- (c) Within 15 (fifteen) days of the receipt of the Drawings, the Independent Engineer shall review the same and convey its observations to the Concessionaire with particular reference to their conformity or otherwise with the Scope of the Project and the Specifications and Standards. The Concessionaire shall not be obliged to await the observations of the Independent Engineer on the Drawings submitted pursuant hereto beyond the said 15 (fifteen) days period and may begin or continue Construction Works at its own discretion and risk;

- (d) If the aforesaid observations of the Independent Engineer indicate that the Drawings are not in conformity with the Scope of the Project or the Specifications and Standards, such Drawings shall be revised by the Concessionaire and resubmitted to the Independent Engineer for review. The Independent Engineer shall give its observations, if any, within 7 (seven) days of receipt of the revised Drawings;
- (e) No review and/or observation of the Independent Engineer and/or its failure to review and/or convey its observations on any Drawings shall relieve the Concessionaire of its obligations and liabilities under this Agreement in any manner nor shall the Independent Engineer or the Authority be liable for the same in any manner;
- (f) Without prejudice to the foregoing provisions of this Clause 12.3, the Concessionaire shall submit to the Authority for review and comments, its Drawings relating to alignment of the Project Highway, finished road level, location and layout of the Toll Plaza[s] and general arrangement drawings of major bridges, flyovers, tunnels and grade separators, together with such drawings as are consistent with the approved general arrangement drawings procured by the Authority in accordance with Clause 4.1.2(d), and the Authority shall have the right but not the obligation to undertake such review and provide its comments, if any, within 30 (thirty) days of the receipt of such Drawings. The provisions of this Clause 12.3 shall apply *mutatis mutandis* to the review and comments hereunder; and
- (g) Within 90 (ninety) days of the Project Completion Date, the Concessionaire shall furnish to the Authority and the Independent Engineer a complete set of as-built Drawings, in 2 (two) hard copies and in micro film form or in such other medium as may be acceptable to the Authority, reflecting the Project Highway as actually designed, engineered and constructed, including an as-built survey illustrating the layout of the Project Highway and setback lines, if any, of the buildings and structures forming part of Project Facilities.

12.4 Six-Laning of the Project Highway

- 12.4.1 On or after the Appointed Date, the Concessionaire shall undertake construction of Six-Laning as specified in Schedule-B and Schedule-C, and in conformity with the Specifications and Standards set forth in Schedule-D. The 1095th (one thousand and ninety fifth) day from the Appointed Date shall be the scheduled date for completion of Six-Laning, (the “**Scheduled Six-Laning Date**”) and the Concessionaire agrees and undertakes that Six-Laning shall be completed on or before the Scheduled Six-Laning Date.
- 12.4.2 The Concessionaire shall construct the Project Highway in accordance with the Project Completion Schedule set forth in Schedule-G. In the event that the Concessionaire fails to achieve any Project Milestone within a period of 90 (ninety) days from the date set forth for such Milestone in Schedule-G, unless such failure has occurred due to Force Majeure or for reasons solely attributable to the Authority, it shall pay Damages to the Authority in a sum

calculated at the rate of 0.1% (zero point one per cent) of the amount of Performance Security for delay of each day until such Milestone is achieved; provided that if any or all Project Milestones or the Scheduled Six-Laning Date are extended in accordance with the provisions of this Agreement, the dates set forth in Schedule-G shall be deemed to be modified accordingly and the provisions of this Agreement shall apply as if Schedule-G has been amended as above; provided further that in the event Project Completion Date is achieved on or before the Scheduled Six-Laning Date, the Damages paid under this Clause 12.4.2 shall be refunded by the Authority to the Concessionaire, but without any interest thereon. For the avoidance of doubt, it is agreed that recovery of Damages under this Clause 12.4.2 shall be without prejudice to the rights of the Authority under this Agreement, including the right of Termination thereof.

12.4.3 In the event that Six-Laning is not completed within 270 (two hundred and seventy) days from the Scheduled Six-Laning Date, unless the delay is on account of reasons solely attributable to the Authority or due to Force Majeure, the Authority shall be entitled to terminate this Agreement.

12.6 (Deleted)

12.7 Construction of service roads by the Authority

The Authority shall, at any time after the COD, require the Concessionaire to undertake construction of service roads on the Project Highway at the cost of the Authority as a Change of Scope. The Authority shall design such service roads, in consultation with the Concessionaire, to avoid revenue leakage at the designated Toll Plaza(s). Such construction of service roads shall be undertaken without causing undue disruption to traffic and upon its completion, the Concessionaire shall have the obligation to maintain the service roads in accordance with Good Industry Practice and regulate the use thereof in accordance with the provisions of this Agreement.

ARTICLE 13

MONITORING OF CONSTRUCTION

13.1 Monthly progress reports

During the Construction Period, the Concessionaire shall, no later than 7 (seven) days after the close of each month, furnish to the Authority, Lenders' Representative and the Independent Engineer, and upload on the Authority's designated portal/website, a monthly report on physical and financial progress of the Construction Works and shall promptly give such other relevant information including invoices of materials (i.e., steel, cement, bitumen and aggregates) as may be required by the Independent Engineer. The Concessionaire shall ensure that a functional location tracking system is installed in each construction vehicle and shall provide the Authority, through its central server, real-time records indicating the location and movement of all such vehicles, which shall include the following information:

- (i). Real- time location data of each construction vehicle.
- (ii). Timestamps indicating the start and end times of vehicle movements.
- (iii). Mileage covered by each vehicle.

The Concessionaire shall be responsible for ensuring the accuracy and integrity of the location tracking system data.

13.2 Inspection

During the Construction Period, the Independent Engineer shall inspect every kilometre of the Project Highway at least once a month duly supported by video recording captured using a drone or such other mechanism acceptable to the Authority and shall make a report of such inspection (the "**Inspection Report**") stating in reasonable detail the defects or deficiencies, if any, with particular reference to the Scope of the Project and Specifications and Standards. It shall send a copy of the Inspection Report along with the video recording to the Authority and the Concessionaire within 7 (seven) days of such inspection and the Independent Engineer shall also upload it on Authority's designated portal/website promptly and upon receipt thereof, the Concessionaire shall rectify and remedy the defects or deficiencies, if any, stated in the Inspection Report. Such inspection or submission of Inspection Report or video recording or lack thereof by the Independent Engineer shall not relieve or absolve the Concessionaire of its obligations and liabilities hereunder in any manner whatsoever. The Authority on a written request from the Lenders' Representative shall be obliged to provide a copy of such Inspection Report. The Authority reserves the right to host the video on its website for public viewing.

