the project title specifies dry bulk, does the 'Concession' granted under Article 2.1 allow for the handling of multi-purpose or other general cargo if the dry bulk demand fluctuates, or is the cargo type strictly limited by the project nomenclature?	May be allowed subject to discretion of authority.
3.	General	**Query** Will the Authority provide existing technical data to help the Concessionaire finalize mechanization plans efficiently?	TEFR is already provided. Anything more, if available with authority, will be shared.
4.	General	**Query** Will the Authority assist in securing Right of Way for electricity, water and data lines to the project boundary.	Concession authority will give Right of Way (on chargeable basis) for all above subject to fulfilment of standard norm.
5.	General	**Query** Please provide a brief overview of any ongoing service contracts or operational activities currently active at Berths 9 and 10.	For Berth No.9 , Onboard services and On shore services are provided by external agencies with whom contract with HDC exists. For Berth No.10,no such contract with service provider exists.
6.	General	**Query** We understand that the berths are intended to handle all types of cargo. Kindly clarify.	Refer reply of Sl.No.2

Sl. No.	Clause/Article No. /Page No./ Query Ref.	Pre-Bid Query	Response of HDC
7.	General	**Query** Kindly clarify whether container handling operations are permitted at these berths.	Not Permitted
8.	General	The Final TEFR attached to the tender document is not clearly legible due to poor scan/copy quality. Kindly provide a clear and readable copy of the TEFR.	Due to limitation of uploading TEFR in tender portal, quality might have been compromised. However, the same can be shared if prospective bidder share their email id.
9.	General	**Query** The drawings provided in the tender document are not clearly legible. Kindly share clear, high-resolution copies for proper technical review.	Refer reply of Sl.No.8
10.	General	**Query** Kindly share details regarding the financial feasibility assessment of the project.	Refer TEFR Chapter 9,10 & 11
11.	General	**Query** Kindly provide the design load-bearing capacity (design strength) of Berths No. 9 and 10.	Refer TEFR **Annexure –I** [Pg. 277 - 286]
12.	General	**Query** Kindly clarify responsibility for overall terminal security (including gate control, perimeter fencing, surveillance systems and access control). Please confirm whether this will be provided by the Concessioning Authority or is to be arranged by the Concessionaire.	Concessionaire shall have the responsibility for overall terminal security (including gate control, perimeter fencing, surveillance systems and access control and is to be provided by the Concessionaire.
13.	General	**Query** Kindly provide complete underground utility drawings for the site including electrical, water supply, drainage, telecom and any other subsurface utilities, to avoid unforeseen risks during development.	Shall be provided, available during Engineering Stage.
14.	General	**Query** Clarification on scope and responsibility for the container scanning facility and pre-gate infrastructure including required standards and integration needs.	No Container scanning facility will come up in the project area.
15.	General	**Query** We understand the access to all the utilities like electricity, telecom lines and water supply will be provided by the Concessioning Authority.	Refer Clause 7.2 Utilities & Services of DCA .
16.	Clause 1.2.8 Page no.17	**Item Description** Any queries or request for additional information concerning this RFQ cum RFP shall be submitted by e-mail to the officer designated in Clause 2.12.4 of Section 2 of this RFQ cum RFP with identification/ title: **Query** Clause 2.12.4 is not in Section 2 as mentioned. Clause 2.12(iii) specifies "the envelope shall be addressed to the following officer and shall be submitted at the respective address: Attn. of: Shri R.N. Roy, Designation: Sr. Dy. Manager (P&E)". We are, therefore, sending the pre-bid queries to Shri R.N. Roy by e-mail. Trust this is okay.	Yes

Sl. No.	Clause/Article No. /Page No./ Query Ref.	Pre-Bid Query	Response of HDC
17.	Clause 1.3(2) Page no.:18	**Item Description** Further the Authority reserves the right to hold, in its sole and absolute discretion, more than one pre-bid meeting or hold one or more consultation meetings with the interested parties and in such event the above schedule shall stand modified and amended. **Query** The time allotted for pre-bid queries appears to be inadequate considering the scope of work in the light of clause 2.6 (Page-31) of RFQ. We, therefore, request you to kindly keep pre-bid meetings/consultations open, to facilitate further in-depth study/discussion, if required.	Pre-bid meeting and consultation is open upto the start date of Bid submission.
18.	Clause 2.1.16(a) Page no.: 22	**Item Description** Number of members in a Consortium shall not exceed 4 (four). …….. **Query** Can two companies of the same group join as two separate members of the consortium? Kindly clarify.	Yes they can, however no double counting of capacities will be made.
19.	Clause 2.2.2(A) Page no: 28	**Item Description** …… such that the sum total of the above is more than Rs 1,359.16 crore (the "Threshold Technical Capability"). Provided that at least one fourth of the Threshold Technical Capability shall be from the Eligible Projects in Category 1 and/ or Category 3 specified in Clause 3.4.1 of this RFQ Cum RFP. **Query** We have the required value for the Threshold Technical Capacity as per this clause. However, the Capital Cost of the project is less than Rs 135.92 crore as stipulated in clause 3.4.3(c). We request you to kindly consider deleting clause 3.4.3(c) which is likely to increase competition. Kindly confirm.	Refer to Clause 3.2.3(C) of Model RFQ
20.	Clause 3.4.1(a) Page no.:43	**Item Description** Port sector would be deemed to include Marine structures, On-shore and Off-shore Terminals, Berths, Jetties, Quays, Cargo Handling System, Bulk/Liquid Material Handling System, Port Based terminal facilities, CFS/ICDs, Storage Tanks/Tank Farms, Conveyors, Gas or Oil Pipelines for Logistics Support to Port, Warehousing. **Query** Our understanding is items like cargo handling system - both inside and outside the port should be considered as eligible projects in terms of clause Nos. 2.2.2(A), 3.4.1(a) and 3.4.3(c).	Cargo handling system inside and outside port is not the matter to consider but cargo handling to be for the logistics support to port is only to consider.
21.	TEFR Page no.: 1-385	The TEFR that was uploaded was largely ineligible. The Plans and the details given therein could not be read properly. Kindly provide us a readable document.	Refer reply of Sl.No.8
22.	TEFR: Traffic Analysis	The Traffic Analysis has been done on 2021-22 traffic. Kindly revise it taking 2024-25 traffic.	Enclosed Traffic Analysis details till FY 2024-25 **"Annexure-IV"**

Sl. No.	Clause/Article No. /Page No./ Query Ref.	Pre-Bid Query	Response of HDC
23.	TEFR Page no. 80	It says that some automation of the lock is being undertaken to improve vessel transit time. Has the job been completed? If so, what is the transit time of Vessels through the Lock particularly the Panamax Vessels.	Completed 1 hr 40 Min on and Average.
24.	3.2.7.2 of TEFR Page no. 83	Kindly incorporate in the Concession agreement that SMPK will hand over the Berths at minimum depth of 9m.	DCA Condition Prevails
25.	3.2.7.3 of TEFR Page no.:83	If HDC has done any NDT of the Berths/ its Face, Kindly, provide the details of the same for our understanding of the Berth Structure.	Assessment report of residual life of Berth No.10 is provided. Enclosed **"Annexure-III"** whereas Health Study Report for Berth no. 9 is under progress and shall be provided in due course.
26.	3.2.7.6 of TEFR (Vessel Arrival) Page no. 89	Kindly provide the arrival details upto 2024-25.	Enclosed vessel arrival details till FY 2024-25 **"Annexure-I"**
27.	TEFR	The entire Traffic Forecast done in the TEFR of January 2026 is based on cargo handled at HDC upto 2020-21. Kindly update the forecast based on traffic handled upto 2024-25 and developments that are impacting the current traffic of HDC.	Enclosed Traffic Handled details till FY 2024-25 **"Annexure-IV".**
28.	TEFR, article 6.2	The TEFR at article 6.2 deals with various mechanization options. The analysis has been found to be very sketchy particularly while comparing the Option 3 and 4. These two options should also take into account the cost per ton for comparing options 3 and 4 (adopted by SMPK for the project). This is important considering the extent of investment vis a vis cargo to be handled owing to draft constraints.	Please be clarified that, the DPR and Detail Designs for this project shall be prepared by the Concessionaire. The TEFR contains all the requisite details for the Concessionaire to participate in the tender. The TEFR is reviewed and cleared by the competent authority.
29.	Chapter 6 of the TEFR Page no.: 177-191	The Layout finalized in Chapter 6 of the TEFR includes Covered Shed, sizeable quantum of Open area not covered by Conveyors etc. Please clarify as to what purpose the covered shed will be used when the cargo identified are Coal, Limestone and Iron Ore. The cost to Concessionaire to take possession of this shed will be infructuous. It is suggested that SMPK should demolish the same and hand over vacant land to the Concessionaire.	Tender condition prevails
30.	Chapter 6 of the TEFR	Besides, the cargo storage areas not covered by conveyors will have to unloaded, stacked and evacuated by semi mechanized means. This will lead to substantial investment/expenditure for both mechanized and semi mechanized handling. Please clarify this issue also.	TEFR is self-explanatory. The option of semi mechanization is mainly kept for export Cargo and full mechanization for Import Cargo.
31.	**TEFR**	**Kindly provide us the breakup of cargo footprint area of the backup area covered by Conveyors and that not covered.**	Please refer to Chapter-6 and Chapter-7. All the details requested by the bidder are duly covered under referred chapter of TEFR.
32.	TEFR	The total area of 83.57 acres proposed for allotment with	Tender condition prevails.

Sl. No.	Clause/Article No. /Page No./ Query Ref.	Pre-Bid Query	Response of HDC
		cargo footprint area of about 1,11,000 sqm for 6.5 million tons of coal will not be enough to create a capacity of 10 million tons with the two berths. This is in consideration of various grades to be accommodated, dwell time of at least 1 month for each ship load etc. The minimum land required is about 120 acres. Kindly consider the revised area requirement.	
33.	TEFR	It may be difficult to handle Limestone and Coal by same conveyor as suggested in the TEFR. Please look into this and the Capacity may be revised accordingly.	Coal is mainly envisaged as Import Cargo along with cargo like Limestone. The Concessionaire is expected to do the detail designs in this regard to handle the required Cargo. The TEFR already factors the separate conveyors systems duly considering the various handling scenarios(7). Please refer to TEFR for more details
34.	TEFR	The TEFR suggests continuous stack pile of length 300/400m of 70/50 m width. Such stock piles are not workable as you have to keep gap between each ship load of cargo considering difference in grades of coal which cannot be mixed. Besides, there will be different parties bringing coal. This aspect of continuous storage should be looked into.	Tender condition prevails.
35.	TEFR	The cargo handling list given in article 7.5 is not sufficient to address the cargo to stacked and evacuated by semi mechanized means using the non- mechanised plots, covered shed etc. This aspect should be looked into and the list be modified accordingly.	Tender condition prevails.
36.	TEFR	The Project Cost of 679.58 crores are not correct and appears to have been done on the basis of prices prevailing 4/5 years back. The 4 MHCs with Freight and Customs Duty would cost not less than Rs 220 crores. The 3 S/Rs would cost around Rs 90 Crores, the RLS would cost around Rs 18 crores etc. Besides, there are preoperative expenses including DSRA etc. which constitute sizeable amount. Hence, there is a need to revise the estimated cost of Rs 679.58 crores. This, unless revised, would pose serious concerns as it ultimately defines the Total Project Cost based on which the contingent liabilities of the parties are defined.	Tender condition prevails.
37.	TEFR	The Pre Tax Project IRR has been computed without taking Royalty into consideration as this will be a cost to the concessionaire. Please provide us the IRR taking the current level of Royalty into consideration as this will give realistic Picture. Please also provide the assessed Pre Tax Equity IRR taking Debt: Equity as 70:30.	•The Pre Tax IRR considers Debt to Equity Ratio of 70:30. •Royalty payment is the bidding parameter. Hence, the bidder needs to self-assess its Profit, before Royalty, based on which it needs to quote
38.	TEFR	The TEFR does not speak of how many deep draft vessels (more than 8 m draft) that SMPK can take every day taking two tides together. This is important as after	Right now 12 vessels handled considering two tides together.

Sl. No.	Clause/Article No. /Page No./ Query Ref.	Pre-Bid Query	Response of HDC
		mechanization, unloading of a Coal/ Limestone vessel carrying 30000 tons will be completed in less than 36 hours and the Berth will demand a vessel immediately thereafter. We believe the same will be the case with other berths requiring deep draft vessels viz. Berth Nos 1, 2, 5, 13, 14 etc. In the circumstances, kindly clarify how the demand for getting vessels requiring draft more than 8 m in every cycle of 36 hours will be met by SMPK keeping the overall demand for inside dock berths in view.	
39.	TEFR	We understand that the existing contract for operation of Berth No.1 with HMCs is going to expire soon. Please provide the manner in which the Berth No.1 is proposed to be mechanized/ equipped. This has bearing on the viability of the instant project under tender.	We are considering operation of Berth -1 on O & M with royalty sharing Model. Regarding cargo, Please see DCA clause 12.2 .
40.	TEFR	The annual volume of 8 million tons as per TEFR is sub optimal for an investment value of Rs 800 crores plus. Any investment of this size should be for handling at least 12 million tons of cargo per annum which is not possible under the conditions prevailing at HDC such as draft, limited tidal window for deep draft Vessels etc. Hence, it is suggested to handle cargo at these berths in semi-mechanized manner as is being at Berth No. 9 now using MHCs and shore based mobile equipment such as Pay-loaders, Dumpers etc. This will involve around Rs 150 crores per Berth by 2 MHCs, about 20 Dumpers, 12 Pay-loaders etc. Please Clarify on this suggestion.	Tender Condition Prevails
41.	DCA	Please modify the figure of Rs 679.58 crores mentioned in item (c) Total Project Cost based on current day pricing of the project components whose details can be obtained from the similar mechanization projects being undertaken at HDC. This is important considering the difficulties being faced with low project costs appearing in the concession Agreement while approaching for financing the project.	Tender Condition Prevails
42.	Clause 7.1(c)(i)(b)	The Clause 7.1(c)(i)(b) relating to obligation of Concessioning Authority for maintaining the navigable draft, in the channel at 7.4 m to 8.3m should be amended to 8.3 m plus so that the project is assured of getting optimum cargo in each hip load to ensure its viability. Hence, the clause may be amended accordingly.	Minimum 8.0 m will be maintained
43.	DCA	The Layout plan shown in Appendix I appears to be for a different project. Kindly provide the correct layout. After providing the correct layout, an opportunity be given for sending comments on the same and discussions in another pre bid meeting. Please consider this.	Refer **Corrigendum-I** which has been already issued
44.	DCA	Considering low priority for departure of completed vessels in ballast, tidal restrictions etc., whether the Concessioning Authority will shift completed vessels to some other berths to make the berth free for accommodating another waiting vessel as a part of its	Matter is under Consideration of Authority.

