Guidelines of the Department of Disinvestment
(Refer Clause 1.2.1)

No. 6/4/2001-DD-II
Government of India
Department of
Disinvestment Block 14,
CGO Complex ***City .
Dated 13th July, 2001.

OFFICE MEMORANDUM

Sub: Guidelines for qualification of Bidders seeking to acquire stakes in Public Sector Enterprises through the process of disinvestment

Government has examined the issue of framing comprehensive and transparent guidelines defining the criteria for bidders interested in PSE-disinvestment so that the parties selected through competitive bidding could inspire public confidence. Earlier, criteria like net worth, experience etc. used to be prescribed. Based on experience and in consultation with concerned departments, Government has decided to prescribe the following additional criteria for the qualification/ disqualification of the parties seeking to acquire stakes in public sector enterprises through disinvestment:

- (a) In regard to matters other than the security and integrity of the country, any conviction by a Court of Law or indictment/ adverse order by a regulatory Authority that casts a doubt on the ability of the bidder to manage the public sector unit when it is disinvested, or which relates to a grave offence would constitute disqualification. Grave offence is defined to be of such a nature that it outrages the moral sense of the community. The decision in regard to the nature of the offence would be taken on case to case basis after considering the facts of the case and relevant legal principles, by the Government of India.
- (b) In regard to matters relating to the security and integrity of the country, any charge-sheet by an agency of the Government/ conviction by a Court of Law for an offence committed by the bidding party or by any sister concern of the bidding party would result in disqualification. The decision in regard to the relationship between the sister concerns would be taken, based on the relevant facts and after examining whether the two concerns are substantially controlled by the same person/ persons.
- (c) In both (a) and (b), disqualification shall continue for a period that Government deems appropriate.
- (d) Any entity, which is disqualified from participating in the disinvestment process, would not be allowed to remain associated with it or get associated merely because it has preferred an appeal against the order based on which it has been disqualified. The mere pendency of appeal will have no effect on the disqualification.
- (e) The disqualification criteria would come into effect immediately and would apply to all bidders for various disinvestment transactions, which have not been completed as yet.
- (f) Before disqualifying a concern, a Show Cause Notice why it should not be disqualified

would be issued to it and it would be given an opportunity to explain its position.

(g)

Henceforth, these criteria will be prescribed in the advertisements seeking Expression of Interest (EOI) from the interested parties. The interested parties would be required to provide the information on the above criteria, along with their Expressions of Interest (EOI). The bidders shall be required to provide with their EOI an undertaking to the effect that no investigation by a regulatory Authority is pending against them. In case any investigation is pending against the concern or its sister concern or against its CEO or any of its Directors/ Managers/ employees, full details of such investigation including the name of the investigating agency, the charge/ offence for which the investigation has been launched, name and *****Designation of persons against whom the investigation has been launched and other relevant information should be disclosed, to the satisfaction of the Government. For other criteria also, a similar undertaking shall be obtained along with EOI.

Under Secretary to the Government of India

PROJECT SITE

[Description of Project Site will be included here]