13.3 Tests

13.3.1 For determining that the Construction Works conform to the Specifications and Standards, the Independent Engineer shall require the Concessionaire to carry out or cause to be carried out tests, at such location, time and frequency and in such manner as may be specified by the Independent Engineer from time to time, in accordance with Good Industry Practice for quality assurance. The size of sample for such tests shall, to the extent possible, not exceed 10% (ten per cent) of the quantity and/or number of tests prescribed by IRC and/or MORTH for the construction works undertaken by the Authority through their contractors. The Concessionaire shall, with due diligence, carry out or cause to be carried out all the tests, at its own cost, in accordance with the instructions of the Independent Engineer and furnish the results thereof to the Independent Engineer and the Authority. Provided, however, that the Authority reserves the right to require certain tests to be undertaken by an independent agency, at its own cost, for the purpose of authenticating the results of the tests carried out or caused to be carried out by the Concessionaire; and in the event of any discrepancy, the results obtained from such independent agency shall be final and binding on the Parties. For the avoidance of doubt, the costs to be incurred on any Test which is undertaken for determining the rectification of any defect or deficiency in construction shall be borne solely by the Concessionaire.

13.3.2 In the event that results of any tests conducted under this Clause 13.3 establish any defects or deficiencies in the Construction Works, the Concessionaire shall carry out remedial measures and furnish a report to the Independent Engineer in this behalf. The Independent Engineer shall require the Concessionaire to carry out or cause to be carried out tests to determine that such remedial measures have brought the Construction Works into compliance with the Specifications and Standards, and the procedure set forth in this Clause 13.3 shall be repeated until such Construction Works conform to the Specifications and Standards. For the avoidance of doubt, it is agreed that tests pursuant to this Clause 13.3 shall be undertaken in addition to and independent of the tests that shall be carried out by the Concessionaire for its own quality assurance in accordance with Good Industry Practice. It is also agreed that a copy of the results of such tests shall be sent by the Concessionaire to the Independent Engineer forthwith.

13.4 Delays during construction

Without prejudice to the provisions of Clause 12.4.2, if the Concessionaire does not achieve any of the Project Milestones or the Independent Engineer shall have reasonably determined that the rate of progress of Construction Works is such that Six-Laning is not likely to be achieved by the Scheduled Six-Laning Date, it shall notify the Concessionaire to this effect, and the Concessionaire shall, within 15 (fifteen) days of such notice, inform the Independent Engineer in reasonable detail about the steps it proposes to take to expedite progress and submit a revised schedule as provided in accordance with Clause 12.1 (a) for achieving the Project Milestones or Project Completion Date, as the case may be.

Further, if the Independent Engineer reports that the progress achieved by the Concessionaire over any continuous period of three months is less than 75% of the revised schedule, the Authority may, without prejudice to the rights of the Authority under this Agreement, invoke termination as per Clause 37.1.1 (x) of this Agreement.

13.5 Suspension of unsafe Construction Works

- 13.5.1 Upon recommendation of the Independent Engineer to this effect, the Authority may by notice require the Concessionaire to suspend forthwith the whole or any part of the Construction Works if, in the reasonable opinion of the Authority, such work threatens the safety of the Users and pedestrians.
- 13.5.2 The Concessionaire shall, pursuant to the notice under Clause 13.5.1, suspend the Construction Works or any part thereof for such time and in such manner as may be specified by the Authority and thereupon carry out remedial measures to secure the safety of suspended works and the Users. The Concessionaire may by notice require the Independent Engineer to inspect such remedial measures forthwith and make a report to the Authority recommending whether or not the suspension hereunder may be revoked. Upon receiving the recommendations of the Independent Engineer, the Authority shall either revoke such suspension or instruct the Concessionaire to carry out such other and further remedial measures as may be necessary in the reasonable opinion of the Authority, and the procedure set forth in this Clause 13.5 shall be repeated until the suspension hereunder is revoked. For the avoidance of doubt, it is agreed that any such remedial measures undertaken shall not in any manner relieve the Concessionaire of its obligations under this Agreement.
- 13.5.3 Subject to the provisions of Clause 34.7, all reasonable costs incurred for maintaining and protecting the Construction Works or part thereof during the period of suspension (the “**Preservation Costs**”), shall be borne by the Concessionaire; provided that if the suspension has occurred as a result of any breach of this Agreement by the Authority, the Preservation Costs shall be borne by the Authority.
- 13.5.4 If suspension of Construction Works is for reasons not attributable to the Concessionaire, the Independent Engineer shall, after due consideration of the comments of the Authority, determine any extension of the dates set forth in the Project Completion Schedule to which the Concessionaire is reasonably entitled, and shall notify the Authority accordingly whereupon the Authority shall extend such Project Completion Schedule dates in accordance with the recommendations of the Independent Engineer. In the event that the Scheduled Six-Laning Date is extended pursuant hereto, the Concession Period shall be deemed to be extended by a period equal in length to the period of extension of the Scheduled Six-Laning Date. For the avoidance of doubt, it is clarified that such extension of the Project Completion Schedule shall constitute the sole and exclusive remedy available to the Concessionaire under this Clause 13.5.4, and the Authority shall not be liable for any other costs, claims damages or incidental consequences arising out of or in relation to such extension.

13.6 Video recording

During the Construction Period, the Concessionaire shall provide to the Authority for every calendar month, a video recording through drone or such other mechanism as may be acceptable to the Authority, capturing the status and progress of Construction Work for that month from an altitude sufficient to capture both ends of the Right of Way and compile the said recording into a compact disc or digital video disc, as the case may be. The first such video recording shall be provided to the Authority within 7 (seven) days of the Appointed Date and thereafter, no later than 15 (fifteen) days following the end of each month. Such video recording shall be carried out in accordance with the standard operating procedure or guidelines of the Authority from time to time, and shall also be uploaded by the Concessionaire on the Authority's designated portal/website. The Independent Engineer shall ensure that the features and quality of the video recording conforms to the standard operating procedure or guidelines of the Authority and the video is not distorted/tampered with. The Independent Engineer shall also review and analyse each of the said video recordings and incorporate its observations, if any, in the Inspection Report. The Concessionaire shall be responsible for ensuring the accuracy, completeness, and integrity of the video recording. The Authority reserves the right to host such video recordings on its website for public viewing. Notwithstanding anything to the contrary contained in this Agreement, in case of any discrepancy in information/data captured through video recording under this Clause 13.6 or location tracking system under Clause 13.1, the information/data captured through video recording under this Clause shall prevail.

13.7 Quality of materials and workmanship

The Concessionaire shall ensure that the construction, materials and workmanship are in accordance with the requirements specified in this Agreement, Specifications and Standards and Good Industry Practice.