Sl. No.	Clause/Article No. /Page No./ Query Ref.	Pre-Bid Query	Response of HDC
		obligations.	
45.	DCA	What will be the role of the Concessioning Authority in case any of the Concessionaire amongst those managing different Berths under DBFOT/BOT resort to unhealthy competition having adverse impact on the business on the other concessionaires?	If both the parties agreed ,Authority may act as conciliator only.
46.	Clause 1.3	**Item Description** Schedule of Bidding Process: Extension of Bid due date **Query** Based on the preliminary assessment of the project documents, this project involves upgradation of the existing berths which will involve detailed assessment of the existing structure to be carried out by the respective subject matter experts / consultants. This assessment will take at least additional 2 months. Hence, we request the Authority to extend bid submission due date by at least 2 months from 28th Feb 2026, which will allow bidder to onboard the consultants to complete the assessment.	Bid submission date will be extended suitably. Please see **Corrigendum-II**
47.	Clause 1.3	**Item Description** Schedule of Bidding Process: Submission of queries **Query** In addition to request raised above in Point 1, the bidder will require additional time to understand the project in terms of technical and commercial assessment. Hence, we also request Authority to allow the bidder to submit their queries by 7th Feb 2026.	Please see **Corrigendum-II**
48.	Clause 1.3	**Item Description** Schedule of Bidding Process: 2nd round of quires Submission Pre-Bid meeting **Query** After furnishing the response of the first round of the queries, we request Authority for second round of submission of critical queries for clarification and pre-bid conference to address the critical queries related to the project.	Will be notified.
49.	Clause 1.3	**Item Description** 2nd Pre-Bid meeting **Query** We request to organize the second pre-bid meeting in order to discuss and resolve the issues which are identified / remaining after the first set of responses to the queries raised by bidders in the first pre-bid meeting. This will help to close the critical issues or concerns of the bidders in a conclusive manner.	Will be notified.
50.		**Item Description** Current Traffic **Query** In order to have a better understanding of the traffic potential of the project, we request the Authority to provide the berth wise, commodity wise cargo traffic handled at Haldia Dock Complex for the last 5 financial	Enclosed Traffic Handled details till FY 2024-25 **"Annexure-IV"**

<table>

<tr><td></td><td></td><td>years.</td><td></td></tr>
<tr><td>51.</td><td></td><td><u>Item Description</u>
Environmental Clearance
<u>Query</u>
We request Authority to clarify on the status of the Environment Clearance for the Project. If Environment Clearance is granted for the Project, then please provide the copy of the Environment Clearance and Consent to Operate (CTO) / Consent to Establish (CTE)</td><td>SMPK already has the CTO for all existing berths including Berth No. 9 and 10 and the copy of the same will be made available to the successful bidder.
CTE if required to be obtained by the Concessionaire.</td></tr>
<tr><td>52.</td><td></td><td><u>Item Description</u>
Project Cost
<u>Query</u>
We request Authority please clarify year of estimation of the Project Cost.</td><td>The Project Cost of INR 679.58 Crores is computed based on SOR rate prevailing at the time of drafting of TEFR i.e. Year- 2022-2023.</td></tr>
<tr><td>53.</td><td>DCA Clause 3.1(v)</td><td><u>Item Description</u>
Value of Authority assets
<u>Query</u>
The referred clause states that about INR 17.2 Cr is required to be paid by the concessionaire for transfer of asset.
We request Authority to provide the land free from all kinds of encumbrances and it will be utilizing the available area in an effective manner as the requirement of the cargo. Hence, we request authority for removal of transit shed and railway line and provide flexibility to the concessionaire to develop the shed and railway will be created by the concessionaire as their new plan and requirement.
As per the Model Concession Agreement 2021, the land license is Rs 1 per year. Hence request Authority to transfer the hard stand land to the concessionaire at Rs 1 per year in line with the MCA 2021.
Further, we would like to cite example from the recently concluded bid at Kolkata Dock System wherein the hardstand land was transferred at no cost to the concessionaire.</td><td>Tender Condition prevails
But having flexibility to remove / dismantle existing shed & Railway.</td></tr>
<tr><td>54.</td><td>DCA APPENDIX 13</td><td><u>Item Description</u>
Minimum Guaranteed Cargo (MGT)
<u>Query</u>
The MGT fixed for the project is very high which is up to 70% of the project capacity. We understand that one of the major constraints faced by the Concessionaire will be achieving high MGT considering the lack of adequate area for stackyard and high dwell time of cargo.
In view of above, we propose revision in MGT as given below:
<table>
<tr><th>Sl. No</th><th>Period from data of commencement of Commercial</th><th>MGT(million Metric tonnes per annum)</th></tr>

55.	DCA Clause 12.2	**Item Description** Competing Facilities **Query** The Authority plans to undertake several additional mechanization projects, which have been excluded from the list of competing facilities. The intent behind this provision is to grant the Project an Exclusivity Period, enabling the Concessionaire to stabilize operations and strengthen its marketing efforts to ensure commercial viability. This safeguard is particularly critical during the initial phase of operations. Accordingly, we request that the Authority for not taking any new mechanization projects at the Haldia Dock Complex until the average annual cargo volume handled at the Project Facilities and Services reaches at least 75% of the Project Capacity for two consecutive years.	Tender Condition Prevails. However, the authority doesn't have plan in near future.
56.	DCA Appendix-4 Para -4	**Item Description** Scope of work, Stage II- Full Mechanization Development **Query** The scope mentions the installation of additional railway siding of 750m length. However, the location of this proposed new railway line is not mentioned in the DCA, TEFR and any drawing. Please clarify the location of this new railway line duly marking on the drawing of existing Railway network with proposed infra for the subjected project.	Refer TEFR Drawing SMPK/PMS/2122-003/TEFR/P9/ 0707 & TEFR Pg- 9, 10, 232 & 233
57.	DCA Appendix-4 Para -4	**Item Description** Scope of work, Stage II- Full Mechanization Development **Query** The scope also mentions the installation of wagon loading silo for loading cargo. Whereas this does not synchronize with the proposed length of railway siding. For loading through silo minimum 1500m length (i.e. 750m each for pre & post silo line) shall be required, whereas the length considered for railway in the DCA is 750m only. Please Clarify	The total length of the railway line will be 1500 meters (750 meters existing already developed by Port and another 750 meters to be developed by Concessionaire). Refer TEFR Drawing SMPK/PMS/2122-003/TEFR/P9/ 0707 & TEFR Pg- 9, 10, 232 & 233
58.	DCA Appendix-4 Para -4	**Item Description** Scope of work, Stage II- Full Mechanization Development **Query** In addition to above point-2, Does it mean that the part of existing railway line will be given to concessionaire to utilize for their loading operation? If yes, the location of	Refer reply of Sl.No.56 & 57.

Sl. No.	Clause/Article No. /Page No./ Query Ref.	Pre-Bid Query	Response of HDC
		such railway line may please be clarified duly marking on the drawing of existing Railway network with proposed infra for the subjected project.	
59.		**Item Description** General **Query** Whether the railway infra (i.e. existing line or proposed new line) for the subjected project will be a facility dedicated for the concessionaire or will it be a common user facility? Please clarify. If it will be a common user facility, please provide the details of other users with details of their cargo with volumes?	The entire length of the railway line measuring 1500 meters (existing 750 meters already developed by Port and proposed 750 meters to be developed by Concessionaire) will be exclusively used by Concessionaire.
60.		**Item Description** General **Query** The Cargo bifurcation shown in the TEFR is as below : Import - Coal - 6.5 MMTPA (Rail - 70% - 4.55MMTPA) Import - Limestone - 1.0 MMTPA (Rail - 70% - 0.7MMTPA) Export - Iron Ore - 0.5 MMTPA (Rail - 70% - 0.35 MMTPA) While the proposed rail facility with wagon loading silo will cater to the Coal cargo only. Additional rail infra will be required to handle the other cargo. In such case additional railway infra may require to be developed, for which the additional land area will be required. Whether such land area can be made available to the concessionaire. kindly clarify.	**Refer Clause 7.1(c) (iii) in DCA**
61.	DCA Appendix -4 Para-4	**Item Description** Scope of Work, Stage-I- Semi Mechanization Development: **Query** The scope mentions the installation of Railway In-motion weigh Bridge. Since the development of new railway siding is mentioned as part of stage-2, it is presumed that the installation of this new IMWB is to be carried out in the existing line. However, the location of this proposed new IMWB is not mentioned in the DCA, TEFR and any drawing. Please clarify the location of IMWB duly marking on the drawing of existing Railway network with proposed infra for the subjected project.	Location of In motion Weigh Bridge is to be finalized by Concessionaire during Engineering stage.
62.	DCA Appendix -4 Para-4	**Item Description** Scope of Work, Stage-I- Semi Mechanization Development: **Query** Please clarify the following regarding the operation of this new In-motion weigh bridge - 1. Whether the In-motion weigh bridge will be operated by the concessionaire or the concessioning authority? 2. Whether the In-motion weigh bridge will be connected to the FOIS?	1)In-motion weigh bridge to be operated by the concessionaire 2) The In-motion weigh bridge need to be connected with the FOIS 3) To be connected directly with the FOIS system of Indian Railway

Sl. No.	Clause/Article No. /Page No./ Query Ref.	Pre-Bid Query	Response of HDC
		3. If yes wither this will be integrated to the existing FOIS system of HDC or to be connected directly to Indian Railway?	
63.	General	Please provide the drawing on UTM Co-ordinates duly marking the proposed land area for the subjected project duly marking the area proposed for new railway siding as well as the existing railway line, if proposed to be given to concessionaire for utilization.	The requested details are already provided in the TEFR. Please refer to Dg. No. SMPK/PMS/2122-003/TEFR/P9/0609
64.	General	Details plan of existing Railway infra - Please provide the following railway approved drawings of existing railway for the subjected project- * Engineering Scale plan, * L-section * Bridge / Culvert drawings * Sectioning & Wiring Diagrams if, existing railway is electrified	Will be shared with the Concessionaire during Engineering stage.
65.	General	Modus operandi for development of railway infra and Railway approvals - The concessioning authority is requested to please clarify the modus operandi for development of railway infra and Railway approvals i.e.- 1) What is the status of existing railway infra of HDC i.e. under which policy it is notified, whether it is a Private siding, Private Freight Terminal (PFT), Gat- Shakti Cargo Terminal (GCT) or one of the models under PPP policy such as NGR. 2) The proposed railway infra will be developed as an extension of existing railway infra under existing policy or the concessionaire shall be developing the railway infra as a separate siding and will be notified from Indian railway as a separate individual siding with dedicated alpha numeric code. Please clarify. 3) Whether the concessionaire shall require to approach Indian Railway for the various approvals which in general required for development of a individual siding i.e. Detailed Project Report, Engineering Scale Plan, L-section, Bridge Drawings, SIP, LOP etc.	1. Reference Indian Railway Board notification, TCR/1078/2018/15 Dated 31.10.2018 (RC-19/2018) & 2015/TC (CR)/505/1 Dated 04.01.2019, Page -5 (**copy attached "Annexure-II"**) Haldia Dock Complex railways operates as a Terminal Agent of South Eastern Railways. 2. The proposed railway infra will be developed as an extension of existing railway infra under existing policy. 3.No such approval is required from Indian Railway except FOIS, IMWB as of date.
66.	General	Benchmark and Reference control points - The TEFR does not mention the details of Benchmark and control points referred to establish the position of the existing structures and utilities and to develop the drawings attached with TEFR. Please share the details of Reference Bench mark and control point as will be required to carry out the Topographical survey by the Concessionaire and to synchronize the proposed works with the existing port infrastructure.	Will be shared during Engineering stage.
67.	TEFR Clause no. 3.5.2 Firefighting System	**Item Description** At HDC, 200 mm, 150 mm & 100 mm. Dia firefighting pipe line has been spread over across the basin. There is firefighting pumping house and fire dock station also exists inside the dock. Berth no. 9 & 10 also consists of five numbers of fire hydrants for controlling the fire at the	Firefighting system is required to be installed by the Concessionaire in the project area allotted to them.

Sl. No.	Clause/Article No. /Page No./ Query Ref.	Pre-Bid Query	Response of HDC
		berth. Firefighting pipe alignment pertaining to berth no. 9 & 10 has been presented in the below Figure 3-21. A detailed drawing of the same is presented in drawing no. SMPK/PMS/2122-003/TEFR/P9/0305. **Query** Details of existing firefighting pump house including following are required. 1) Location of pump house 2) GAD of the pump house 3) Fire water pumping system details including pump Type, capacity and head 4) Pipeline MOC of existing piping 5) Firefighting equipment specification Please clarify whether the fire-fighting system is dedicated to B-9 & 10 or shared with other berth facilities. Please provide the design Basis	
68.	TEFR Clause no, 5.8.1 Water Requirement	**Item Description** The major water demand is likely to be for the dust suppression system for the dry bulk cargo. The water requirement for this facility is calculated and presented in Chapter 6 of the report. Based on the water demand, suitable size of underground and overhead storage tanks shall be provided at appropriate places. An existing potable water line is passing near the berth as discussed in chapter 3, the water demand will be fulfilled through the existing pipe network. **Query** Details of existing portable water line including source of water, water quality, flow rate of supply, location of tap off point, existing water line size, pipeline MOC etc. Is required.	Only potable water will be provided by port on chargeable basis. However, water for firefighting and dust suppression has may be taken from the dock basin by the concessionaires at their own cost & arrangement, as per the approved plan.
69.	TEFR Clause no. 5.8.3 Firefighting system	**Item Description** There is already firefighting network installed at the berth by HDC. Firstly, the capacity of the fire water rating will be evaluated applicable to berth no 10. Further, if the same was able cater the fire water demand of berth no.10, no separate firefighting systems will be installed. Only, pipe network will be spread as the berth & back up area planning. **Query** We understand that the existing firefighting system shall be utilized for Berth-9 & 10. Following details are requested for adequacy check. 1) Location of pump house 2) GAD of the pump house 3) Fire water pumping system details including pump Type, capacity and head 4) Pipeline MOC of existing piping 5) Firefighting equipment specification As per the clause no. 3.5.2 fire hydrants are available on	Refer reply of Sl.No.67.

Sl. No.	Clause/Article No. /Page No./ Query Ref.	Pre-Bid Query	Response of HDC
		the berth 9 and 10, which is in contradiction with this clause. Please clarify:	
70.	TEFR Clause no. 5.8.3 Firefighting system	**Item Description** The firefighting system will comprise of separate water intake to draw water from the sump and a separate pump with closed loop with hydrants for the needed locations. **Query** We understand that new fire water pumphouse and water tank shall be required for firefighting system of back-up yard and other facilities except berth 9-10. Kindly confirm. Following details are required for new fire water tank. Details of separate water intake including source of water, water quality, flow rate of supply, existing water line size, pipeline MOC etc. Is required.	Refer reply of Sl.No.68
71.	TEFR Clause no. 5.8.4 Dust Suppression system	**Item Description** Dry fog dust suppression system shall be provided at all transfer towers and open storage areas. This system consists of air water mixture through localized flow activation unit to nozzles located at different locations. Plain water dust suppression system is provided for coal stockpile to suppress the generated dust due to wind blowing. The typical dust suppression system has been presented in below figure-5-16 **Query** Kindly clarify; 1) The new water tank and pumping system is to be considered for dust suppression system. 2) It is mentioned that dry fog DSS is required for open storage yard. It is also mentioned that plain water dust suppression system is provided for coal stockpile. We understand that dry fog dust suppression system shall be provided at all transfer towers, and plain water dust suppression system shall be provided at coal stockpiles. Please confirm. 3) Plain water dust suppression is required for other cargo storage or not. Please confirm. Please provide the design basis of DFDS system and plain water dust suppress system. Also clarify whether the bidder is free to design the system as per requirement or not.	Concessionaire to design entire DSS as per requirement in line with TEFR clause 5.8.4.
72.	TEFR Clause no. 5.8.4 Dust Suppression system	**Item Description** Pumps will be selected with a maximum capacity not less than 125% of rated capacity and will be suitable for continuous operation. Capacity of water tank will be adequate of minimum 1hr retention. Tank will be of MS construction and shall be fitted with vent over flow and drain connection. **Query** Kindly clarify;	Water for dust suppression may be taken from the dock basin by the concessionaires at their own cost & arrangement Available details are already provided in the TEFR. Further, the Concessionaire shall be preparing the detail designs and submitting the

Sl. No.	Clause/Article No. /Page No./ Query Ref.	Pre-Bid Query	Response of HDC
		1) How many number of sprinkler operation to be considered at a time. 2) Duration of operation of each sprinkler. 3) Water storage retention time is mentioned as 1 hour. We assume that reliable water source and supply are available. Please confirm. Tank construction may differ based on volume. Please confirm.	same for the review and approval of SMPK.
73.	DCA Clause no. F safety standards of the Annexure	**Item Description** The Petroleum Act, 1934 along with the Petroleum Rules, 2002. **Query** This clause is not applicable for the proposed facilities.	Please see **Corrigendum-III**
74.	DCA Clause no. F Safety standards of the Annexure	**Item Description** OISD – Guidelines – 156 (Oil Industry Safety Directorate): Fire Protection Facilities for Port Oil Terminals. **Query** Please note that OISD-156 is not applicable for the proposed facilities.	Please see **Corrigendum-III**
75.	TEFR Drw: SMPK/PMS/2122-003/ TEFR/ P9/ 0715	**Item Description** Schematic of Dry fog dust suppression system **Query** 1) TEFR Drawing shall be followed, or system shall be designed as per requirement. Please confirm. 2) Plain water DSS is to be considered for truck loading points. Please confirm. 3) Dry FOG DSS for Wagon loading facility to be considered. Please confirm. 4) Air blaster system for conveyor chutes to be considered. Please confirm. 5) Belt washing system for conveyors is required or not. Please confirm. 6) Wagon door opening system and wagon pre-wetting system is to be considered or not. Please confirm.	Further, the Concessionaire shall be preparing the detail designs and submitting the same for the review and approval of SMPK. The concessionaire has the flexibility to provide the suitable dust suppression system based on the latest industry practice, so that, the dust emission is within the permissible/acceptable limits. Belt washing system, Wagon door opening system and wagon pre-wetting system shall be duly considered as the operational philosophy of the Concessionaire.
76.	TEFR Drw: SMPK/PMS/2122-003/ TEFR/ P9/ 0716	**Item Description** Schematic firefighting system **Query** 7) TEFR Drawing shall be followed, or system shall be designed as per requirement. Please confirm. 8) Fire water pumps and water storage tank capacity shall be designed as per requirement of IS:13039 / TAC. 9) Fire detection alarm systems shall be considered for Buildings only. Please confirm. 10) LHS Detection system to be considered or not for conveyors. Please confirm. 11) Gas flooding system for control room, UPS room, battery rooms etc. To be considered or not. Please confirm.	The Concessionaire has the flexibility to prepare the own design duly meeting the project & statutory requirements and concession agreement requirements and submit the same for the review and approval of SMPK.