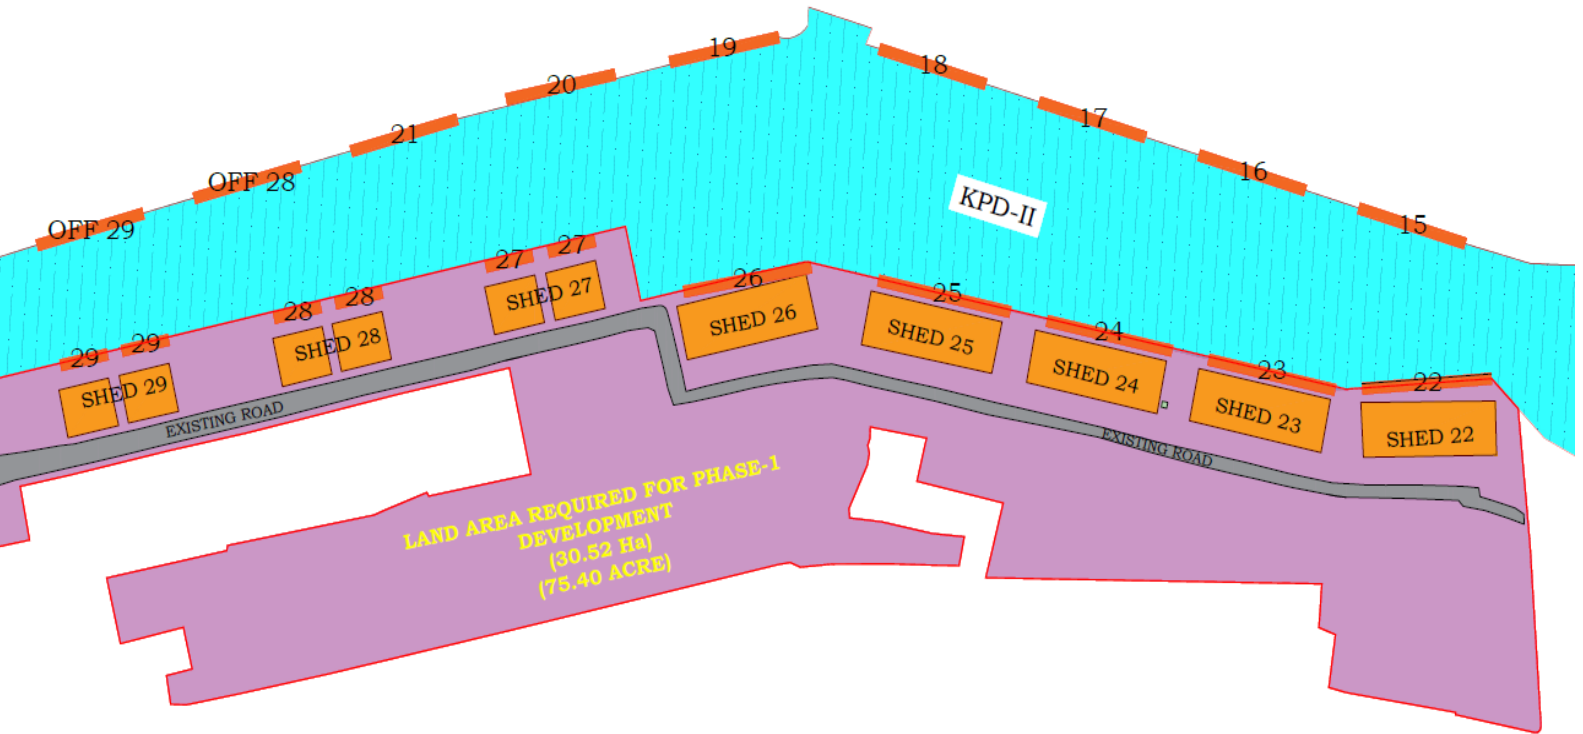

The Syama Prasad Mookerjee Port, Kolkata SMPK (Erstwhile Kolkata Port Trust) is the only riverine Major Port in India, located 223 km away from sea and accessible through the longest navigational channel amongst Major Ports of India and ideal choice for eastern gateway to India.

It has two dock systems, namely Kolkata Dock System at Kolkata and Haldia Dock Complex at Haldia. The location of both dock system is shown above figure. The Kolkata Dock System (KDS) has two docks viz. Kidderpore Dock (KPD) and Netaji Subhas Dock (NSD). The Kidderpore dock is further divided into two zones, namely KPD I and KPD II in an area of about 194 acres with the dock basin covering an area of 80 acres as shown in figure above. Taking into account the KPD II being strategically located, well connected with road, rail, waterways systems and equipped with extensive storage facilities, the Syama Prasad Mookerjee Port Authority (SMPA) desires to maximize the potential of KPD-II by developing it into a dynamic multi-modal terminal/ transportation hub serving as an effective distribution centre for its vast hinterland. An access to KPD II by a vessel involves a total piloting distance of 223 km, which includes 148 km of river navigation and 75 km of sea movement. On arrival at Kolkata, the vessel is required to navigate through navigation lock, a swing bridge and a bascule bridge to reach at KPD II. For KPD II, berth no. 15 to 21 are located on the western side and berth no. 22 to 29 are located on the eastern side of the dock. There is a shed (Shed 22 to 29) behind each existing berth (Berth 22 to 29). Currently, commodities such as pulses, fertilizers, gypsum, timber logs are handled at the existing berths. Presently, berth no. 27, 28 and 29 have railway connectivity whereas berth no. 22 to 26 have road transport for cargo evacuation

APPENDIX 14

PERFORMANCE STANDARDS

Performance Standards

1. Gross Berth Output

The parameter deals with the productivity of the terminal (Gross Berth Output) for different types of cargo. In case of dry and break-bulk cargo, the capability of the terminal (mechanization, method of handling) and parcel size will determine the Gross Berth Output. Higher terminal capability and greater parcel size will lead to high productivity.

The Gross Berth Output shall be calculated as the total cargo handled (either loaded/unloaded) from the ship during a month divided by the time spent by the ship at the terminal number of working days of ships in that month at that terminal. While determining the number of working days from the ship hours, the berth allowance of 4 hours shall be subtracted from the total hours.