13.8 Quality control system

13.8.1 The Concessionaire shall establish a quality control mechanism to ensure compliance with the provisions of this Agreement (the “**Quality Assurance Plan**” or “**QAP**”).

13.8.2 “**Quality Assurance Plan**” shall include submission of the following by the Concessionaire to Independent Engineer and Authority:

- a. an organisation chart of the quality control system, clearly indicating all personnel involved along with their respective duties and responsibilities, the procedures and proformas to be adopted for quality control documentation, and the prescribed frequency of inspections;
- b. a quality control mechanism including sampling and testing of materials, test frequencies, standards, acceptance criteria, testing facilities, reporting, recording and interpretation of test results, approvals, check list for site activities, and proforma for testing and

- calibration in accordance with the Specifications for Road and Bridge Works issued by MORTH, relevant IRC specifications and Good Industry Practice; and
- c. internal quality audit system.

- 13.8.3 The Independent Engineer shall, within 15 (fifteen) days of receipt of the Quality Assurance Plan, convey its approval to the Concessionaire, indicating modifications required, if any. The Concessionaire shall, to the extent necessary for compliance with the provisions of Clause 13.8, incorporate the suggested modifications in the Quality Assurance Plan. The Authority reserves the right to host the Quality Assurance Plan on its website for public viewing.
- 13.8.4 The Concessionaire shall procure all documents, apparatus and instruments, fuel, consumables, water, electricity, labour, materials, samples, and qualified personnel as are necessary for examining and testing the Project Assets and workmanship in accordance with the Quality Assurance Plan.
- 13.8.5 The cost of testing of construction, materials and workmanship under this Article 13 shall be borne by the Concessionaire.

13.9 Inspection and technical audit by the Authority

The Authority or any representative authorised by the Authority in this behalf may inspect and review the progress and quality of construction of the Project, and issue appropriate directions to the Independent Engineer and the Concessionaire to undertake remedial action in the event the Construction Works are not in accordance with the provisions of this Agreement.

13.10 External technical audit

- 13.10.1 At any time during the Construction Period, the Authority reserves the right to appoint an external technical auditor to conduct an audit of the quality of the Works. The Auditor shall carry out the tests and/ or collect samples for testing in the laboratory in the presence of the representatives of the Concessionaire and the Independent Engineer. The timing, the testing equipment, and the sample size of such audit shall be as decided by the Authority. The findings of the audit, to the extent accepted by the Authority, shall be notified to the Concessionaire and the Independent Engineer for undertaking remedial action in accordance with this Agreement.
- 13.10.2 Upon completion of the remedial measures by the Concessionaire, the Auditor shall undertake a closure audit and this process shall be repeated till the remedial measures have brought the works in compliance with the Specifications and Standards. The Concessionaire shall provide all assistance as may be required by the auditor for the conduct of its audit hereunder. Notwithstanding anything contained in this Clause 13.10, the external technical audit shall not affect any obligations of the Concessionaire or the Independent Engineer under this Agreement.

13.11 Inspection of construction records

The Authority shall have the right to inspect, at any time, the records of the Concessionaire relating to the Construction Works.

ARTICLE 14

COMPLETION CERTIFICATE

14.1 Tests

- 14.1.1 At least 30 (thirty) days prior to the likely completion of the Project Highway, the Concessionaire shall notify the Independent Engineer and the Authority of its intent to subject the Project Highway to Tests. The date and time of each of the Tests shall be determined by the Independent Engineer in consultation with the Concessionaire, and notified to the Authority who may designate its representative to witness the Tests. The Concessionaire shall provide such assistance as the Independent Engineer may reasonably require for conducting the Tests. In the event of the Concessionaire and the Independent Engineer failing to mutually agree on the dates for conducting the Tests, the Concessionaire shall fix the dates by providing not less than 10 (ten) days notice to the Independent Engineer and the Authority.
- 14.1.2 All Tests shall be conducted in accordance with Schedule-I duly supported by video recording. The Independent Engineer shall observe, monitor and review the results of the Tests to determine compliance of the Project Highway with Specifications and Standards and if it is reasonably anticipated or determined by the Independent Engineer during the course of any Test that the performance of the Project Highway or any part thereof does not meet the Specifications and Standards, it shall have the right to suspend or delay such Test and require the Concessionaire to remedy and rectify the defects or deficiencies. Upon completion of each Test, the Independent Engineer shall provide to the Concessionaire and the Authority copies of all Test data including detailed Test results. For the avoidance of doubt, it is expressly agreed that the Independent Engineer may require the Concessionaire to carry out or cause to be carried out additional Tests, in accordance with Good Industry Practice, for determining the compliance of the Project Highway with Specifications and Standards.

14.2 Completion Certificate

Subject to the provisions of Clause 14.5, upon completion of Construction Works and the Independent Engineer determining the Tests to be successful, it shall forthwith issue to the Concessionaire and the Authority a certificate substantially in the form set forth in Schedule-J (the “**Completion Certificate**”).

14.3 Provisional Certificate

- 14.3.1 Subject to the provisions of Clause 14.3.2 and 14.5, the Independent Engineer may, at the request of the Concessionaire, issue a provisional certificate of completion substantially in the form set forth in Schedule-J (the “**Provisional Certificate**”) if the Tests are successful and the Project Highway can be safely and reliably placed in commercial operation though certain works or things forming part thereof are outstanding and not yet complete. In such a case, the Provisional Certificate shall have appended thereto a list of outstanding items,

categorized as (i) those attributable to the Concessionaire, and (ii) those not attributable to the Concessionaire, signed jointly by the Independent Engineer and the Concessionaire (the “**Punch List**”); provided that the Independent Engineer shall not withhold the Provisional Certificate for reason of any work remaining incomplete if the delay in completion thereof is attributable to the Authority; provided further that the Punch List shall also include the cost of completion for each of the outstanding items in accordance with the Clause 16.6.1.

- 14.3.2 The Parties hereto expressly agree that a Provisional Certificate under this Clause 14.3 may, upon request of the Concessionaire to this effect, be issued for operating part of the Project Highway, if the Concessionaire has completed construction of 100% (Hundred per cent) of the Site made available to it up to 240 (two hundred forty) days from the Appointed Date, except any pending Punch List items. Upon issue of such Provisional Certificate, the provisions of Article 15 shall apply to such completed part, and the rights and obligations of the Concessionaire for and in respect of such completed part of the Project shall be construed accordingly.