Sl. No.	Clause/Article No. /Page No./ Query Ref.	Pre-Bid Query	Response of HDC
77.	General	Please share the CAD file drawings of all the TEFR drawings. Also share the available topography survey layout including all the existing facitlites.	CAD file drawings of the TEFR drawings will be shared during Engineering stage
78.	TEFR -Clause 9	**Item Description** summary of Major facilities **Query** Please share details of peripheral drains, internal grading, slopes, and storm-water discharge arrangements, as runoff management affects long-term hardstand performance of the yard developed by HDC.	RCC drains along the G. C. Berth Main Road already exists with invert level approximately +6.0 m RL. However, the peripheral drains around the plots shall be developed. All the runoffs are discharged to dock basin through these drains.
79.	TEFR -Clause 9	**Item Description** summary of Major facilities **Query** Kindly provide the crust details adopted for the yard developed by HDC and confirm the design codes and loading criteria adopted by HDC while originally developing the 57,220 sqm area (e.g.IS codes, IRC:113, port loading standards). This is required to verify structural adequacy for the proposed cargo storage loads under the concession period. Also share the as-built cross-section, including: Crust thickness, material specifications (type, grade, density, CBR) Subgrade improvement methods adopted.	The crust comprises of geo-mattress over the soil base, sand filling of tentative 1.0 m thickness and 100 mm thick concrete paver block with 50 mm thick sand cushioning. The top level of newly developed was +7.40 m RL approximately. The as-built cross section is enclosed.
80.	TEFR -Clause 9	**Item Description** summary of Major facilities **Query** Kindly provide the item-wise cost components of the crust of the yard developed by HDC used for arriving at the total development cost of INR 13.68 Cr for 57,220 sqm, so that the basis of the derived INR 2,391 per sqm can be technically validated. Also confirm the upfront cost of INR 11.14 Cr is inclusive of GST.	INR 11.14 Cr is without GST.
81.	TEFR Table 9-2-	**Item Description** Breakup of the block cost **Query** TEFR doesn't specify / not captured any cost towards any civil work modification both for Berth-9 & berth-10, and hence bidder is not considering any civil modification works in concessionaire scope. Please confirm.	Berth Improvement cost of INR 6.0 Crores is factored in the TEFR
82.	TEFR -Table 9-2-	**Item Description** Breakup of the block cost **Query** It is understood from the preliminary health-check assessment report of Berth-10 that: • The fenders and bollards are in poor condition and require replacement. • The existing crane rails along the berth are significantly deteriorated due to ageing and may also require replacement. It is further understood that the above observations are	Replacement of Fender/ Bollard and crane rails for both the berths to be considered by the bidder.

Sl. No.	Clause/Article No. /Page No./ Query Ref.	Pre-Bid Query	Response of HDC
		equally applicable to Berth-9 (as health checkup bot carried out). However, the TEFR has considered a lump-sum provision towards the refurbishment of both Berth-9 and Berth-10 which seems to be very less. In this regard, bidder is considering the replacement of Fender/bollard and crane rail for both the berths. Please confirm.	
83.	TEFR-Table 9-2	**Item Description** Breakup of the block cost **Query** Will concessioning authority provide any baseline structural health/NDT report for Berth No. 9 prior to handover similar to Berth-10, Please confirm.	Assessment report of residual life of Berth No.10 is provided. Enclosed **"Annexure-III"** whereas Health Study Report for Berth no. 9 is under progress and shall be provided in due course.
84.	Table 9-2-	**Item Description** Breakup of the block cost **Query** Capital dredging from the present bed level to reach the desired Dredging depth (-) 9m CD and maintaining the same throughout the concession period is not in the scope of bidder. Please confirm.	Capital dredging over 8.5m will be done by the concessionaire if wish to. All maintenance dredging shall be carried out by authority.
85.	TEFR Table 9-2-	**Item Description** Breakup of the block cost **Query** Has any underwater inspection / diver survey been carried out to assess toe scour and foundation exposure since the structure was built over 50 years ago.	No
86.	TEFR Clause 2.7	**Item Description** Geotechnical investigation reports **Query** Please share the following full geotechnical reports as only soil profiles are shown in the TEFR. A) Geotechnical report prepared by M/s Constell Consultant Pvt. Ltd., 1998 near to the berth no. 9 and 10 Geotechnical report (2015) for the construction of hardstand/ road inside the dock area) done be M/s Techpro Engineers Pvt. Ltd	Full geotechnical reports of relevant areas are enclosed. **Enclosed "Annexure-V".**
87.	DCA Appendix -4 (B 1.3) Page no.-128	**Item Description** Mechanized Hopper @250 T holding **Query** The Hopper Holding capacity mentioned is too high. This will require more hopper height and will adversely affect the mobile harbour crane cycle time and overall throughput. Holding capacity of around 3 grabs is sufficient for continuous feed to conveyor.	Tender Conditions Prevail. However, during the detail design stage, minor flexibility/changes in the hopper design can be done to suit the overall project requirements subject to consent of SMPK and Independent Engineer.
88.	TEFR (Table 7-8) Page-220	**Item Description** Summary of Cargo Handling Equipment **Query** Tyre mounted Mobile Hopper with belt-feeder feeding to mechanized conveyor system will create feeding	Concessionaire has the flexibility of installing Tyre/rail mounted Mobile Hopper. The required upgradation of Berth/Associated facility without compromising the berth stability

Sl. No.	Clause/Article No. /Page No./ Query Ref.	Pre-Bid Query	Response of HDC
		alignment issue as this is moving equipment. The feeding hopper with belt feeder shall be rail mounted for proper feeding.	shall be the responsibility of the Concessionaire.
89.	TEFR (Figure 7-13 & 7-14) / Page No: 222 & 223	**Item Description** MHC & Mobile Hooper on Berth no.9 & 10 **Query** Both MHC and Mobile Hopper are considered as tyre mounted. Request to share the berth design and inform if there is provision of rail or not. If yes, then rail beam span / CRS and permissible load is also required.	Tender Conditions Prevail. MHC shall be strictly Tyre mounted. The details in this regard are already provided in TEFR
90.	TEFR	**Item Description** DRG NO: SMPK/PMS/2122- 003/TEFR/P9/0701 FINAL DEVELOPMENT PLAN **Query** We assume that Port authority will allow the internal plot plan changes keeping all DCA Appendix 4 Scope of work same. This is essential to further improve the operational flexibility etc.	The Concessionaire has the flexibility to prepare the own design with any changes within the allotted plot duly meeting the project requirements and concession agreement requirements and submit the same for the review and approval of SMPK.
91.	TEFR Page No: 5	**Item Description** The berth(s) can handle a maximum traffic of 10 MMTPA. Considered Annual Throughout 8 MTPA. **Query** Ref to projected cargo of 8 MTPA and ~70% rail dispatch; 1 No. of wagon loading silo with 800 T storage and 2000 TPH feeding conveyors will not be optimum solution. The 4000 MT silo and 4000 TPH conveyor system will be required to suffice this requirement. The S/R, yard conveyor and dispatch conveyor capacity will require to be kept accordingly. Or Additional Silo / Manual rail loading at siding to be included. Else dispatch will become bottleneck.	The concessionaire has the flexibility to provide additional facility (if required) at his own expense and no cost liability to SMPK.
92.	DCA Appendix 4 (Page No: 129)	**Item Description** Mechanized Hopper Qty repetitions **Query** Scope of work- Semi Mechanization development Sr. No: B1.3: 4 Nos Scope of work- Full Mechanization development Sr. No: B1.3: 4 Nos It seems the mobile hopper qty. is duplicated. The overall qty. requirement shall be 4 Nos. Only.	Yes. No. of Mobile Hopper will be 4 Nos. Please see **Corrigendum-III**
93.	DCA Appendix 4(B2.1) (Page No: 129)	The S/R reclaimer qty. (shall be made 4 Nos.) and yard conveyor (shall be double) to be revisited considering operational flexibility. The required plot plan change shall be allowed and area allocation to be done for proper stockpile arrangement.	Tender Condition prevails. However, the concessionaire has the flexibility to provide additional facility (if required) at his own expense and no cost liability to SMPK.
94.	DCA Appendix 4 (B2.6) Page no.-129	**Item Description** Truck loading station @500 TPH discharging capacity with 300 Tone silo **Query**	The concessionaire has the flexibility to provide additional facility (if required) at his own expense and no

Sl. No.	Clause/Article No. /Page No./ Query Ref.	Pre-Bid Query	Response of HDC
		Ref to practical issue; the mentioned requirement to be revisited. A) Different grade of cargos for different party on single truck loading station will require the frequent silo hopper cleaning. The makes it difficult and makes it underutilization solution. B) High feed rate ~2000 TPH and Low TLS storage (300 MT) will require frequent start and stop of conveyor. The same is not envisaged. We request to revisit this and allow truck loading from yards from payloader etc.	cost liability to SMPK with due compliance to tender conditions. Note: minor flexibility/freedom on the system design is considered and the same shall be subject to acceptance of SMPK/ Independent Engineer.
95.	TEFR Page no-377/385	**Item Description** SMPK/PMS/2122- 003/TEFR/P9/0709 Berth Conveyor Belt Profile Sheet 1 of 5 **Query** Both Berth conveyors shall be full length for operational flexibility to dispatch from any berth to any conveyor and use max hopper / crane also if required for faster unloading Presently both are not indicated for full length.	The concessionaire has the flexibility to provide additional facility (if required) at his own expense and no cost liability to SMPK with due compliance to tender conditions.
96.	General - Equipment	Authority to clarify and approve that the bidder is free to select the terminal equipment technical specification, configuration, and equipment category to achieve terminal capacity and best suit with integration needs.	The bidder has the flexibility to design the overall project based on the project operational philosophy. However, the minimum requirements as laid in the tender shall be duly complied to.
97.	General - Equipment	Authority to clarify and approve that equipment can be deployed based on sole direction of terminal operator on hire or owned basic, new or used and can be procured from anywhere from the globe.	The equipment's which needs upfront procurement and equipment's which can be deployed under rentals/hiring is clearly defined in the TEFR.
98.	Clause-7.7.2, Annex_IV-RFQ-cum RFP for_ Berth_No _9- 10	**Item Description** Power Requirement **Query** Power is available at existing substation; hence it is assumed that space is available for retrofitting of 2Nos. of 33KV Breaker Panels in existing substation. Please confirm.	It will be provided in due course.
99.	General	Please provide existing 33 kV substation location and 33 kV cable route corridor from existing S/S to proposed plot location.	Shall be provided, to the extent possible, during Engineering Stage.
100.	General	TEFR Drawing no. 0301 lists the total Berth 9 & 10 project area as 113.32 acres (including A1, A2, A3, A4, and miscellaneous), while drawing no. 0609 shows 76.81 acres (67.81 acres + 9 acres), and the DCA states 83.57 acres. Please confirm the exact project land boundary for allotment and provide it in AutoCAD format.	The total Project area of 83.57 Acres is envisaged for the project development and the same will be handed over to the Concessionaire.
101.	General	Can the concessionaire combine areas A1, A2, A3, and A4 into a common boundary by removing the existing road & rail to better utilize the backup yard and simplify operations?	As the common user roads are running across HDC, A1, A2, A3, and A4 cannot be clubbed as common boundary.

Sl. No.	Clause/Article No. /Page No./ Query Ref.	Pre-Bid Query	Response of HDC
102.	General	Please share internal and external port road traffic movement markings.	Shall be provided, to the extent possible, during Engineering Stage.
103.	General	Provide IN/OUT gate markings to clarify traffic flow and define project boundary gate locations.	Project boundary gate locations to be decided upon by Concessionaire
104.	General	TEFR Drawing no. 0201 shows bathymetry level in front of the berth no. 9 is (-)8 mCD to (-)9 mCD and in front of berth no. 10, (-)7.5 mCD to (-)9.5 mCD. While as Drawing no. 0704 & 0705 is showing initial dredging level (-)7 mCD and final dredging level is (-)8.3 m CD. What is the current maintained draft at berth 9 & 10 and what is the frequency of dredging.	Refer Clause 7.1 (c)(i)(d) of DCA which supersedes relevant clause of TEFR.
105.	General	Please provide the bathymetry survey chart of entire basin in AutoCAD format.	Enclosed latest bathymetry survey chart **"Annexure-VI'(in pdf Format)**
106.	General	Are there underground utilities like Power, water, telecom, fiber cables passing within the project area? If yes, request you to provide the details of each utility in AutoCAD format.	Shall be provided, to the extent possible, during Engineering Stage.
107.	General	Relocation of existing services will be in scope of Concessioning Authority. Please confirm.	Yes
108.	General	Dismantling of existing railway line passing through the project boundary is also in scope of concessioning authority. Please confirm.	Under the scope of Concessionaire.
109.	General	Can the concessionaire propose an alternative layout for mechanization, yard development and railway handling facilities for optimum utilization of project area and better operational efficiency.	The bidder has the flexibility to design the overall project based on the project operational philosophy. However, the minimum requirements as laid in the tender shall be duly complied to.
110.	General	What is the allowable downtime for berth during retrofitting works?	The project operations are expected to take place post completion of all the works as laid down in the tender for Stage-1 and Stage-2.
111.	General	Is concessionaire free to decide level of mechanization and associated scope without compromising the MGT mentioned in DCA.	The bidder has the flexibility to design the overall project based on the project operational philosophy. However, the minimum requirements as laid in the tender shall be duly complied to in terms of mechanization system, number of equipment's, equipment TPH/ Capacity, hoppers, mechanized Conveyors etc.
112.	General	**Item Description** Capex **Query** Project cost mentioned is very less considering the scope of work. Concessioning authority is requested to revisit the cost.	Tender Conditions Prevails

Sl. No.	Clause/Article No. /Page No./ Query Ref.	Pre-Bid Query	Response of HDC
113.	General	- Land parcel shown on TEFR drawing no. 609 and drawing no. 0701 is mismatch. Please check. Provide the clear land demarcation in AutoCAD format of final land to be allotted to Concessionaire. -Conveyor corridor from Berth to Yard is not shown in land marking. Is concessioning authority will provide the ROW for the conveyor and associated accessories as per concessionaire requirement. Request to concessioning authority, please provide the total Land area earmarked for Berth 9 & 10.	Please refer to the TEFR- Jan-2026 for all area related clarifications. ROW for conveyors from Berth to Yard and associated facility will be provided as earmarked already in the TEFR The total area of 83.57 Acres is envisaged for the project development and the same will be handed over to the Concessionaire.
114.	General	Request to share the AutoCAD copy of all the TEFR drawings.	Shall be provided, available during Engineering Stage.
115.	TEFR Clause -2.7.2	**Item Description** Geotechnical assessment at Berth No. 9 and 10 Backup area **Query** The soil information for the backup yard at BH-37 and BH-38 is currently available only up to a depth of 15 meters. Could you please provide a detailed geotechnical report for the entire backup yard area, extending to deeper depths, preferably up to 50 meters. This is necessary because the stacker declaimer needs to be supported on a pile foundation, and the existing 15-meter depth data is insufficient for this purpose.	Refer reply to Sl.No.86
116.	TEFR Traffic Report	The traffic data envisaged is of FY 2021-22. Kindly provide FY 24-25 traffic report.	Enclosed Traffic Analysis details till FY 2024-25 **"Annexure-IV"**
117.	TEFR ,Page no-80	Automation of lock is being undertaken for improvement in vessel transit time. What will be the transit time for Panamax vessels.	Transit time for Panamax vessels will be 1 hr 40 Min on an Average.
118.	TEFR 3.2.7,Page-83	Kindly share the vessel arrival details till FY 2024-25.	Enclosed vessel arrival details till FY 2024-25 **"Annexure-I"**
119.	TEFR	It may be difficult to handle coal and flux by the same conveyor, pls look into this.	Coal is mainly envisaged as Import Cargo along with cargo like Limestone. The Concessionaire is expected to do the detail designs in this regard to handle the required Cargo. The TEFR already factors the separate conveyors systems duly considering the various handling scenarios. Please refer to TEFR for more details.
120.	TEFR	How may vessels of 8 mtrs. draft can be taken by SPMK considering the tides.	In every high tide, 6 vessels of 8.0 m Draft can be taken.