~~In the case of containers, the crane rate shall be measured by dividing total number of TEUs lifted on/off from ships by the elapsed crane time. The elapsed crane time is the total allocated crane hours less operational and non-operational delays.~~

The indicative norms for Gross Berth Output for different categories of cargo are as follows:

Cargo Category	Indicative Norms
Mixed Dry bulk cargo (Fertilizer and Food grains)	
For terminals capable of handling more than 30,000 MT parcel size.	[12,500 T/day]
For terminals capable of handling up to 30,000 MT parcel size.	[7,500 T/day]

Mixed dry bulk cargo terminal handling B.F slag, Field spar, Limonite sand etc.	[7,500 T/day]
Break Bulk	
Steel and bagged cargo	[4000 T/day]
Others	[2500 T/day]

Weightage in case of a shortfall in meeting the prescribed performance standard - [70%]

2. Transit Storage Dwell Time:

(a) Deleted

(b) Bulk Cargo:

The Transit Storage Dwell Time for mixed dry bulk cargo/ shall be calculated, as half of average parcel size of above cargo vessels in a month divided by average disposal of cargo from the port per day as per the following methodology:

$$\text{Average disposal of Cargo per day (A)} = \frac{(\text{OB} + \text{Received/Dispatched} - \text{CB})}{\text{No. of days}}$$

OB = Opening Balance, CB = Closing Balance.

$$\text{Average Parcel Sizes (B)} = \frac{P1 + P2 + \dots + Pn}{(\text{no. of parcels})}$$

P1, P2Pn are parcel size of each vessel in a month.

$$\text{Transit Storage Time for Bulk Cargo} = 0.5 (B/A)$$

(c) Break-bulk cargo:

The Transit Storage Dwell Time of Break Bulk cargo shall be calculated in the same manner as calculated for container in the terminal. The Transit Storage Dwell Time for Break Bulk Cargo is the sum of time of each unit of cargo that remains in the Port in a month divided by the number of cargo units handled during

that month in the terminal. To further clarify, the time the break bulk cargo remains in the port will commence from the date and time of landing till the date and time of exit from the Port in case of import and for export from the date and time the cargo entered the Port area till the date and time of the shipment.

Transit Storage Dwell Time- Import			
c)	Break bulk	(at stack yard)	10 days after date of completion of vessel's discharging operation
Transit Storage Dwell Time- Export			
c)	Break bulk		10 days up to commencement of ship loading operation

Weightage in case of a shortfall in meeting the prescribed performance standard – 20%

3. Turnaround Time for receipt/delivery operation:

The Turnaround Time for receipt/delivery operation shall be the sum of time taken for loading/unloading of cargo divided by the number of trucks/trailers/rakes deployed, as the case may be, in a month. Further, in case the truck/trailer/rake does both unloading and loading operations on a single entry into the terminal, the time allocated shall be doubled for those trucks/trailers/rakes.

a. (i) Truck for conventional cargo (Single operation)	4 hours
(ii) Truck for conventional cargo (Double operation)	8 hours
b. (i) Trailer for container (single operation)	2 hours
(ii)Trailer for container (double operation)	4 hours
c. (i) Rake for ICD container (Single operation)	6 hours
(ii) Rake for ICD container (Double operation)	12 hours
d. (i) Rake for dry bulk cargo (Single operation)	10 hours
(ii) Rake for dry bulk cargo (Double operation)	18 hours

Weightage in case of a shortfall in meeting the prescribed performance standard -10% Performance

Evaluation and calculation of liquidated damages:

Performance evaluation shall be made on a quarterly review of the reports furnished by the Concessionaire and/or the records of the Concessionaire and/or by an enquiry by the Concessioneing Authority. The Concessionaire shall be liable to pay liquidated damages determined at the rate of [1% of the Tariff collected and other revenues derived from the project in the respective quarter for every shortfall of 10%] in the average performance which shall be assessed in the following manner.

Each Performance Standard is calculated as an average in the manner indicated above. The actual average performance vis-à-vis a standard will be evaluated against the prescribed standard. The shortfall will be computed as a percentage of the prescribed standard. The shortfall in respect of each performance standard will have a weightage assigned to it. The overall shortfall in average performance shall be assessed as the aggregate of the weighted shortfalls in respect of each of the performance standards. For example, if there is a shortfall in Gross Berth Output by x%, Transit Storage Dwell Time by y% and Turn round time for receipt/delivery operations by z% and the weightage assigned to such shortfalls is 0.7, 0.2 and 0.1 respectively, then the overall shortfall in average performance will be $(0.7x + 0.2 y + 0.1 z)\%$.