14.4 Completion of Punch List items

- 14.4.1 All items in the Punch List shall be completed by the Concessionaire within 90 (ninety) days of the date of issue of the Provisional Certificate and for any delay thereafter, other than for reasons solely attributable to the Authority or due to Force Majeure, the Authority shall be entitled to recover Damages from the Concessionaire to be calculated and paid for each day of delay until all items are completed, at the lower of (a) 0.1% (zero point one per cent) of the Performance Security, and (b) 0.2% (zero point two per cent) of the cost of completing such items as estimated by the Independent Engineer. Subject to payment of such Damages, the Concessionaire shall be entitled to a further period not exceeding 120 (one hundred and twenty) days for completion of the Punch List items. For the avoidance of doubt, it is agreed that if completion of any item is delayed for reasons solely attributable to the Authority or due to Force Majeure, the completion date thereof shall be determined by the Independent Engineer in accordance with Good Industry Practice, and such completion date shall be deemed to be the date of issue of the Provisional Certificate for the purposes of Damages, if any, payable for such item under this Clause 14.4.1.
- 14.4.2 Upon completion of all Punch List items, the Independent Engineer shall issue the Completion Certificate. Failure of the Concessionaire to complete any of the Punch List items within the time set forth in Clause 14.4.1, except due to Force Majeure Event or reasons solely attributable to the Authority, the Authority shall have the discretion to get the Punch List items completed at the risk and cost of the Concessionaire, and to recover its cost from the Concessionaire. In addition to recovery of the aforesaid cost, a sum equal to 20% (twenty per cent) of such cost shall be paid by the Concessionaire to the Authority as Damages. Provided further that, without prejudice to any other rights or remedies under this Agreement, the Authority shall also have the right, at its sole discretion, to suspend the Concessionaire’s right to appropriate the Fee for such period necessary to recover the cost incurred in completing

such Punch List items including Damages. For the avoidance of doubt, the right of the Authority under this Clause 14.4.2 shall be without prejudice to its rights and remedies provided under Clause 14.4.1.

- 14.4.3 The Authority shall have the right, which the Concessionaire hereby expressly grants, to recover the costs and Damages specified in Clause 14.4.2 directly from the Escrow Account as if such costs and Damages were payments relating to construction of the Project Highway, and for this purpose, the Concessionaire hereby agrees to give irrevocable instructions to the Escrow Bank to make payment from the Escrow Account in accordance with the instructions of the Authority under this Clause 14.4.3 and debit the same to payment relating to construction of the Project Highway under the Clause 4.1.1 (b) and 4.2 (d) of the Escrow Agreement.

14.5 Withholding of Provisional or Completion Certificate

14.5.1 (a) If the Independent Engineer determines that the Project Highway or any part thereof does not conform to the provisions of this Agreement and cannot be safely and reliably placed in commercial operation, it shall, within 15 (fifteen) days of conducting Tests, notify the Authority and the Concessionaire of the defects and deficiencies in the Project Highway. Upon receipt of such notice, the Concessionaire shall promptly remedy and rectify the defects or deficiencies and thereupon Tests shall be undertaken in accordance with this Article 14. Such procedure shall be repeated as necessary until the defects or deficiencies are rectified. (b) If the Independent Engineer determines that the Tests are successful, and the Project Highway can be safely and reliably placed in commercial operation, it shall notify the same to the Authority and the Concessionaire within 15 (fifteen) days of conducting the Tests. Upon receipt of such a notice, and after conducting its own inspection, if the Authority is of the opinion that the Project Highway is not fit or safe for commercial operation, it shall, within 21 (twenty one) days of receiving such notice, notify the Independent Engineer and the Concessionaire of the defects and deficiencies in the Project Highway. Upon receipt of such notice, the Independent Engineer shall, within 7 (seven) days of receiving of notice of the Authority, either issue or withhold issuance of the Provisional Certificate or Completion Certificate, as the case may be. If the Independent Engineer decides to withhold issuance of the Provisional Certificate or Completion Certificate, as the case may be, it shall notify the Authority and the Concessionaire of the defects and deficiencies in the Project Highway. Upon receipt of such notice, the Concessionaire shall promptly remedy and rectify such defects or deficiencies and thereupon Tests shall be undertaken in accordance with this Article 14. Such procedure shall be repeated as necessary until the defects or deficiencies are rectified.

- 14.5.2 Notwithstanding anything to the contrary contained in Clause 14.5.1, the Authority may, at any time after receiving a report from the Independent Engineer under that Clause, direct the Independent Engineer to issue a Provisional Certificate or Completion Certificate under Clause 14.3 or 14.2 respectively, as the case may be, and such direction shall be complied forthwith.

14.6 Rescheduling of Tests

If the Independent Engineer certifies to the Authority and the Concessionaire that it is unable to issue the Completion Certificate or Provisional Certificate, as the case may be, because of events or circumstances on account of which the Tests could not be held or had to be suspended, the Concessionaire shall be entitled to re-schedule the Tests and hold the same as soon as reasonably practicable.

ARTICLE 15

ENTRY INTO COMMERCIAL SERVICE

15.1 Commercial Operation Date (COD)

15.1.1 Six-Laning shall be deemed to be complete when the Provisional Certificate or the Completion Certificate, as the case may be, is issued under the provisions of Article 14, and accordingly the commercial operation date of the Project shall be the date on which such Provisional Certificate or the Completion Certificate is issued, whichever is earlier (the “**COD**”). The Project Highway shall enter into commercial service on COD whereupon the Concessionaire shall be entitled to demand and collect Fee in accordance with the provisions of Article 27.

15.2 Damages for delay

15.2.1 Subject to the provisions of Clause 12.4, if COD does not occur prior to the 91st (ninety first) day after the Scheduled Six-Laning Date, unless the delay is on account of reasons solely attributable to the Authority or due to Force Majeure, the Concessionaire shall pay Damages to the Authority in a sum calculated at the rate of 0.1% (zero point one per cent) of the amount of Performance Security for delay of each day until COD is achieved.

ARTICLE 16
CHANGE OF SCOPE

16.1 Change of Scope

- 16.1.1 The Authority may, notwithstanding anything to the contrary contained in this Agreement, require the provision of additional works and services which are not included in the Scope of the Project as contemplated by this Agreement or to make modifications/ alterations in the Scope of the Project (the “**Change of Scope**”). Any such Change of Scope shall be made in accordance with the provisions of this Article 16 and the costs thereof shall be expended by the Concessionaire and reimbursed to it by the Authority in accordance with Clause 16.3.
- 16.1.2 If the Concessionaire determines at any time that a Change of Scope is necessary for providing safer and improved services to the Users, it shall by notice in writing require the Authority to consider such Change of Scope. The Authority shall, within 60 (sixty) days of receipt of such notice, either accept such Change of Scope with modifications, if any, and initiate proceedings thereof in accordance with this Article 16 or inform the Concessionaire in writing of its reasons for not accepting such Change of Scope.
- 16.1.3 Any works or services which are provided under and in accordance with this Article 16 shall form part of the Project Highway and the provisions of this Agreement shall apply *mutatis mutandis* to such works or services. In the event of any increase in the equivalent length of the Project Highway on account of additional length, structures or bypasses, as determined in accordance with the Fee Rules, the Concessionaire shall be liable to pay the Authority the additional Fee collected as a result of such increase, in the form of an additional Concession Fee.