Annexure-I

भारतीय रेल सम्मेलन
INDIAN RAILWAY CONFERENCE ASSOCIATION

मालभाड़ा सं. 49 भाग–I (जिल्द–II)

और

मालभाड़ा दर सं. 49 (भाग- I I)

GOODS TARIFF NO. 49 Pt. I (Vol.II)

AND

GOODS TARIFF NO. 49 (PART II)

इसमें माल भाड़ा दर संख्या 49 भाग–I (जिल्द–II) का सामान्य वर्गीकरण किया गया है जो केन्द्र सरकार द्वारा रेल मंत्रालय (रेल बोर्ड) के पत्र संख्या टीसीआर/1078/2018/15 दिनांक 31.10.2018 (दर प्ररिपत्र–19/2018) एवं 2015/टीसी (सीआर)/505/1 दिनांक 04.01.2019) से प्राधिकृत है।	Goods Tariff No. 49 Part I (Vol. II) contains the General Classification of Goods which has the authority of the Central Government vide Ministry of Railways (Railway Board) letter Nos. TCR/1078/2018/15 Dated 31.10.2018 (RC-19/2018) & 2015/TC (CR)/505/1 Dated 04.01.2019.
माल भाड़ा दर संख्या 49 (भाग- I I) में माल भाड़ा दर तालिकाएं दी गई हैं।	Goods Tariff No. 49 Part II contains Freight Rate Tables.
दिनांक 01 नवम्बर 2018 से लागू	In force from 01.11.2018
भाग- I (जिल्द- I) में माल की स्वीकृति, ढुलाई और सुपुर्दगी के सामान्य नियम दिए गए हैं।	Part I (Volume I) Contains General Rules for Acceptance, Carriage and Delivery of Goods.
भारत की सरकारी रेलों पर स्थानीय बुकिंग में तथा सम्मेलन की सभी सदस्य रेलों पर सीधी बुकिंग में उपयोग के लिए।	To be used in local booking over Indian Railways and through booking over all Railways party to the Association.

प्राक्कथन

1. यह दर सूची निम्नलिखित रेलों पर जो कि सम्मेलन के सदस्य हैं और केन्द्रीय अन्तर्देशीय जल परिवहन निगम लि. पर, जो कि सम्मलेन का सदस्य नहीं है, उनकी चालू दर-सूचियों में अधिसूचित अपवादों के अध्यधीन लागू हैं :-

केन्द्रीय अन्तर्देशीय जल परिवहन निगम लि. .... के.अं.ज.प.नि.

रेलवे का नाम	कूट	रेलवे का नाम	कूट
मध्य	म.रे.	दक्षिण पूर्व मध्य	द.पू.म.रे.
पूर्व	पू.रे.	दक्षिण पश्चिम	द.प.रे.
पूर्व मध्य	पू.म.रे.	पश्चिम	प.रे.
पूर्व तट	पू.त.रे.	पश्चिम मध्य	प.म.रे.
उत्तर	उ.रे.		
उत्तर मध्य	उ.म.रे.	गैर-सरकारी रेलवे	कूट
पूर्वोत्तर	पू.उ.रे.	कोलकाता पोर्ट ट्रस्ट	को.पो.ट्र.
पूर्वोत्तर सीमांत	पू.सी.रे.	चैन्नई पोर्ट ट्रस्ट	चै.पो.ट्र.
उत्तर पश्चिम	उ.प.रे.	कोंकण रेलवे कार्पोरेशन	के.आर.
दक्षिण	द.रे.	मुम्बई पोर्ट ट्रस्ट	मु.पो.ट्र.
दक्षिम मध्य	द.म.रे.	पीपावाह रेलवे कोर्पो. लि.	पी.आर.सी.एल.
दक्षिण पूर्व	द.पू.रे.	कच्छ रेलवे क. लि.	कच्छ.रे.क.लि.

2. **मुम्बई पोर्ट ट्रस्ट रेलवे-** मुम्बई पोर्ट ट्रस्ट रेलवे इन नियमों और शर्तों को स्वीकार करते हुए भी कुछ प्रकरणों में मुम्बई में अतिरिक्त प्रभार वसूल करती है जैसा कि उसकी माल भाड़ा दर सूची में निर्धारित किया गया है।

3. **कोलकाता पोर्ट ट्रस्ट रेलवे-** पोर्ट ट्रस्ट रेलवे के हावड़ा ब्रिज और काशीपुर के बीच के स्टेशनों का संचालन पूर्व रेलवे करती है, जबकि हल्दिया पोर्ट का संचालन दक्षिण पूर्व रेलवे करती है।

जहाँ तक डाक और जेट्टी का सम्बन्ध है, पोर्ट ट्रस्ट रेलवे क्रमशः पूर्व और दक्षिण पूर्व रेलवे के टर्मिनल एजेंट के रूप में काम करती है।

4. **चैन्नई पोर्ट ट्रस्ट रेलवे–** चैन्नई पोर्ट के दर माल के भाग ।।। में दिए गए स्थानीय प्रभार के अतिरिक्त, रेल द्वारा चैन्नई बन्दरगाह पर आने-जाने वाले सभी माल के लिए नियम दरें और शर्तें वही होगी जो दक्षिण रेलवे (ब.ला. खण्ड) से या उसके रास्ते रोयापुरम आने-जाने वाले माल के लिए अथवा दक्षिण रेलवे (मी.ला. खण्ड) से या उसके रास्ते चैन्नई बीच आने-वाले के लिए निर्धारित है।

PREFACE

1. This Tariff is in force on the under mentioned Railways, party to the Association, and on the Central Inland Water Transport Corporation Ltd., not party to the Association, subject to the exceptions notified in their current Tariffs :-

Central Inland Water Transport Corporation Ltd. ... C.I.W.T.C

Name of Railways	**Code**	**Name of Railways**	**Code**
Central	C.R.	South East Central	S.E.C.R
Eastern	E.R.	South Western	S.W.R.
East Central	E.C.R.	Western	W.R.
East Coast	E.CoR.	West Central	W.C.R.
Northern	N.R.

South Eastern	S.E.R.	Kutch Rly. Co. Ltd.	Ku.R.C.

2. Mumbai Port Trust Railway - The Port Trust Railway, while accepting the rules and conditions, collects in Mumbai an additional charge in certain cases as laid down in its Goods Tariff.

3. Kolkata Port Trust Railway - The Eastern Railway works the stations on the Port Trust Railway between Howrah Bridge and Cossipore, while South Eastern Railway works Haldia Port.

As regards Docks and jetties, the Port Trust are the terminal agents of the Eastern and South Eastern Railways respectively.

4. Chennai Port Trust Railway - The rules, rates and conditions, for all goods entering or leaving the Chennai Harbour by rail are the same as from or to Royapuram for goods from or to and via the Southern (B.G. Section) Railway and as from or to Chennai (Beach) for goods from or to and via the Southern (M.G. Section) Railway plus the local charges as laid down in Part III of the Chennai Port Trust Scale Rates.

दरों के विषय में जानकारी

माल परिवहन की दरों और शर्तों के सम्बन्ध में अधिप्रमाणक सूचना निम्नलिखित से आवेदन करके प्राप्त की जा सकती है :-

रेलवे	दरें बताने के लिए सक्षम प्राधिकारी
मुम्बई पोर्ट ट्रस्ट	प्रबन्धक, मुम्बई
कोलकाता पोर्ट ट्रस्ट	(1) प्र. मुख्य वाणिज्य प्रबन्धक, पूर्व रेलवे, कोलकाता–1 जहां तक डाक और जेट्टी से आने जाने वाले उनके अपने अपने यातायात का सम्बन्ध है। * द.पू.रे. हल्दिया पोर्ट संचालन के लिए (2) यातायात प्रबन्धक, पोर्ट ट्रस्ट कोलकाता पोर्ट ट्रस्ट परिसरों में स्थित स्थानों के बीच स्थानीय यातायात के लिए।
मध्य	प्रि. मुख्य वाणिज्य प्रबन्धक, छत्रपति शिवाजी महाराज टर्मिनस, मुम्बई।
पूर्व	प्रि. मुख्य वाणिज्य प्रबन्धक, कोयला घाट, कोलकाता।
पूर्व मध्य	प्रि. मुख्य वाणिज्य प्रबन्धक, हाजीपुर।
पूर्व तटीय पारादीप पोर्ट ट्रस्ट	प्रि. मुख्य वाणिज्य प्रबन्धक, पूर्व तटीय रेलवे, भुबानेश्वर।
चेन्नई पोर्ट ट्रस्ट	प्रि. मुख्य वाणिज्य प्रबन्धक, दक्षिण रेलवे (ब.ला. खण्ड), चेन्नई।
उत्तर	प्रि. मुख्य वाणिज्य प्रबन्धक, बड़ौदा हाउस, नई दिल्ली।
उत्तर पश्चिम	प्रि. मुख्य वाणिज्य प्रबन्धक, जयपुर।
उत्तर मध्य	प्रि. मुख्य वाणिज्य प्रबन्धक, इलाहाबाद।
पूर्वोत्तर	प्रि. मुख्य वाणिज्य प्रबन्धक, गोरखपुर।
पूर्वोत्तर सीमान्त	प्रि. मुख्य वाणिज्य प्रबन्धक, मालीगांव, गुवाहाटी।
दक्षिण	प्रि. मुख्य वाणिज्य प्रबन्धक, चेन्नई।
दक्षिण मध्य	प्रि. मुख्य वाणिज्य प्रबन्धक, सिकन्दराबाद।
दक्षिण पूर्व मध्य	प्रि. मुख्य वाणिज्य प्रबन्धक, बिलासपुर।
दक्षिण पश्चिम गोवा पोर्ट ट्रस्ट	प्रि. मुख्य वाणिज्य प्रबन्धक, दक्षिण पश्चिम रेलवे, हुब्बल्ली।
दक्षिण पूर्व हल्दिया पोर्ट ट्रस्ट	प्रि. मुख्य वाणिज्य प्रबन्धक, द.पू. रेलवे, स्ट्रैन्ड रोड, कोलकाता।
पश्चिम कच्छ रेलवे क. लि.	प्रि.मुख्य वाणिज्य प्रबन्धक, प.रे. चर्चगेट, मुम्बई।
कांडला पोर्ट ट्रस्ट	उप-मुख्य वाणिज्य प्रबन्धक (दर), पश्चिम रेलवे, चर्चगेट, मुम्बई।
पश्चिम मध्य	प्रि. मुख्य वाणिज्य प्रबन्धक, जबलपुर।
कोंकण रेलवे कार्पोरेशन लिमिटेड	मुख्य वाणिज्य प्रबन्धक,कोंकण रेलवे, बेलापुर, नवी मुम्बई।
पीपावाह रेलवे कोर्पो. लि.	वाइस प्रेसीडेन्ट (टैक्नीकल), बी–1202, बी विंग 12वीं मंजिल स्टेट्समैन हाउस, 148 बाराखम्बा रोड़, कनॉट प्लेस, नई दिल्ली–1
केन्द्रीय अन्तर्देशीय जल परिवहन निगम लिमिटेड	वाणिज्य प्रबन्धक, के.अं.ज.प.नि.लि., जुगरनाथ घाट, कोलकाता-7।

Quotation of Rates

Authentic information in regard to the rates and conditions for goods traffic may be had on application to the following :–

Railway	Authority competent to quote rates
Mumbai Port Trust	Manager, Mumbai
Kolkata Port Trust	(1) Pr. Chief Commercial Manager, Eastern Rly, Kolkata-1 So far as their respective traffic Docks and Jetties are concerned. * SER Works Haldia Port (2) Traffic Manager, Port Trust, Kolkata For local traffic between points on the Port Trust Premises.
Central	Pr. Chief Commercial Manager, Chhatrapati Shivaji Maharaj Terminus, Mumbai.
Eastern	Pr. Chief Commercial Manager, Koilaghat, Kolkata.
East Central	Pr. Chief Commercial Manager, Hajipur.
East Coast Paradip Port Trust	Pr. Chief Commercial Manager, East Coast Railway, Bhubaneswar.
Chennai Port Trust	Pr. Chief Commercial Manager, Southern Railway (B.G. Section), Chennai.
Northern	Pr. Chief Commercial Manager, Baroda House, New Delhi.
North Western	Pr. Chief Commercial Manager, Jaipur.
North Central	Pr. Chief Commercial Manager, Allahabad.
North Eastern	Pr. Chief Commercial Manager, Gorakhpur.
Northeast Frontier	Pr. Chief Commercial Manager, Maligaon, Guwahati.
Southern	Pr. Chief Commercial Manager, Chennai.
South Central	Pr. Chief Commercial Manager, Secunderabad.
South East Central	Pr. Chief Commercial Manager, Bilaspur.
South Western Goa Port Trust	Pr. Chief Commercial Manager, S.W. Railway, Hubballi.
South Eastern Haldia Port Trust	Pr. Chief Commercial Manager, S.E. Rly., Strand Road, Kolkata.
Western Kutch Rly. Co. Ltd.	Pr. Chief Commercial Manager, W. Rly., Churchgate, Mumbai.
Kandla Port Trust	Dy. CCM (Rates), Western Railway, Churchgate, Mumbai.
West Central	Pr. Chief Commercial Manager, Jabalpur.
Konkan Rly Corpn. Ltd.	Chief Commercial Manager, Konkan Railway, Belapur, Navi Mumbai.
Pipavav Rly. Corp. Ltd.	Vice President (Technical) B-1202, B-Wing, 12th Floor, Statesman House, 148, Barakhamba Road, Connaught Place, New Delhi-1.
Central Inland Water Transport Corpn. Ltd.	Commercial Manager, C.I.W.T.C. Ltd., Juggarnath Ghat, Kolkata-7.

वर्गीकरण संबंधी मार्गदर्शी सिद्धांत और
मालभाड़ा प्रभार संबंधी सामान्य नियम

1.0 वस्तुओं का वर्गीकरण मुख्य वस्तु शीर्ष/उपशीर्ष और निम्न दर वाली वस्तुओं को तीन भागों के अंतर्गत मालभाड़ा दर सूची में दिया गया है।

2.0 मुख्य वस्तु शीर्ष के अंतर्गत मालभाड़ा दर सूची में दी गई विभिन्न वस्तुओं का वर्गीकरण वही होगा, जब तक विशेष रूप से उल्लिखित न हों, भले ही वे विभिन्न वास्तविक रूपों/आकारों और विभिन्न स्थितियों में हों, कच्ची हो या विर्निमत आदि हो।

3.0 वह वस्तु जो मालभाड़ा दर सूची में दिए गए किसी मुख्य वस्तु शीर्ष के अंतर्गत अथवा कम दर वाली वस्तुओं के तीनों भागों में शामिल नही की गई है, उसको लदान किए गए माल डिब्बा के प्रकार के आधार पर लागू मिश्रित मूल माल भाड़ा दर लिया जाएगा। वह मूल माल भाड़ा दर निम्नलिखित इस प्रकार हैं :–

वैगन के प्रकार	उचित लागू श्रेणी
टैंक वैगन	श्रेणी-200
फ्लैट वैगन	श्रेणी-180
खुले (होपर सहित) वैगन	श्रेणी-160
ढके हुए वैगन	श्रेणी-150

4.0 किसी वस्तु का वर्गीकरण, जो मालभाड़ा दर सूची में नहीं दर्शाया गया है एवं स्टेशन पर ब्लॉक रेक लदान की संभावना है का प्रस्ताव विगत में संभालते हुए, यातायात की मात्रा के ब्यौरे सहित रेलवे बोर्ड को भेजा जाए।

5.0 मालभाड़ा दर सूची में केवल वस्तुओं को गाड़ी भार वर्गीकरण को दर्शाया गया है। वस्तु का माल भाड़ा संचालन का वर्गीकरण निम्नलिखित है :-

	गाड़ी भार श्रेणी	मालडिब्बा भार श्रेणी
(क)	श्रेणी LR_1 तक	श्रेणी -120
(ख)	श्रेणी LR_1 से उच्चतर और श्रेणी 190 तक	गाड़ी भार श्रेणी से एक श्रेणी अधिक या श्रेणी-150, जो कोई भी उच्चतर हो।
(ग)	श्रेणी-200	श्रेणी-200 का बेस माल भाड़ा दर + 5%

GUIDING PRINCIPLES FOR CLASSIFICATION AND GENERAL RULES FOR CHARGING OF FREIGHT

1.0 Classifications of the commodities have been given in the Goods Tariff under Main Commodity Head/Subhead and three divisions of Low Rated Commodities.

2.0 The Classification of different commodities under the Main Commodity Head/Subhead given in the Goods Tariff, if not explicitly mentioned otherwise, will be same for their different physical forms/shapes and different conditions, (whether raw or manufactured etc).

3.0 A commodity, which has not been included in any of the Main Commodity Heads or three divisions of Low Rated Commodities given in the Goods Tariff, will be charged at Composite Base freight rates applicable for the wagon type in which it is loaded. The base rates are as under:-

Type of wagon	Applicable Class
Tank Wagons	Class-200
Flat Wagons	Class-180
Open (including Hoppers) Wagons	Class-160
Covered Wagons	Class-150

4.0 Proposal for assigning trainload classification of a commodity not indicated in the Goods Tariff but having a potential for block rake loading may be sent to Railway Board.

5.0 Only train load Classification of commodities has been indicated in the Goods Tariff. The Classification for wagonload movement of the commodity will be as under:-

	Trainload Class	Wagonload Class
(a)	Up to Class LR_1	Class-120
(b)	Above Class LR_1 And up to Class-190	One Class higher than Trainload class rate or Class-150, whichever is higher
(C)	Class-200	Base Freight rate of Class-200 + 5%

5.1 मीटर गेज और नैरो गेज प्रणाली :– उपरोक्त पैरा 5.0 के प्रावधान के अतिरिक्त मीटर गेज और नैरो गेज प्रणाली पर सभी वस्तुओं की डिब्बाभार श्रेणी, उन वस्तुओं का गाड़ीभार श्रेणी से एक श्रेणी उच्च होगी। उच्चतम श्रेणी की वस्तुओं की डिब्बा भार श्रेणी, गाड़ीभार श्रेणी के समान होगी।

6.0 अंग्रेजी और हिन्दी संस्करण के बीच वर्गीकरण के मामले में किसी असमानता की स्थिति में, अंग्रेजी संस्करण में दिया गया वर्गीकरण मान्य होगा।

7.0 खतरनाक/जोखिम पूर्ण वस्तुओं को अक्षर 'डी' से दर्शाया गया है। ये वस्तुएं मुख्य वस्तु शीर्ष/उपशीर्ष के लिए दर्शायी गई श्रेणी पर प्रभारित की जाती है। जो जैसा मामला हो बहरहाल, अन्य सभी खतरनाक जोखिम पूर्ण वस्तुएं, जो मालभाड़ा दर सूची में सूचीबद्ध नहीं है लेकिन "रेड टैरिफ" में सूचीबद्ध है उच्चतम श्रेणी-200 पर प्रभारित की जाएगी। खतरनाक/जोखिम पूर्ण वस्तुएं जब तक "रेड टैरिफ" में सूचीबद्ध नहीं की गई हैं, रेल परिवहन के लिए बुक नहीं किए जाएगें।

7.1 खतरनाक/जोखिमपूर्ण सभी वस्तुओं की ढुलाई की उन सभी शर्तों का अवश्य पालन किया जाना चाहिए जिनका उल्लेख "रेड टैरिफ" में किया गया है।

8.0 सभी वस्तुओं के भाड़े की वसूली लदान किए गए वैगन की समय-समय पर की गई अनुमेय वहन क्षमता के आधार पर की जाएगी।

9.0 सभी पण्यों के लिए न्यूतम दूरी 100 कि.मी. प्रभार्य होगी।

10.0 माल भाड़ा दर सूची के प्रावधानों के अनुसार, बुक किए गए यातायात के प्रभार को अगले रुपये में पूर्णांकित किया जाएगा। ये पूर्णांकण समस्त अतिरिक्त लागू प्रभारों जैसे डायनामिक प्राईसिंग पॉलिसी सम्बन्धी प्रभार आदि जोड़ने के बाद रेलवे रसीद में मात्र एक बार किया जाएगा।

11.0 सभी वस्तुओं के लिए माल-भाड़ा का प्री-भुगतान अनिवार्य है। ई-भुगतान के मामले में जब बैंक से भाड़े के संग्रह के संबंध में एक सकारात्मक पुष्टि प्राप्त होती है तब टी.एम.एस. एक पेड ई-आरआर जारी करेगा। यदि बैंक से अपर्याप्त निधि का संदेश प्राप्त होता है तो प्रणाली 'टू-पे' ई-आरआर जारी करेगी। यदि बैंक से किन्ही कारणों से 150 सैकेण्डों के अन्दर कोई संदेश प्राप्त नही होता है तब प्रणाली ई-भुगतान निर्देशों के अंतर्गत 'मजबूरियों के तहत अपनाई जाने वाली प्रक्रिया' के अनुसार एक पेड ई-आर आर जारी करेगी।

12.0 "जोखिम दर" कालम में "ओ आर" में दी गई वस्तुएं मालिक के जोखिम पर प्रभारित/बुक की जाएगी। बहरहाल, ओ आर दर वाली वस्तुएं 20 प्रतिशत अधिभार के भुगतान पर आर आर दर पर बुक की जा सकती है। अन्य सभी मामलों में, जहां "ओ आर" नहीं दर्शाया गया है, वहां, वस्तुओं को रेलवे की जोखिम दर प्रभारित/बुक की गई मानी जाएगी।

13.0 मुख्य वस्तुशीर्ष/उपशीर्ष में दी गई पैकिंग की शर्तें उन मुख्य वस्तुशीर्ष/उपशीर्ष के अंतर्गत सभी वस्तुओं के लिए भी प्रयोग की जाएगी जब तक कोई अन्य पैकिंग शर्तें विशेष रूप से सम्बन्धित वस्तु के लिए वर्णित नहीं करता।

13.1 प्रेषकों को यह सुनिश्चित करना होगा कि रेलों द्वारा परिवहन के लिए लूज, थोक और बोरियों आदि में सौंपी गई वस्तुओं की पैकिंग दोष पूर्ण न हो अथवा वस्तु की प्रकृति के अनुसार अनुचित रूप में पैक न की गई हो। यह सुनिश्चित किया जाना चाहिए कि वस्तुएं इस ढंग से पैक की जाए कि उनकी परिवहन के दौरान क्षति, विकृति, रिसाव अथवा बरबादी न हो।

13.2 यह सुनिश्चित किया जाए कि वस्तुओं को उच्च किस्म और पर्याप्त मज़बूती वाले बोरियों, कंटेनरों, ड्रमों, डिब्बों, कार्टनों आदि में पैक किया गया हो ताकि वे परिवहन के दौरान किसी भी प्रकार के झटकों को झेल सकें और उन्हें उठाने में भी आसानी हो। लूज हालत में लदान की गई वस्तुएं जैसे बांस, लकड़ी, लोहा एवं इस्पात आदि को मजबूती से बांध दिया जाना चाहिए।

****

5.1 MG and NG System: Notwithstanding anything contained in Para 5.0, the Wagonload Class of all commodities shall be one Class higher than their respective Trainload class when loaded on Metre Gauge (MG) and Narrow Gauge (NG) system. However, for the commodities in the highest Class, the Wagonload Class will be same as Trainload Class.

6.0 In case of any disparity in classification between English and Hindi version, the classification given in English version shall prevail.

7.0 Dangerous/hazardous commodities are indicated with alphabet "d" against the commodity. These commodities are to be charged at the class indicated for the Main Commodity Head/Subhead as the case may be. However, all other dangerous/hazardous commodities, not listed in the Goods Tariff but listed in the "Red Tariff", will be charged at the highest Class-200. Dangerous commodities will not be booked for transportation by Rail unless they are listed in the "Red Tariff".

7.1 All conditions for carriage of dangerous/hazardous commodities, as laid down in the Red Tariff, must be followed.

8.0 The chargeable weight for all commodities shall be Permissible Carrying Capacity (PCC) of the wagon notified from time to time.

9.0 Minimum distance for charge shall be 100 kms. for all commodities.

10.0 Freight charges for traffic booked under provisions of Goods Tariff will be rounded off to the next higher rupee. Such rounding off of freight per Railway Receipt will be done only once after adding all applicable charges/surcharges like surcharges under Dynamic Pricing policy, etc.

11.0 Pre-payment of freight is compulsory for all commodities. In case of E-payment, TMS will permit issue of 'Paid E-RR' when a positive confirmation from Bank is received regarding collection of freight. If Bank sends a message of insufficient funds, system will issue 'To-pay' E-RR. If no message is received from the Bank within 150 seconds for any reason whatever, then system will issue a Paid E-RR subject to conditions laid down for 'Procedure in case of exigencies' under e-payment guidelines.

12.0 The commodities attached with "OR" in the column "Risk Rate" will be charged/booked at Owner's Risk. However, commodities with OR rate can be booked at RR rate on payment of 20% surcharge. In all other cases, where "OR" does not appear, commodities be treated to have been charged/booked at Railway Risk Rate.

13.0 Packing condition given against the Main Commodity Head/Subhead shall also apply to all commodities mentioned under that Main Commodity Head/Subhead unless other packing condition is specifically mentioned against the respective commodity.

13.1 Consignors will have to ensure that the commodities offered for transportation by railways are not defectively or improperly packed depending upon the nature of the commodity and the method of transportation such as in loose condition, in bulk, in bagged condition etc. It should be ensured that the commodities are packed in such a manner that they are not liable to damage, deterioration, leakage or wastage during transit.

13.2 It should be ensured that the commodities are packed in bags, containers, drums, cases, cartons etc. of high quality and adequate strength, which can withstand the rigours of transportation and also provide ease of handling. Commodities loaded in loose condition such as bamboos, timber, Iron & steel etc. must be securely tied.

SYAMA PRASAD MOOKERJEE PORT, KOLKATA

ASSESSMENT OF RESIDUAL LIFE OF BERTH 10 OF HALDIA DOCK COMPLEX (HDC), SMPK PROJECT

FINAL REPORT

MAY 2023

Client: M/s VOYANT SOLUTIONS PRIVATE LTD.

Prepared
By
Dr. S.S Hota
Ph.D (Engg.)
Professor & Head

CIVIL ENGINEERING DEPARTMENT
HALDIA INSTITUTE OF TECHNOLOGY

HALDIA INSTITUTE OF TECHNOLOGY

Voyants Solutions Private Limited. (VSPL)

Client: **Syama Prasad Mookerjee Port, Kolkata (SMPK)**
15, Strand Road, Kolkata - 700 001, West Bengal, India.

Project:	Techno Economic Feasibility Report for augmentation of 08 nos. of projects through PPP Mode to be implemented both at Haldia Dock Complex (HDC), Haldia & Kolkata Dock System (KDS), Kolkata, SMPK. Additional Work: Execution of extra item of work to determine the present health status/residual life of structures namely Berth No. 5 and 10 in HDC	**Project No.:** GUR / 21-22 /2122-003/PORTS
Title:	FINAL REPORT – ASSESSMENT OF RESIDUAL LIFE OF BERTH NO. 10 AT HDC	Contract No.: I&CF/IZ&R/Agr/65 Dt. 29.06.2021.
		RP002 R1

References:

PROJECT PREFACE

The Haldia Dock Complex and Kolkata Dock System of Syama Prasad Mookerjee Port Authority Kolkata are Riverine Dock Systems located in Kolkata and Haldia respectively. HDC is located on the western bank of river Hooghly at a Latitude: 220 02' N and Longitude: 880 06' East.

The Ministry of Ports, Shipping & Waterways, Govt. of India have taken various initiatives for transforming existing major ports into modern world-class ports by way of augmenting capacities through increased efficiency and productivity to meet the requirement of maritime trade and commerce. The cargo handling at HDC has increased in the last decade and growth is expected to continue in future also in view of the vast economic hinterland comprising major Steel Plants of SAIL and TATA Steel, Power Plants of NTPC, CESC, WBPDCL, & Fertilizer manufacturing industries whose requirement for dry bulk cargo consisting of Coking Coal, Non-Coking coal, Coke, Lime Stone, Manganese Ore, Iron ore and Fertilizer Raw Materials through Haldia Dock will increase manifold in future.

In the above perspective, SMPA has decided to mechanize 3 existing Berths of KDS and 2 of HDC. One of the 2 earmarked berths of HDC is existing Berth No 10 (254 meter) for handling additional volume of cargo. With this objective, SMPA have decided to go for assessment of the condition of these berths and prediction of their residual life before taking up mechanization programme as this berth has been constructed long time back (during year 1977).

CHAPTER 1
INTRODUCTION

1.1 ABOUT THE PROJECT

M/s Syama Prasad Mookerjee Port Authority awarded a contract on M/s Voyant Solutions Private Ltd. (VSPL) for preparing Techno-Economic Feasibility Report for upgradation and mechanization of 5 different berths of Haldia Dock Complex and Kolkata Dock System (KDS) that includes existing Berth No 10 (254 meter) of Haldia Dock Complex (HDC).