16.2 Procedure for Change of Scope

- 16.2.1 In the event of the Authority determining that a Change of Scope is necessary, it shall issue to the Concessionaire a notice specifying in reasonable detail the works and services contemplated thereunder (the “**Change of Scope Notice**”).
- 16.2.2 Upon receipt of a Change of Scope Notice, the Concessionaire shall, with due diligence, provide to the Authority and also to the Independent Engineer such information as is necessary, together with detailed proposal in support of:
- (a) the impact, if any, which the Change of Scope is likely to have on the Project Completion Schedule if the works or services are required to be carried out during the Construction Period; and
 - (b) the options for implementing the proposed Change of Scope and the effect, if any, each such option would have on the costs and time thereof, including the following details:

- i. break-up of the quantities, unit rates and cost for different items of work;
- ii. proposed design for the Change of Scope; and
- iii. proposed modifications, if any, to the Scheduled Six-Laning Date of the Project Highway.

(c) The Parties agree that cost and time for implementation of the proposed Change of Scope shall be determined as follows:

- (i) for items of work for which rates are specifically provided in Schedule B, such rates shall be used for determining the costs. These rates shall be adjusted to reflect variation in Price Index, determined with reference to the Price Index applicable on the first day of the relevant Accounting Year of the Change of Scope Order, and the Price Index prevailing on the Bid Due Date;
- (ii) for items of work not covered under Clause 16.2.2(c)(i) and where the schedule of rates of the relevant circle of the State Public Works Department (NH) prevailing as on the date of the Change of Scope Order is available, such rates shall be adopted for determining the cost. In the event the schedule of rates prevailing as on the date of the Change of Scope Order is not available, the applicable rates from the latest available schedule shall be adjusted using the Price Index applicable on the first day of the relevant Accounting Year of the Change of Scope Order.

For items of work not covered under the above-mentioned schedule of rates, the cost shall be determined based on the MORTH Standard Data Book. In the event that the MORTH Standard Data Book does not contain the necessary specifications for any particular item, the Independent Engineer shall determine the cost based on the prevailing market rates in accordance with Good Industry Practice;

- (iii) in the event of alteration/modification in the Scope of the Project, the cost of existing items of work, that are being altered or modified, shall also be determined in accordance with the provisions of this Clause 16.2.2(c), and the cost of such Change of Scope shall be determined after reducing the cost of the existing items of work that are being altered/modified;
- (iv) design charges shall be determined at the rate of 1% (one percent) of the cost of the Change of Scope. For the avoidance of doubt, it is clarified that in the event of alteration/modification in the Scope of the Project, design charges shall be determined at the rate of 1% (one percent) of the cost of the Change of Scope without reducing the cost of the existing works being altered/modified;

(v) the reasonable time for completion of works under the Change of Scope shall be determined by the Independent Engineer in accordance with Good Industry Practice; and.

(vi) in the event of a Change of Scope, the Authority shall make payment to the Concessionaire for the O&M Expenses attributable to such Change of Scope at a rate of 0.70% (zero point seven per cent) per annum of the cost of the Change of Scope. Such O&M Expenses shall be subject to adjustment to reflect variation in the Price Index, determined with reference to the Price Index applicable on the first day of the relevant Accounting Year for which the O&M Expenses are payable and the Price Index prevailing on the date of issuance of the Change of Scope Order.

16.2.3 Upon receipt of information set forth in Clause 16.2.2, if the Authority decides to proceed with the Change of Scope, it shall convey its preferred option to the Concessionaire, and the Parties shall, with assistance of the Independent Engineer, thereupon make efforts in good faith to agree upon the time and costs for implementation thereof. Upon reaching an agreement, the Authority shall issue an order (the “**Change of Scope Order**”) requiring the Concessionaire to proceed with the performance thereof. In the event that the Parties are unable to agree, the Authority may, by issuing a Change of Scope Order, require the Concessionaire to proceed with the performance thereof pending resolution of the Dispute, or carry out the works in accordance with Clause 16.5.

16.2.4 The provisions of this Agreement, insofar as they relate to Construction Works and Tests, shall apply *mutatis mutandis* to the works undertaken by the Concessionaire under this Article 16.

16.3 Payment for Change of Scope

16.3.1 Within 30 (thirty) days of issuing a Change of Scope Order, the Authority shall make an advance payment to the Concessionaire in a sum equal to 10% (ten per cent) of the cost of Change of Scope as agreed hereunder, and in the event of a Dispute, 10% (ten per cent) of the cost assessed by the Independent Engineer. - 16.4.2 Notwithstanding anything to the contrary contained in this Article 16, the Concessionaire shall be entitled to deny any Change of Scope Order if it causes the cumulative costs relating to all the Change of Scope Orders to exceed 10% (ten per cent) of the Total Project Cost in any continuous period of 3 (three) years immediately preceding the date of such Change of Scope Order or if such cumulative costs exceed 20% (twenty per cent) of the Total Project Cost at any time during the Concession Period.

All advertising on the Project Highway shall also conform to Good Industry Practice. For the avoidance of doubt, it is agreed that the rights of the Concessionaire hereunder shall be subject to Applicable Laws, as in force and effect from time to time, and no compensation shall be claimed on account thereof. EFFECT OF VARIATIONS IN TRAFFIC GROWTH

29.1 Effect of variations in traffic growth

29.1.1 The Authority and the Concessionaire acknowledge that the traffic (the “**Target Traffic**”) as on the dates mentioned in the Table below (the “**Target Date**”) is expected to be as under:

Target Date No.	Target Date	Target Traffic in EVUs
1	31.03.2031	50843
2	31.03.2032	50843
3	31.03.2033	53385
4	31.03.2034	64554
5	31.03.2035	68659
6	31.03.2036	72092
7	31.03.2037	75696
8	31.03.2040	87628
9	31.03.2043	101440
10	31.03.2046	117430

and hereby agree that for determining the Revenue Support or modifications to the Concession Period, as the case may be, under this Article 29, the actual traffic after COD on each Target Date shall be derived based on latest technologies and procedures prescribed by the Authority (the “**Actual Weighted Average Daily Traffic**”). In order to calculate the Actual Weighted Average Daily Traffic, the average daily EVUs for 365 days prior to the Target Date shall be assessed by the Authority by computing the weighted average EVUs of all the Toll Plazas considering the equivalent length of travel by EVUs, divided by equivalent length of the Project Highway. It is further agreed that if the Project Highway consists of combination of two highways, then the Actual Weighted Average Daily Traffic shall be assessed for both the highways separately and added together for determining the Actual Weighted Average Traffic hereunder.