Further, SMPK/HDC appointed VSPL to carry ou the assessment of residual life of berths vide letter no. I&CF/IZ&R/T/334/1722 dated 22ndFeb 2022.As a part of this study, VSPL is required to carry out assessment of the residual life of the 5 berths concerned upon carrying out of different tests and undertaking other related examination/ analysis. Further, VSPL intend to appoint a sector expert to carry out the residual life of the berths, in this regard sought budgetary offer from Haldia Institute of Technology (HIT) which was submitted by HIT vide mail dated 26/10/ 2021. Thereafter, VSPL placed the work order No. VSPL/Ports/02/2022-23 dated 07.04.2023 CAN-2122-003/Ports for assessment of current health and residual life of the RCC Superstructure of the 5 berths concerned that includes Berth No. 10 of HDC.

1.2 OVERVIEW OF THE STRUCTURAL NATURE OF THE BERTHS

Berth 10 consists of 16 RCC monoliths separated from each other by construction joint running along their width.

Length and width of the top deck slab of Berth 10 are 254 m and 15.7 m respectively. These monoliths consist of 3 walls with the deck slab integrally running over them. Thickness of the wall near the water face is 1.016 m whereas that of the other two is 0.506m. Each monolith spans between two fender points. One cross sub-way is placed at the centre of the monolith. The main service sub-way runs along the length of the berth. Thickness of the deck slab is 303 mm. The monoliths support the loads by their own weight.

CHAPTER 2
SCOPE OF WORK

2.1 SCOPE

The Scope of Services pertaining to the assessment of current health status and associated tests to be carried out on berth No. 10 at HDC as per the work order number I&CF/IZ&R/T/334/1722 dated 22nd Feb 2022 is presented below in **Table 2-1**.

Table 2-1 Test Quantity Details

Sl No.	Test Particulars	Quantity per Berth (In Numbers)
1.	Concrete core test (To test the compressive strength of concrete)	6
2.	Rebound Hammer/Schmidt Hammer test (to access the likely compressive strength, uniformity, quality of concrete)	20
3.	Ultra-sonic pulse Velocity Test (to determine the homogeneity of concrete)	20
4.	Half Cell Potential test (test to determine the extent of Reinforcement of corrosion)	15
5.	Carbonation test (To determine the depth of carbonation in concrete)	6
6.	Chemical test (Chemical analysis of concrete to determine the cement content, chloride, Sulphate & pH content in concrete)	6
7.	Visual Inspection	1

The report contains: -

a) Results of the non-destructive tests,
b) Analysis of the condition of concrete,
c) Prediction of residual life and
d) Suggestion of strengthening measures of the RCC superstructure.

CHAPTER 3
METHODOLOGY

The methodology adopted to execute the scope of work mentioned above was detailed below. Health assessment of the super structure, suggestion of remedial measures or rehabilitation of distressed portion and prediction of residual life follows site investigation and performing of field and laboratory tests in accordance to the procedures or guidelines provided in this section.

The tests like USPV, Half-cell potential and rebound hammer are purely non-destructive in nature. Extraction of concrete core and determination of its compressive strength is semi-destructive.

Spots for conducting the NDTS listed above, extraction of cores, and collection of samples to perform chemical tests are first marked on the berth. Drawings showing these locations are provided in the Appendix 1. In these drawings

X = Distance of points along the length of the berth from the bollard of monolith 2/14 of Berth 10 towards monolith 18 of grain berth.

Y = Height of point above the top surface of the deck.

Note: –ve Y indicates distance of points from the top surface of the deck towards water surface.

Z = Distance of points from the edge of the berth near the water face towards the road.

3.1 PROCEDURE FOR CONDUCTING USPV [IS 516 (Part 5 / Sec 1): 2018]

Piezo-electric transducers of frequency 54 kHz were used for this test, which is in the range of 25 to 100 kHz and are found suitable for most applications as per the code stated above.

1. Zero time was first checked by keeping the faces of both the transducers pressed against each other after applying a coupling agent on them.
2. Checking of the zero adjustment is done after regular time intervals (say 2hrs).
3. The pulse transit time on the reference specimens provided by the manufacturer was checked by placing them longitudinally between the two transducers.
4. Preparation of the concrete surface was done by removing from it any dust

or plaster to make it smooth and even.

5. Coupling jelly was applied on the surface before taking the reading.
6. As all the measurements are taken by indirect method time was noted for each of the incremental distances for each of the observation points from the transmitter along a fixed line. These readings are utilized for constructing a time vs distance graph and inverse of the slope of the best straight line was taken as the velocity at that point. To this velocity a correction of 0.5km/s is applied for values ≥ 3km/s while producing the final report. Quality of concrete was assessed using **Table 3-1**given below.
7. No correction was required for reinforcements in the structure as points of tests were selected taking help of a rebar locator to avoid their vicinity.
8. Temperature of concrete surfaces was noted. But it was found to be below 30^0C. Hence no temperature correction was applied.
9. Quality of concrete is then judged in accordance to criteria given below.

Table 3-1 Velocity criterion for concrete quality grading as per IS 516 (Part 5 / Sec 1): 2018

Sl. No.	Indicative quality	UPV readings in km/s
1	Excellent	Above 4.40
2	Good	3.75 to 4.40
3	Doubtful	3.00 to 3.75
4	poor	Below 3.00

3.2 PROCEDURE FOR CONDUCTING CORE TEST IS 516(PART 4)-2018

1. Cores are not taken at the edges of concrete joints (at least 25mm away from the edges).
2. First of all the rebar locator was used to find the approximate location of the reinforcing bars below the concrete cover.
3. While taking the cores care was taken not to cut any reinforcement.
4. While preparing the specimens top 60mm and bottom 10% were trimmed and appropriate capping material (mortar with cement and sand in the proportion of 4:1, which after curing for 48 hours produced a compressive strength greater than 35MPa was applied at the ends to an average thickness of 1mm.

The equivalent cube compressive strength was calculated after applying the correction factor for l/d ratio, cylinder to cube conversion factor of 1.25, and an

additional factor as suggested by **IS 516(PART 4)-2018** to account for the size effect in case cores of diameter smaller than 100 mm are extracted. The equivalent cube compressive strength of concrete for the various core samples are given in the next chapter. The correction factors are presented in the **Table 3-2.**

Table 3-2 Correction Factors

Conditions	Factors
Core dia< 70mm	1.06
Equivalent cube strength	1.25

Specification for core diameter as per code is preferably between 100 & 150mm. But these diameters could not be taken because of congested spacing of reinforcements which is strictly denied by the Code (See clause 5.9). Code also specifies for smaller diameters with correction factors stated above**.** Thediameter of the cores was never taken less than 60mm which is 3 times the nominal size of aggregates.

3.3 PROCEDURE FOR CARBONATION TEST [IS 516 (Part 5/Sec 3):2021]

1. Core surface was cleared of dust and loose particles
2. Surface of the cores were sprayed with indicator solution (1% solution of phenolphthalein in ethanol).
3. Care was taken to avoid formation of flow channels on the test surface.
4. Measurement was taken soon after the colour got stabilized.
5. As the depth of carbonation front around the periphery of the core was not uniform maximum depth was recorded in compliance with the code stated above.
6. Indelible ink was used to mark the number/ location of the cores for further tests of compression.

3.4 PROCEDURE FOR REBOUND HAMMER TEST [IS 516(part5/section4): 2020]

Impact energy of the hammer used is 2.25 Nm, which is suitable for normal weight concrete of reinforced structures as per the code stated above.

1. The instrument was first checked by impacting it on the testing anvil and rebound number provided by manufacturer was compared.
2. Before taking the test care was taken to see whether the surface is clean, dry and smooth.

3. The hammer was held at right angles to the surface where readings are taken.
4. More than 6 readings are taken at all points of observation and the average was taken as the index of hammer.
5. Direction of the hammer was noted and mentioned in the test report.

3.5 PROCEDURE FOR HALF-CELL TEST [ASTM C876 – 15]

1. Half-Cell test was not conducted close to the sites where carbonation has gone beyond the cover thickness.
2. Rebar was connected to the +ve terminal of the voltmeter.
3. Half – Cell was connected to the –ve terminal of the voltmeter.
4. Reading was taken.
5. Half-Cell was disconnected from the potentiometer.
6. Again the half-cell was connected with potentiometer.
7. Reading was taken
8. Difference between these 2 readings was< 10mv.
9. Preliminary clearing of the surface was done.
10. Half-cell on concrete surface was kept and the reading were observed for 5 minute. If there is a fluctuation of more than 20mv, the surface was wetted either by spraying liquid detergent or by placing a sponge immersed in liquid detergent.
11. After wetting the surface reading was again observed for 5 minutes.
12. Care was taken to see that wetting does not cause any small pool of water on the surface.
13. No a/c power supply was there near the testing locations.
14. The average temperature of the half-cell during the test was taken for application of temperature correction (= -0.00091v /0C beyond 27.7 0C)
15. Co-ordinates of the points on the structure where test was conducted were taken.
16. Half-cell was placed directly on the concrete surface above the bars.
17. Projected bars were scrapped before taking the reading.

CHAPTER 4
VISUAL OBSERVATION

Visual inspection of the structural elements like diaphragm walls, fender blocks and deck slabs of the berth were carried out to assess distressed parts and to fix up suitable positions for conducting the tests(Ref. to **Figure 4-1 to Figure 4-7**).

Figure 4-1 Overall View of Haldia Dock Complex (HDC)

Figure 4-2 Distress View of Berth 10 Haldia Dock Complex (HDC)

Figure 4-3 Distress View of Berth 10 Haldia Dock Complex (HDC)

Figure 4-4 Fender block (Berth no. 10 – HDC)

Figure 4-5 Distress view (Berth no. 10 – HDC)

Figure 4-6 Distress view (Berth no. 10 – HDC)

Figure 4-7 Distress view (Berth no. 10 – HDC)

The following are typical distresses noticed in Berth 10.

a) Spalling of concrete and reinforcement corrosion in the corbels and walls of the berth **(Figure 4-2)**.

b) A portion of deck slab completely damaged **(Figure 4-3)**.

c) Falling of cover concrete and corrosion of rebars in the fender bases **(Figure 4-3)**.

d) Vegetation growth on the RC corbels, spalling of concrete, opening and rusting of rebars in the fender base was found in some portions of berth 10 **(Figure 4-4)**

e) Damaged portion of the top of the fender base was noticed in berth10**(Figure 4-5)**

f) Spalling of concrete and exposed rebar was noticed in the diaphragm wall of berth 10 **(Figure 4-6)**.

g) Damage was observed in the parapet wall and steps in one part of the diaphragm wall **(Figure 4-7)**.

h) Distress was noticed in the fender base to the extent of fender getting displaced and rotated in one of the monolith **(Figure 4-7)**.

CHAPTER 5
INVESTIGATION AT SITE

The following tests have been conducted to assess the quality of concrete of the RCC structural elements of the berths, detailed procedure or working guide lines of which are given in chapter 3.

1. Ultrasonic Pulse Velocity (UPV) Test
2. Core Test
3. Carbonation Test
4. Rebound hammer test
5. Half-Cell Potential Test
6. Determination of Chloride, sulphate, pH and cement content. from drilled samples

5.1 ULTRASONIC PULSE VELOCITY TEST

To assess the health condition of existing concrete, the ultrasonic pulse velocity test (which is a non-destructive test), have been conducted. It measures the velocity of the ultrasonic pulse of a particular frequency through the concrete medium (ref. to**Figure 5-1**). The instrument provides the travelling time and pulse velocity of the ultrasonic wave from transmitting transducer to receiving transducer through the concrete medium. The pulse velocity value indicates the quality of the concrete. It also indicates existence of any cracks, voids, and other imperfections. Indirect test method has been adopted in accordance with IS 516-part 5-2018 taking care of the necessary corrections, at all the pre-selected points on the structural elements. The coordinates of the test points with respect to a benchmark have been recorded and provided in the drawing attached.

Figure 5-1 Typical Ultrasonic pulse velocity test

Table 5-1 Result of the Ultrasonic Pulse Velocity Test

Test No.	Location (x, y, z) m	Member	Time (mili. sec)	Distance of Points from the transmitter in mm	Pulse Velocity (km/sec)	Velocity obtained from best straight line(km/sec)

5.2 CORE EXTRACTION FROM EXISTING STRUCTURAL ELEMENTS

Concrete core samples have been extracted from selected RCC structural elements of the berth (refer to**Figure 5-2**). The coordinates of the core extraction point with respect to a benchmark point have been recorded and furnished in the drawing. Carbonation test was done immediately after extraction of the core samples Proper shape of the core has been achieved after cutting and grinding and then UPV tests have been conducted on these extracted cores results of which are furnished in the

Table 5-2. The compressive strength of these cylindrical cores specimens are tested using a computerized compression testing machine. Improper cores are rejected based on failure pattern (See Appendix-3) and new ones were extracted. The equivalent cube compressive strengths have been calculated after applying the correction factors listed in **Table 3-2**. The equivalent cube compressive strength of concrete for the different locations are given in**Table 5-3**.

Figure 5-2 Typical Core extraction and Carbonation test

* Test is Conducted as per guideline of IS-516 (Part-4), 2018							
*Height, Diameter and Area of all the cores are 138mm, 69mm and 3739.28mm2							

respectively.

Core 6 was used only for carbonation test.

5.3 REBOUND HAMMER TEST

Rebound hammer tests have been conducted to have an approximate value of the compressive strength of concrete at the different locations (where UPV tests are conducted) on the structure elements (ref. to **Figure 5-3**). The coordinates of locations with respect to a benchmark location have been recorded and furnished on the drawing attached. The tests were conducted in compliance with the guidelines of IS516 (part5/section4) 2020.

Figure 5-3 Typical Rebound hammer test

Here average of the RH values of 10 points in the vicinity of the test location is taken and corresponding equivalent cube strength is obtained from the manual of the instrument. However, this manual/ graph showing relationship between the hammer number and the concrete strength is used only to show indication of relative concrete strength of test points of the structure.

Table 5-4: Rebound Hammer Test Result

Rebound Hammer Test Result

Abbreviation Used:

H: Horizontal, VU: Vertical Upward, VD: Vertical Downward

5.4 HALF-CELL POTENTIAL TEST

This method indicates electrical half-cell potential of reinforcing steel in concrete for the purpose of determining the corrosion activity of the reinforcing steel. A Copper sulphate (Cu/CuSO4) electrode (reference electrode) was used to measure the half-cell potential. Half-cell potentiometer works on the principle of measuring voltage in the circuit of reinforcement and cupper in Copper Sulphate Half-Cell. Locations where carbonation has penetrated beyond the cover were suitably avoided. The coordinates of the locations with respect to a bench mark location have been recorded and provided along with the results in the **Table 5-5**. Average of the values on four points at different distances of the rebar is shown in the **Table 5-5**. The tests were conducted in compliance with the guidelines of ASTM C-876-15. (Ref. to**Figure 5-4**).

Figure 5-4 Typical Half-cell Potentiometer test

Table 5-5 Half-Cell Potentiometer Test Result

HALF-CELL POTENTIOMETER TEST RESULT

A17	74.00m, 0m, -24.40m	Deck Slab	-234	-256	-276	-301	-266.75

The ASTM criteria for corrosion of steel in concrete for copper / copper sulphate Half -Cell are as follows.

Potential in millivolt (mV)	> -200 mV	-200mV to -350mV	-350mV to -500mV	≤-500mV
Probability of steel corrosion	Low (10% risk of corrosion)	Intermediate corrosion risk	High (More than 90% risk of corrosion)	Severe corrosion

5.5 CHEMICAL ANALYSIS OF DRILLED SAMPLES

Concrete samples in powder form have been collected from 05 locations of the berths using a drilling machine. These samples were collected for chemical analysis of concrete to check the presence of aggressive chemical agents. Determination of chlorides has been done as per IS14959 (Part 2)-2001. Determination of sulphates has been done as per BS1881 (Part 2)-1988.