The Actual Weighted Average Daily Traffic shall be calculated using the following formula:

$$\text{Actual Weighted Average Daily Traffic} = (\Sigma (\text{EVU}_i \times L_i)) / L,$$

where, EVU_i = average daily EVUs for Toll Plaza “i” for the 365-days period prior to the Target Date, calculated as $\text{EVU}_i = (\Sigma (\text{Daily EVUs})) / 365$,

L_i = equivalent length of travel by EVUs at Toll Plaza “i”, and

L = equivalent length of the Project Highway

For the avoidance of doubt, equivalent length on account of additional length, structures or bypasses shall be determined in accordance with the Fee Rules.

- 29.1.2 In the event that the Actual Weighted Average Daily Traffic shall have fallen short of the Target Traffic by more than 10% (ten per cent) thereof or exceeded the Target Traffic by more than 10% (ten per cent) thereof, the Revenue Support shall be determined or the Concession Period shall be modified through a Supplementary Agreement, as the case may be, in accordance with Clause 29.2 The payment of Revenue Support shall be made within 60 days of the Target Date.
- 29.1.3 The Authority shall, on a provisional basis, release 80% (eighty percent) of the estimated Revenue Support for each quarter within 30 (thirty) days following the end of that quarter, commencing from the quarter immediately after the COD. The estimated Revenue Support shall be calculated by the Authority based on the actual traffic data for the relevant Quarter and the Target Traffic applicable for that year, using the methodology and formula specified in the Clause 29.1.1, and applying the principles set out in the Clause 29.2.1(a). The released provisional payments shall be reconciled on Target Date considering Actual Weighted Average Daily Traffic as determined in accordance with Clause 29.1.1 and the provisions of Clause 29.1.2. Any excess or shortfall in the provisional Revenue Support paid during the relevant year shall be adjusted or recovered, as the case may be, in accordance with Clause 29.2, and such adjustment shall be made within 60 (sixty) days of the relevant Target Date.

29.2 Determination of Revenue Support and Modification in the Concession Period

29.2.1 (a) Determination of Revenue Support

In the event the Actual Weighted Average Daily Traffic shall have fallen short of the Target Traffic by more than 10% (ten percent) for any reason including opening of traffic on the Additional Tollway and/ or Competing Road, on any Target Date within the first 7 (seven) Target Date(s), then the revenue support (the “**Revenue Support**”) payable by Authority to the Concessionaire shall be determined as follows:

S. No.	Shortfall in Target Traffic on each Target Date	Revenue Support
1.	Shortfall up to 10%	Nil
2.	Shortfall beyond 10% upto 20%	Equivalent to product of (i) 90% of the Target Traffic less Actual Weighted Average Daily Traffic and (ii) applicable Fee of car for the relevant period of Target Date and [365 days]
3.	Shortfall beyond 20%	Equivalent to product of (i) 10% of the Target Traffic and (ii) applicable Fee of car for the relevant period of Target Date and [365 days]

(b) Modification in the Concession Period

In the event Actual Weighted Average Daily Traffic shall have fallen short of the Target Traffic by more than 10% (ten percent) for any reason including opening of traffic on the Additional Tollway and/ or Competing Road, after the 7th Target Date, then for every 1% (one per cent) shortfall as compared to

the Target Traffic, the remaining Concession Period shall, subject to payment of Concession Fee in accordance with this Agreement, be increased by 1% (one per cent) thereof; provided that such increase in Concession Period shall not in any case exceed 10% (ten per cent) of the Concession Period. For the avoidance of doubt, it is clarified that in the event of decrease in traffic in fraction of 1% (one percent) or part thereof beyond 10% (ten percent) variation shall result in increase in Concession Period on pro-rata basis. Further, it is clarified that the subsequent Target Traffic as specified in 29.1.1 shall be reduced by the same percentage. For the avoidance of doubt, and by way of illustration, it is agreed that in the event the Target Traffic is expected to be as follows:

S. No.	365 days period ending on	Daily average Target Traffic in EVUs for last 365 days	Remaining Concession Period (in Yrs)	Target Date
1	1 Apr 2038	10000	12	Target Date 8
2	1 Apr 2041	20000	9	Target Date 9
3	1 Apr 2044	30000	6	Target Date 10

and in case the Actual Weighted Average Daily Traffic for Target Date 8 is 8750 EVUs, then the remaining Concession Period shall be increased by 2.5% (two point five per cent) thereof to 12.3 years and the subsequent target traffic shall be revised to:

S. No.	365 days period ending on	Daily average Target Traffic in EVUs for last 365 days	Target Date
1	1 Apr 2041	$20,000 \times (1 - 2.5\%) = 19,500$	Target Date 9
2	1 Apr 2044	29,250	Target Date 10

29.2.2 In the event Actual Weighted Average Daily Traffic shall have exceeded the Target Traffic by more than 10% (ten percent), then for every 1% (one per cent) increase as compared to the Target Traffic, the Concession Period shall be reduced by 1% (one per cent) thereof; provided that such reduction in Concession Period shall not in any case exceed 20% (twenty per cent) of the Concession Period. For the avoidance of doubt, it is clarified that in the event of increase in traffic in fraction of one percent or part thereof beyond 10% (ten percent) variation shall result in decrease in Concession period on pro-rata basis. Further, it is clarified that the subsequent Target Traffic as specified in 29.1.1 shall be increased by the same percentage. For the avoidance of doubt and by way of illustration, it is agreed that in the event the Target Traffic is expected to be as follows:

S. No.	365 days period ending on	Daily average Target Traffic in EVUs for last 365 days	Remaining Concession Period (in Yrs)	Target Date
--------	---------------------------	--	--------------------------------------	-------------

1	1 Apr 2038	10000	12	Target Date 8
2	1 Apr 2041	20000	9	Target Date 9

and in case the Actual Weighted Average Daily Traffic in the 365 days period ending on 1 Apr 2038 is 11,250 EVUs, then the remaining Concession Period shall be decreased by 2.5% (two point five per cent) thereof to 11.7 years and the subsequent Target Traffic shall be revised to:

S. No.	365 days period ending on	Daily average Target Traffic in EVUs for last 365 days	Target Date
1	1 Apr 2041	20,500	Target Date 9

29.2.3 Notwithstanding anything to the contrary contained in this Agreement, if the product of weighted average daily traffic in EVUs and a factor of 1.00, in any 2 (two) Accounting Years in a block of three continuous Accounting Years shall exceed the Design Capacity of the Project Highway, the Authority shall Buy Back the Project in accordance with the provisions of Clause 37.2A.