5.5.1 Determination of the chloride and sulphate ions

The Mohr or Fajans method allow direct determination of chloride content in a concrete sample. The principle of the method is the reaction of precipitation from a

solution containing Cl− ions of sediment (AgCl) using a silver nitrate solution (AgNO3) of an exactly known concentration (IS14959(Part 2): 2001)

To determine the content of sulphate ions in the concrete sample, a typical chemical laboratory test the gravimetric method is used. The determination is based on the precipitation of sulphates from the concrete in acidic solution (HCl), using barium chloride (BaCl2). Then, the hardly soluble barium sulphate (BaSO4) is precipitated, which after roasting is weighed and converted in to the content of SO42− ions (BS 1881:(Part2): 1988).

5.5.2 Determination of the pH value

This method is very precise and pH-meter is used. The pH value is measured from water obtained after the treatment of the crushed concrete sample in boiling water. The weight ratio is considered 1 part concrete to 10 parts water.

Table 5-6 Test result of pH, Content of Chloride and Sulphate in concrete

Berth Name	Location	pH	Chloride Content (Kg/m3)	Sulphate content (%)	Remarks
Berth 10	1	10.21	0.355	2.17	Maximum Chloride content in concrete shall not exceed 0.6 Kg/ m3 as per IS: 456-2000 Sulphate content in concrete Shall not exceed 4% by mass of the cement as per IS:456-2000.
	2	10.05	0.710	2.01	
	3	10.14	0.540	2.87	
	4	9.98	0.525	1.85	
	5	10.06	0.568	2.01	
	6	10.48	0.327	2.45	

5.5.3 Determination of cement content in concrete

2 gm. of sample is mixed with hot water in a beaker of 250 ml capacity and stirred so that no trace of sample sticks to the beaker wall. It is then mixed with 100 ml of 3.3N HCl, which is decanted through an ignited and weighed Gooch crucible. The residue is added with 75 ml of 1N NaOH. The solution is warmed and filtered repeatedly. Now the filtrate contains silica in the form of silisic acid. Percentage of silica present in the sample is obtained by treatment with HF and sulphuric acid as per appendix of IS 269-1967. Percentage of cement is found by dividing the percentage of silica by 0.214.

Table 5-7 Cement content in percentage (%) by weight of total concrete

Location	Sample Number	Cement content in percentage (%) by weight of total concrete
B-10	Core – A1	16.2
B-10	Core – A2	16.7
B-10	Core – A3	17.0
B-10	Core – A4	16.5
B-10	Core – A5	16.7
B-10	Core – A6	16.5

5.6 CONDITION ASSESSMENT

After completion of the tests the results were evaluated and condition of the structural elements are analyzed.

A. Analysis of USPV results:

USPV was measured in 20 locations. Out of these 7 were conducted on fenders, 2 on diaphragm walls of monoliths, 4 on columns of monoliths, 7 on the deck slab of berth10.Quality of concrete in 6 fender locations of berth10 is poor whereas only in one location quality is doubtful according to IS 516. Of the 7 deck slab locations 1 is unreliable and 6 show poor quality. Quality of concrete in all 4 columns is poor. Concrete taken from 1locations in the monolith wall of the berth is also showing doubtful quality according to the USPV results.

It is observed from the straight lines of best fit drawn for the USPV values (See Appendix-4) that at Test point 3 (x = 131.5 m) there is a discontinuity (Time decreases with distance between 150 mm and 200mm) indicating surface layer of inferior quality and hence the value found is not reliable.

After discarding this value the average of the rest measurements is found. As USPV values in 4 fender bases (With x-coordinates = 47.2m, 153m, 175m & 209m) are less by more than 10% of the average USPV value, presence of internal flaws or micro-cracks is doubted in these locations.

B. Analysis of Carbonation Test Results

Carbonation test on core samples taken from 3 fenders of the Berth was carried out. In all these depths of carbon penetration show a depth of more than 20 mm out of which the highest being 25mm, which is also the highest of the 6 carbonation tests in the berth. Two samples taken from the monolith wall show a value of carbonation depth less than 20mm. Carbonation depth in the sample taken from the deck slab shows the lowest value, which is equal to 15 mm only.

Though carbon penetration cannot react with concrete when relative humidity is

less than 50%, risk of corrosion due to carbon reaction increases when relative humidity is very high. Relative humidity even rises to 98% in rainy season in this region. This tendency of corrosion is well marked in the half cell potential tests conducted at these locations.

Quality of concrete in 2 samples is found to be doubtful and in the rest 4 it is poor as seen from the UPV values.

C. Analysis of Core Compression Test Results

Photos of the failure pattern of all cores are shown in Appendix-3. Failure lines are found to be all round the periphery of the cores and hence can be accepted as satisfactory.

Values of compressive strength of 3 core samples taken from the fenders vary from 21 to 32 MPa. This value for the two samples of the monolith wall varies from 24 to 26 MPa but that of the core from deck slab is as less as 13 MPa only.

Analysis to ensure acceptability of core results and ascertaining the grade of concrete was carried out in accordance with clause B.2.5-1 of IS 516(Part 4):2018 only for the vertical face for the 5 cores taken from there. The average compressive strength of these 5 cores =27.06 MPa. Specified compressive strength (B-2 concrete) =28 MPa. 27.06 MPa is not less than 0.85× 28 MPa. None of the individual values is less than 0.75× 28 MPa. Hence concrete in the fender conforms to grade B-2 and the core results are satisfactory. However this analysis could not be taken up for the deck slab as a minimum number of 3 cores had not been taken from there. Neither the core result of deck slab can be combined with those of fenders owing to the difference of thickness in these two structural components. Construction techniques adopted in these parts of the berth are also not same.

D. Analysis of Rebound Hammer Test Results

Rebound hammer test was conducted on 20 locations comprising of 7 on fenders, 7 on deck slabs and 6 on the monoliths (2 on walls + 4 on columns).

Out of the 7 cases the value in one fender is below 30 MPa and in the remaining 6 cases it is higher. Values of rebound hammer tests on the deck slab varies from 16 to 37 MPa.

All the 4 rebound hammer results of the columns are above 30 MPa. Two rebound hammer tests on the monolith wall give values of 28 and 30 MPa

E. Analysis of Half-Cell Test Results

1. Half–cell test was conducted in 17 locations of the berth out of which 2 locations are at the beam soffits/corbels of the monolith, which show intermediate risk of corrosion at the time of measurement.
2. Two points of the deck slab show intermediate risk of corrosion.
3. Out of 4 locations on the monolith diaphragm wall 1 shows high risk of corrosion and 3 show intermediate risk of corrosion at the time of measurement.
4. Out of the 9 fender locations four shows high risk of corrosion, while the rest 5 shows intermediate risk of corrosion.

F. Analysis of Chemical Test Results

1. pH value of concrete sampled from various locations of the berth is between 9.98 to 10.48, which indicates a reduction in alkalinity.
2. Sulphate contents are well within limits. But chloride content in one sample is above the permissible limit. As there is drop in alkalinity this amount of chloride concentration can induce corrosion.

In this respect special protection need be given to the entire berth in terms of providing adequate cover.

3. Cement content varies from 16.2 to 17 which, is in compliance with the value stated by the port authority, but because of carbon penetration, reduction of alkalinity and high percentage of relative humidity quality of concrete has been deteriorated and high risk of corrosion has occurred in some places.

5.7 RESIDUAL LIFE CALCULATION

This calculation is based on the concept of terming the structure unserviceable when its cover to reinforcement at the critical section is completely damaged. Service life of a RCC structure can be segregated into 2 parts:

i) Corrosion initiation and
ii) Corrosion propagation

Duration of the first one is from the day of end of curing to destruction of passive film around the rebars by ingress of carbonation and chlorides and that of the 2nd part is from the beginning of corrosion to expansion of rust leading to crack propagation and falling of concrete cover. Thus

$T_s = T_{IN} + T_P$, Where

T_s = Service life

T_{IN} = Corrosion initiation period in years

T_P = Corrosion propagation period in years

Calculation of time required for corrosion initiation due to chloride penetration requires data on chloride concentration on concrete surface, chloride concentration at a particular depth, chloride diffusion rate among others. As tests to extract these data was out of scope, corrosion initiation period due to carbonation is only calculated here.

Factors affecting corrosion initiation due to carbonation

1. **Depth of carbonation**
2. **Allowable limit of corrosion percentage of reinforcement**

- This value depends on the method of designing the structure.
- In working stress method of design, it varies from 75 to 85 as has been deduced from the factor of safety given in IS456 1964. For berth no 10 (constructed in 1977), minimum value has been taken as 75%.

3. **Annual average relative humidity percentage** (r=75).
4. **Cover depth**

Berth 10 consists of 16 monoliths separated by construction joints. Structurally they are not continuous and hence are treated here as individual elements. These may be subjected to

1. Crane load on deck slab
2. Points load of 60T/75T (horizontal) towards water face on any two bollards of a monolith.
3. Soil pressure acting horizontally towards the water face on the back monolith wall
4. Weight of monolith

Stress in any monolith of Berth10 can be computed by subjecting it to a two-dimensional structural analysis, because the major loading pattern (except the crane load) and geometric cross-section remain almost uniform along its length. Hence any section of a monolith can be treated as a critical section where the crane stands for unloading operation. Therefore, the critical section on the berth can occur at the point where the value of carbonation penetration is highest.

Here are presented the steps in sequence for calculation of residual life **[5]**

Step 1.

Calculate the effective carbonation depth at the critical section.

X= X1 + X 2 ---------- (1)

Where X = Effective carbonation depth in mm

X1 = Carbonation depth in mm obtained from phenolphthalein test

Value of X1 = 25 mm as obtained from the result table, which is maximum.

X 2 = Depth decided on corrosion threshold limit. This is 3.6 mm to 8.3 mm deeper than the carbonation depth obtained from phenolphthalein test. Average of the above values is taken as 6 mm.

Hence X= 31 mm

Step 2.

Find the value of constant k

$X = k\ T^N$ ---------- (2)

Where k = constant, to be found from step 2

T = Time period in years elapsed for carbon penetration to occur upto X1. As construction was on year 1977, T can be taken as 45

N = A value related with humidity of the location.

=0.2536+0.01785r -0.0001623r2

=0.679

Hence k = 2.337

Step 3.

Calculate effective cover depth protecting the reinforcement.

$D= d - \alpha \times \sigma$ ---------- (3)

d = d1 – Crack depth

Where D = Effective Cover depth.

d1 = Minimum Design cover depth = 50 mm (Drawing No: H-C/G-9)

Cover depth does not remain same over the entire structure due to propagation of cracks at some places and due to non-uniform placing of rebars during

construction. Hence it is calculated statistically as follows.

α = Standard normal probability parameter which depends upon the maximum limit of reinforcement corrosion in percentage

=0.0544 (For corrosion limit = 75%)

σ = Standard deviation and is taken as 8 mm for a cover depth of about 50 mm

Using all the above values D = 49.564

Step 4.

Putting the value of D in Equation (1) in place of X, calculate T which is the initiation period.

This step gives corrosion initiation period as T_{IN} =89.664, say 89 years.

Propagation period (which depends upon many factors like Elastic modulus, Poisson's ratio, creep coefficient, split tensile strength of concrete and corrosion current in the reinforcement, etc.) varies from 5 to 10 years. Take $T_{P=}5$

Hence service life= T_{IN} +T_P =94

Hence residual life after adjusting the years since commissioning of the Berths is 49 years

5.8 STRENGTHENING MEASURES

Upon carrying out the different tests, it has emerged that the there has been deterioration of the concrete and the reinforcement of the RCC structures studied upon have been affected due to carbonation. Therefore, the strengthening measures to be adopted should ensure that there is no further deterioration of the concrete and the impact of further carbonation are adequately arrested to extend the service life beyond the current residual life of the RCC structures studied upon. In keeping with this, the strengthening measures have been suggested below.

USPV contour shows that (vide Appendix-2) quality of concrete in the vertical face of the berth covering the entire length (except a small triangular patch at the left-hand top corner) has deteriorated. In addition to that the results of HCP contour (vide Appendix-2) show that the probability of corrosion is high which is required to be arrested. In view of the above observations, the following measures are suggested to remedy the issues noted with respect to quality of concrete and reinforcement.

Rehabilitation measures therefore have been suggested separately for the vertical and overhead surfaces of the Diaphragm Wall (entire stretch of 218 m up to 1.8 m depth) and the Deck Slab in Chapter - 7.

Further the damaged steps at some places of the monolith should be completely dismantled and be newly constructed by dislodging remnant concrete from these elements and attaching new reinforcements to the old ones. Damaged portion of the deck slab near the water face or the damaged corbels of monolith should be dismantled and recast.

Disoriented fenders should be pulled out and be reset onto their bases after making the required amount of repair.

Vegetation growth or weeds wherever found should be uprooted completely if possible by hand pulling or by dislodging the concrete up to their roots and then by pulling them out. Necessary resurfacing should be provided by adopting any of the methodology appropriate to the location given in Chapter - 7.

For the Monolith/Diaphragm Wall (entire stretch of 218m up to 1.8m depth)

Distressed regions of the wall, quay and fender bases suffering major reinforcement loss due to corrosion may be rehabilitated by adopting methodology-1 given in Chapter - 7 after erecting proper scaffolding above the water surface by use of suspended/ welded supports from the deck slab and pontoons on water. This scaffold should be able to withstand the jerks and movements arising out of the gunning operation of shortcreting to be taken up for providing extra cover to the reinforcements. Scaffolding should provide suitable positions to orient the gun/nozzle in all possible angles so that the rebound should fall clear off the finished shortcrete work. In this method new reinforcements may have to be wired with existing reinforcements or dowel bars to compensate for the loss of rebar area already occurred.

For the remaining portions where reinforcement has not suffered major loss new reinforcement need not be provided. After erecting the scaffold steps suggested in methodology-2 of Chapter - 7 should be followed for applying guniting or ready to use spray mortar.

Plasticizers may be mixed with the concrete of shortcrete to improve its pumpability. Pre-soaked coarse aggregates may be used to reduce amount of water required for mixing the material of shortcrete and to increase its adhesiveness with

old substrate. For rapid pre-soaking technique of Patent (Application No.201841004777) published in Indian Patent Journal may be referred.

CHAPTER 6

OVERALL OBSERVATION AND RECOMMENDATIONS

Health assessment, prediction of service life and measures for rehabilitation of the distressed portions of the structural elements of the berths are all based on the evaluation of the NDT results and visual inspection of the site.

Non-destructive tests and Chemical tests are conducted as per relevant code recommendation and results are furnished in this report from which the following observations may be made.

6.1 OBSERVATIONS:

1) pH of concrete is on the lower side compared to conventional new concrete.
2) Chloride content is more than the permissible limits as per IS456 at one place and in majority of the cases it is almost close to the permissible limit.
3) Sulphate content is within the permissible limits as per IS 456.
4) Maximum value of carbonation depth is 25 mm, which is in one of the fender base.
5) Reduction in alkalinity makes reinforcement susceptible to corrosion even with little chloride contents. This tendency is observed in the HCP values at almost all locations of the monolith wall. In view of this remedial steps as suggested should be taken on an urgent basis.
6) Analysis of concrete core results in accordance with the acceptance criteria of the relevant code suggests that compressive strength of concrete used in the berth conforms to B 2 class of concrete, which was the type specified in the drawings of the berth.
7) USPV values in most portions of the structural elements of the vertical face are either doubtful or poor.
8) Remaining service life of Berth-10 is found to be 49 years approximately.
9) With Implementation of the recommended rehabilitation measures, the service is expected to enhance by another 50 years subjected to regular maintenance

6.2 RECOMMENDATIONS

Overhead and vertical face repair have been suggested for the monolith wall and fender base of the berth under two categories considering the deterioration stage of the reinforcements with application of ready to use polymer modified fiber reinforced spray mortar or shortcrete.