In order to calculate weighted average daily traffic, the average daily traffic in EVUs for Accounting Year shall be assessed by the Authority by computing the weighted average daily traffic in EVUs of all the Toll Plazas considering the length of travel, divided by length of the Project Highway.

Provided that, where the Project Highway comprises a combination of two highways being an existing highway and a newly constructed highway, the weighted average daily traffic (in EVUs) for the purposes of this Clause 29.2.3 shall be assessed with respect to the newly constructed highway only.

For the avoidance of doubt, the Parties agree that an average daily traffic of 96000 EVUs shall be deemed to be the design capacity of the Project Highway (the “Design Capacity”).

29.2.4 Deleted.

29.2.5 In the event of any modification in the Concession Period in accordance with Clause 29.2.1 or Clause 29.2.2 for a period exceeding 6 months, the outstanding debt specified in Schedule X shall be modified proportionately, upto the said period from the next quarter following the Target Date, as illustrated below:

- (a) before COD, the Concession Period and the dates set forth in the Project Completion Schedule shall be extended by a period equal in length to the duration for which such Force Majeure Event subsists; or

For the avoidance of doubt, loss of 25% (twenty-five per cent) in collection of Fee as compared to the Average Daily Fee for four days shall entitle the Concessionaire to extension of one day in the Concession Period.

34.7 Allocation of costs arising out of Force Majeure

34.7.1 Upon occurrence of any Force Majeure Event prior to the Appointed Date, the Parties shall bear their respective costs and no Party shall be required to pay to the other Party any costs thereof.

- (I) Upon occurrence of a Force Majeure Event after the Appointed Date and prior to the COD, Force Majeure Costs shall mean escalation cost, prolongation cost, interest on Debt Due, and all other costs directly attributable to the Force Majeure Event. It is hereby expressly agreed by the Parties that escalation cost, prolongation cost and payment of interest on Debt Due for the purposes of this Clause 34.7.2 shall be limited to the extent determined hereinbelow:

(ii) prolongation cost shall be determined as the product of 8% (eight percent) of the value of incomplete work and the period of delay attributable to the Force Majeure Event, divided by the period specified in Clause 12.4.1; and

(iii) interest on Debt Due, for the period of delay attributable to the Force Majeure Event.

For the avoidance of doubt, the incomplete work referred to in this Clause 34.7.2 shall be limited to the portion of the work that remains unfinished due to the occurrence of a Force Majeure Event, and shall specifically exclude any work that was incomplete due to delays attributable to the Concessionaire prior to the occurrence of such Force Majeure Event. The value of such work shall be assessed as of the Bid Due Date by Independent Engineer, in accordance with the methodology set out in Clause 16.2.2(c).

(II) Upon occurrence of a Force Majeure Event after the COD, Force Majeure Costs shall mean (a) interest on Debt Due and (b) O&M Expenses as determined from original Financing Agreements. Provided that such O&M Expenses shall not exceed 0.7% (zero point seven percent) of the Estimated Project Cost per annum, and shall be adjusted for inflation using the applicable Price Index from the Bid Due Date to the first day of the relevant Accounting Year for which the Force Majeure Costs are to be determined.

34.8 Termination Notice for Force Majeure Event

If a Force Majeure Event subsists for a period of 180 (one hundred and eighty) days or more within a continuous period of 365 (three hundred and sixty five) days, either Party may in its discretion terminate this Agreement by issuing a Termination Notice to the other Party without being liable in any manner whatsoever, save as provided in this Article 34, and upon issue of such Termination Notice, this Agreement shall, notwithstanding anything to the contrary contained herein, stand terminated forthwith; provided that before issuing such Termination Notice, the Party intending to issue the Termination Notice shall inform the other Party of such intention and grant 15 (fifteen) days time to make a representation, and may after the expiry of such 15 (fifteen) days period, whether or not it is in receipt of such representation, in its sole discretion issue the Termination Notice.

34.9 Termination Payment for Force Majeure Event

34.9.1 If Termination is on account of a Non-Political Event, the Authority shall make a Termination Payment to the Concessionaire in an amount equal to 90% (ninety per cent) of the Debt Due less Insurance Cover.

For the avoidance of doubt, incomplete work shall refer only to the portion of the work that remains unfinished due to reasons attributable solely to the Authority. The value of such work shall be assessed as of the Bid Due Date by the Independent Engineer, in accordance with the methodology specified in

Clause 16.2.2(c).

Provided however, in the event of the Authority being in material default or breach of this Agreement at any time after the COD, the provision of Clause 35.3 shall be applicable.

** Measurement of Progress

For example, if the total length of bituminous work to be done is 100 km, the physical progress of bituminous work shall be determined as follows:

Physical progress of bituminous work
=Weightage for bituminous work x (L'/L)

L = Total length of bituminous work
in km

L' = Executed length of bituminous
work in km

Likewise, the Physical Progress corresponding to the other stages shall be computed, and the aggregate of such stage wise progress shall constitute the overall Physical Progress achieved.

TESTS

1 Schedule for Tests

- 1.1 The Concessionaire shall, not later than 30 (thirty) days prior to the likely completion of Six-Laning, notify the Independent Engineer and the Authority of its intent to subject the Project Highway to Tests, and not later than 7 (seven) days prior to the actual date of Tests, furnish to the Independent Engineer and the Authority detailed inventory and particulars of all works and equipment forming part of Six-Laning.
- 1.2 The Concessionaire shall notify the Independent Engineer of its readiness to subject the Project Highway to Tests at any time after 7 (seven) days from the date of such notice, and upon receipt of such notice, the Independent Engineer shall, in consultation with the Concessionaire, determine the date and time for each Test and notify the same to the Authority who may designate its representative to witness the Tests. In the event of the Concessionaire and the Independent Engineer failing to mutually agree on the dates for conducting the Tests, the Concessionaire shall fix the dates by providing not less than 10 (ten) days notice to the Independent Engineer and the Authority. The Independent Engineer shall thereupon conduct the Tests itself or cause any of the Tests to be conducted in accordance with Article 14 and this Schedule-I.