CHAPTER 7

METHODS FOR REHABILITATION

Methodology-1

- The distressed concrete shall be chipped and removed without damaging the rebar and the rear side of the steel bar shall be exposed by hand chiseling. Surface should be cleaned and roughened. Dust, rust algae, plaster and laitance should be removed and aggregates should be exposed by grit blasting.
- Holes of at least 75 mm depth (long) and 12 mm diameter should be drilled into the vertical face with staggered spacing along horizontal and vertical distances taking care not to damage the existing steel reinforcements in the structural element. Clean the holes with a jet of compressed air and remove the loose dust particles thoroughly.
- Use chemical resin type capsules (Lokfix S manufactured by M/s Fosroc Chemicals Pvt. Ltd. or Equivalent) for fixing dowel bars or shear connectors into the holes.
- Adopt at least 10-mm dia. HYSD bars bent into L shape as shear connectors. Insert the horizontal leg of the L into the wall and project the vertical leg out.
- Prepare the structural elements surface suitably using an epoxy-based bond coat like Nitobond EP (manufactured by M/s Fosroc Chemicals or equivalent), so that the spray mortar may bond well with the existing substrate.
- Erect proper form-work made of plywood sheet true to the line and dimension and brace it strongly to resist vibration due to shortcrete.
- The additional reinforcement may be connected firmly to the shear connectors to resist any of its possible displacement due to vibration during the guniting operation.
- Clean the reinforcement and apply the zinc based anticorrosive coating like Nitozinc primer manufactured by M/s Fosroc Chemicals or equivalent.
- Provide Galvanic protection system like Galvashield XPI manufactured by M/s Vector Technology or equivalent. Pockets may be made to encase the anode systems with spacing in accordance with manufacturer's guideline.
- Anode to steel and steel to steel continuity must be ensured by proper connection and a follow-up testing prior to application of any repair product.
- A polymer modified, fiber reinforced, ready to use Spray Mortar like Renderoc SP40 ((28 days air cured cubes of 70mm having Compressive strength >45 MPa

obtained at a water powder ratio of 0.18) or equivalent should be applied to provide a cover depth of 75mm for arresting the carbon and chloride salts. Alternatively shortcreting/ guniting can also be performed in accordance with IS 9012-1978. However, in either case the spray operation should be complete within the maximum overlay time of the epoxy bonding agent.

Methodology-2

- The distressed concrete shall be chipped and removed without damaging the rebar and the rear side of the steel bar shall be exposed by hand chiseling. Surface should be cleaned and roughened. Dust, rust algae, plaster and laitance should be removed and aggregates should be exposed by grit blasting.
- Clean the reinforcement and apply the metallic based (preferably zinc based) anticorrosive coating like Nitozinc primer manufactured by M/s Fosroc Chemicals or equivalent.
- Prepare the structural elements surface suitably using an epoxy-based bond coat, so that the spray mortar may bond well with the existing/old concrete. Manufacturer's instructions/specifications are to be followed for the epoxy bond coat like Nitobond EP (manufactured by M/s Fosroc Chemicals or equivalent).
- Erect proper form-work made of plywood sheet true to the line and dimension and brace it strongly to resist vibration due to shortcrete operation.
- The Spray Mortar like Renderoc SP40 should be applied to provide a cover depth of 75mm for arresting the carbon and chloride salts.
- Alternatively pre-wet the surface or substrate for several hours before applying shortcrete on it.
- Guniting operation should be carried out in accordance to the provisions of IS 9012-1978. The proportion of cement, sand, coarse aggregates and percentage of water in the mix depends on a number of factors like type of cement, nominal size of coarse aggregates, type of mix (wet or dry) etc which may be ascertained after conducting tests such as compression, bending, air content, durability and permeability.

TABLE-3: PLATE LOAD TEST RESULTS (PLT-06)

Load (T)	Average Settlement (mm)	Cumulative Settlement (mm)
1.25	1.920	1.920
2.50	3.230	5.150
3.75	2.995	8.145
5.00	5.360	13.505
6.25	6.345	19.850
7.50	6.610	26.460

Calculations:

From Load Settlement curve:

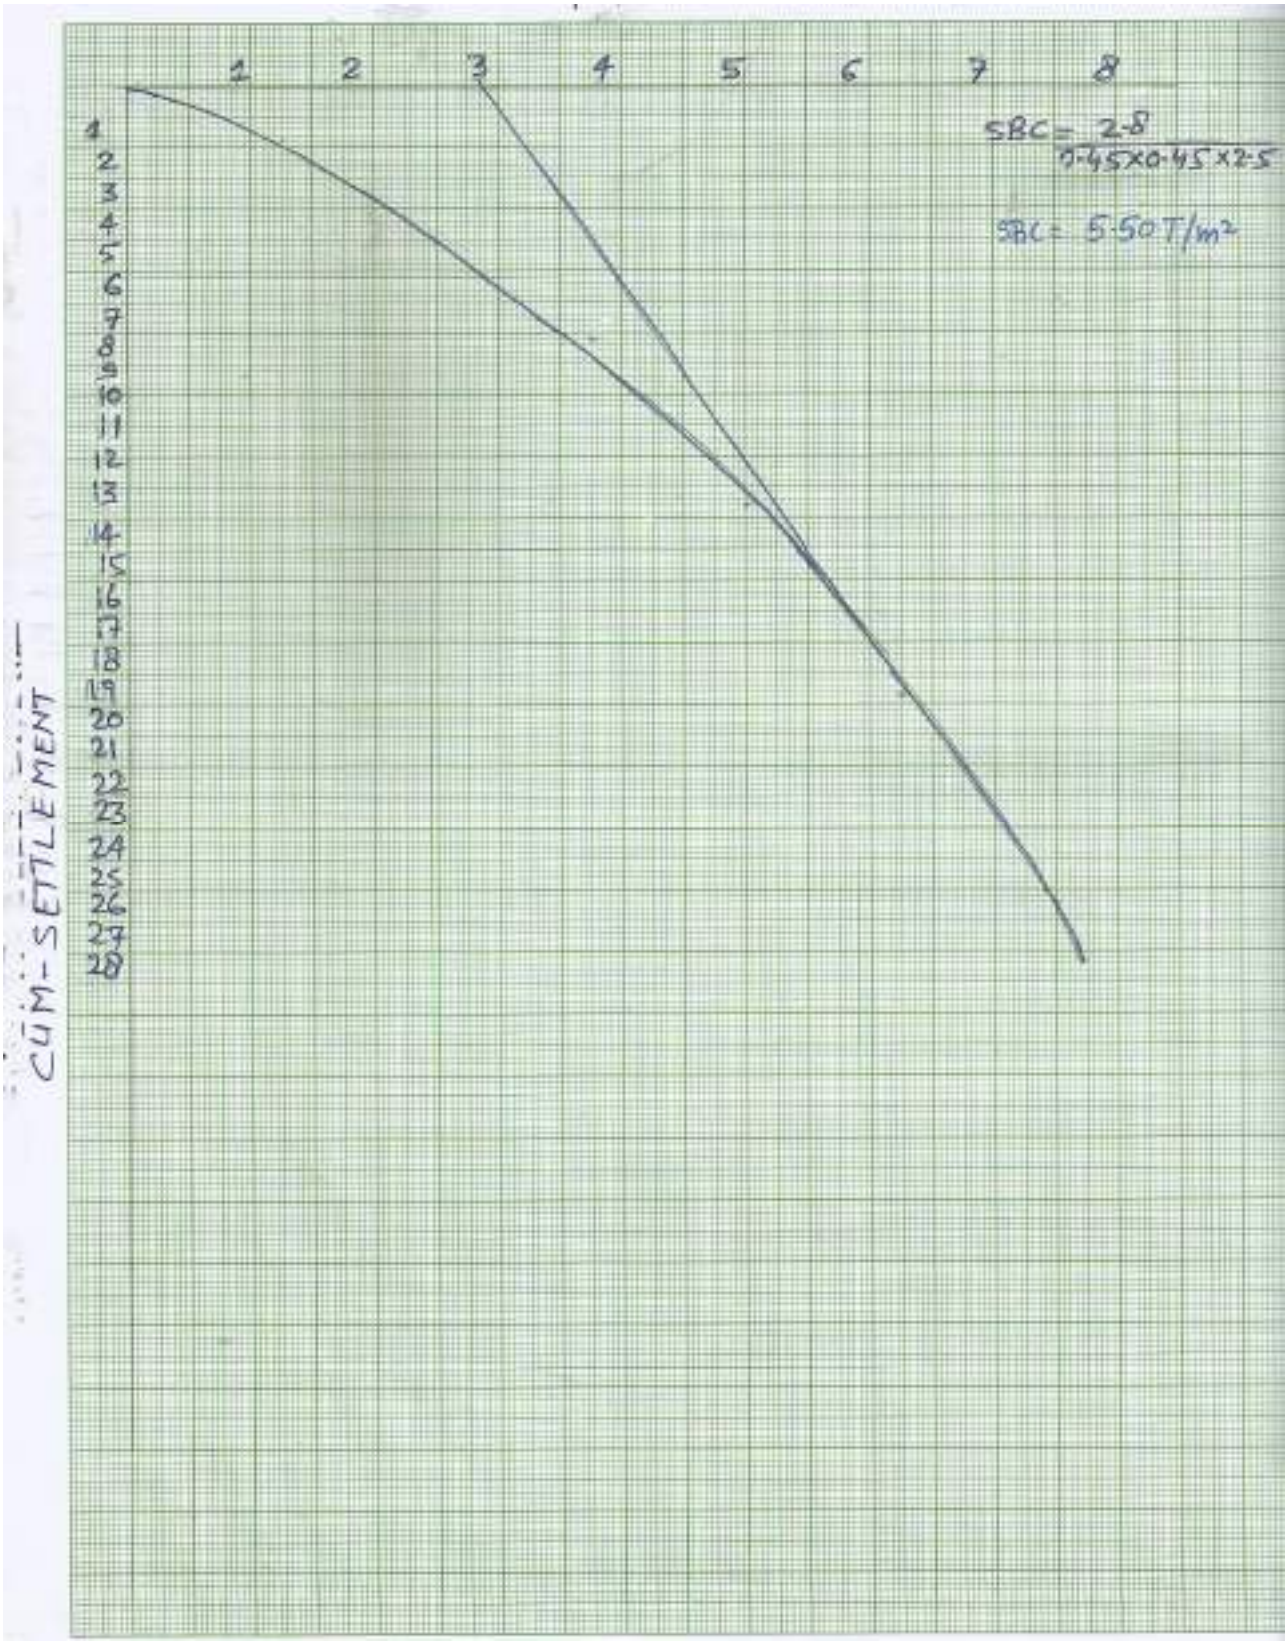

Ultimate Load: 2.80 T

Ultimate Bearing Capacity: 2.80/ (.45x.45) =13.82 T/m^2

Factor of Safety = 2.5

Safe bearing capacity: 13.82/2.5 = 5.52 T/m^2

LOAD VS CUMULATIVE SETTLEMENT CURVE

APPENDIX 'B'
TABLE-5: MODULUS OF SUB GRADE TEST RESULT

FIELD INVESTIGATION METHOD:

A circular test plate 75cm dia metre was used as a model for the prototype foundation. The plate was placed at 1.0 m below ground and subjected to incremental loading. Settlement at each increment of load was measured and load-settlement curves plotted. The modulus of sub grade reaction was calculated by

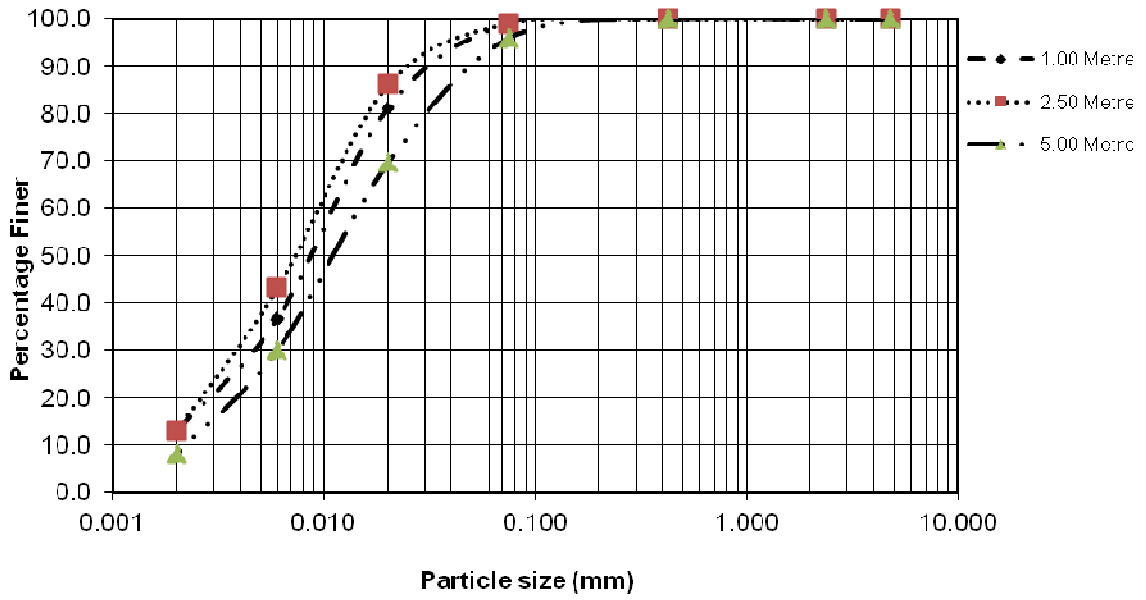

K=0.07/d MPa/cm

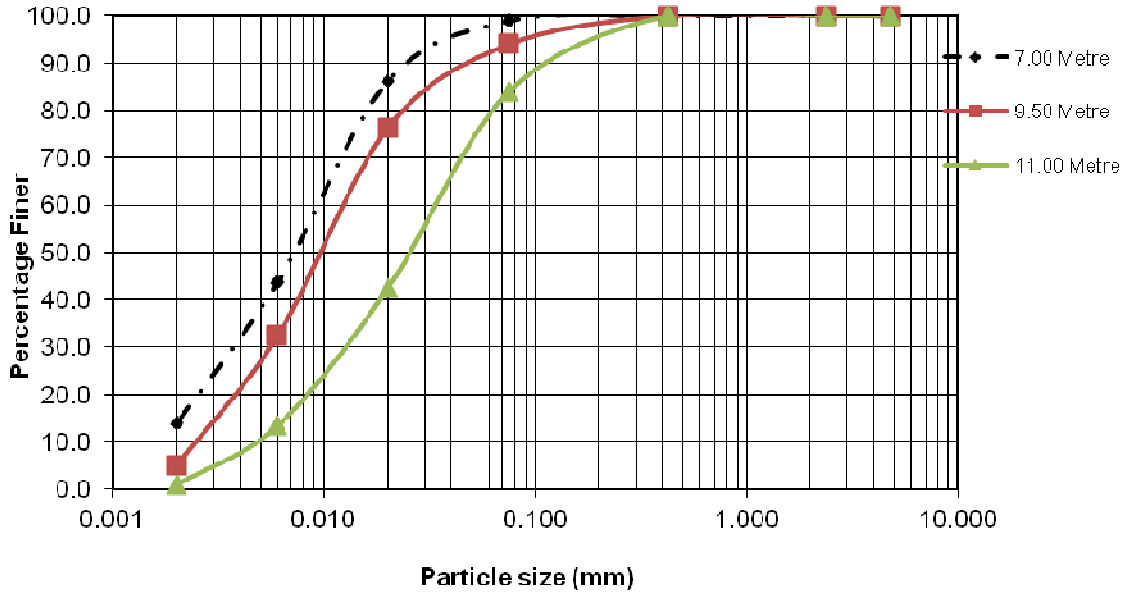

Where d is the deflection of plate on applying a load of 3.72 KN.

Test No.	Settlement (mm)	K (kN/m3)
k-1	6.10	11475
k-2	2.97	23609
k-3	5.45	12844
k-4	4.13	16970
k-5	2.92	24014
k-6	2.83	24735
k-7	1.82	38567
k-8	3.94	17789