2 Tests

- 2.1 Visual and physical Test: The Independent Engineer shall conduct a visual and physical check of Six-Laning] to determine that all works and equipment forming part thereof conform to the provisions of this Agreement.
- 2.2 Test drive: The Independent Engineer shall undertake a test drive of the Project Highway by a Car and by a fully loaded Truck to determine that the quality of service conforms to the provisions of the Agreement.
- 2.3 Riding quality Test: Riding quality of each lane of the carriageway shall be checked with the help of a network survey vehicle equipped with a class-1 laser profilometer in accordance with Specifications and Standards and the maximum permissible roughness for purposes of this Test shall be [1,800 (one thousand and eight hundred)] mm for each kilometre.
- 2.4 Pavement Composition Test: The thickness and composition of the pavement structure shall be checked on a sample basis by digging pits to determine conformity of such pavement structure with Specifications and Standards. The sample shall consist of one pit in each direction of travel to be chosen at random in each stretch of 5 (five) kilometres of the Project Highway. The first pit for the sample shall be selected by the Independent Engineer through an open draw of lots and every fifth kilometre from such first pit shall form part

of the sample for this pavement quality Test.

- 2.5 Cross-section Test: The cross-sections of the Project Highway shall be checked on a sample basis through physical measurement of their dimensions for determining the conformity thereof with Specifications and Standards. For the road portion, the sample shall consist of one spot to be selected at random in each stretch of 1 (one) kilometre of the Project Highway. The first spot for the sample shall be selected by the Independent Engineer through an open draw of lots and the spots located at every one kilometre from such first spot shall form part of the sample. For the bridge portion, one spot shall be selected at random by the Independent Engineer in each span of the bridge.
- 2.6 Structural Test for structures: All major and minor bridges, including over bridges, underpasses and flyovers, constructed by the Concessionaire shall be subjected to the Rebound Hammer and Ultrasonic Pulse Velocity tests, to be conducted in accordance with the procedure described in Special Report No. 17: 1996 of the IRC Highway Research Board on Nondestructive Testing Techniques, at two spots in every span, to be chosen at random by the Independent Engineer. All Structures with a span of 15 (fifteen) metres or more shall also be subjected to load testing.
- 2.7 Other Tests: The Independent Engineer may require the Concessionaire to carry out or cause to be carried tests on reflectivity of road markings, road signs and illumination levels (lux) of lighting and any additional Tests, in accordance with Good Industry Practice, for determining the compliance of the Project Highway with Specifications and Standards.
- 2.8 Environmental audit: The Independent Engineer shall carry out a check to determine conformity of the Project Highway with the environmental requirements set forth in Applicable Laws and Applicable Permits.
- 2.9 Safety review: Safety audit of the Project Highway shall have been undertaken by the Safety Consultant as set forth in Schedule-L, and on the basis of such audit, the Independent Engineer shall determine conformity of the Project Highway with the provisions of this Agreement.

3 Agency for conducting Tests

All Tests set forth in this Schedule-I shall be conducted by the Independent Engineer or such other agency or person as it may specify in consultation with the Authority.

4 Provisional/Completion Certificate

Upon successful completion of Tests, the Independent Engineer shall issue the Provisional Certificate or the Completion Certificate, as the case may be, in accordance with the provisions of Article 14.

10.1 Traffic management during operation and maintenance of the Project Highway is a critical responsibility of the Concessionaire. It is essential to ensure safety of the road users as well as the maintenance workers simultaneously throughout the

Concession Period. It is usual activity to carry out various types of maintenance works at different stages and at different periods as per site requirement. Also, it is a vital activity during unforeseen and/or emergency situations arising on account of natural causes or accidents or administrative reasons.

10.2 Traffic management shall be required during planned schedule like routine and periodic maintenance activities. However, traffic management will also be called for during unscheduled activities such as

10.2.1 Emergency situation arising on account of

- (a) Force Majeure;
- (b) accident/incident on the Project Highway;
- (c) any extraordinary occurrence or special event (including, religious gatherings, political events, or other similar events) that may cause a surge in traffic on the Project Highway;

10.2.2 Special repairs required on account of deficiency/ failure of an element of the Project Highway; and

10.2.3 Default of the Concessionaire with respect to any O&M activity on the Project Highway

10.3 The basic principles to be followed for maintenance works in this Project Highway shall be as follows:

- (a) Work programme schedule shall be prepared in a manner that diversion roads for the main traffic are minimized. Two-lanes of carriageway shall be available to the maximum extent possible.
- (b) Measures shall be taken such that the traffic is guided from a closed lane onto the operating lane without any conflict with the traffic from the opposite direction.
- (c) The activity of maintenance of pavement surface and/or strengthening/ renewal of the pavement structure shall not be taken up in a continuous length of more than 2 kilometers at a time to avoid long detour of the traffic.
- (d) The traffic diversion road where provided shall be appropriately designed for the traffic plying on the main carriageway. It shall also be properly maintained during its operation period.
- (e) During traffic detour involving traffic diversion, adequate safety measures as per Specifications & Schedule-L shall be followed.

 - (viii) Implementation of Asset Management Plan
- (c) As requirement of maintenance manual under Article 17 of the Concession Agreement, the Concessionaire shall in accordance with this schedule and Standards and Specifications also evolve an Asset Management Manual as per Article 17 of the Concession Agreement. The same shall be submitted to Independent Engineer. Independent Engineer upon finding this Asset Management Manual in accordance with Schedules, Concession Agreement and the best industry practice of the day shall approve the same.

- (d) The Asset Management Manual prepared by the Concessionaire shall set out the Asset Management standards and details of the Operations & Maintenance activities to be undertaken during the Concession Period, so that the Project Facilities shall at all times conform to the Design Requirements/specifications.
- (e) The Asset Management Manual shall include without limitation the following aspects:

- i) The Concessionaire in accordance of provisions of the Concession Agreement shall plan/ programme inspections of the Project Highway classified in the following categories for effective O&M/Asset Management System Implementation:

- (i) Routine Inspection: Routine Visual Inspections are to be carried out by highway/bridge maintenance engineers having knowledge of highway/road structures. The purpose of visual inspection is to report the obstacles to traffic, defects and deficiencies of pavement/structure, missing or damages to safety barrier (crash barriers) and traffic signs installed or erected on highway. Such inspections should be done daily. The visual inspection may be carried out by visual assessment with careful observation of the specific object/item of the Project Facilities for identification and for quantification of the deficiencies or damages of the Project Facilities. Geotagging Cameras and Distance Measuring Devices shall be used to update base asset performance parameters on daily basis. If timely inspection and reporting of these safety related deficiencies are not done, they could lead to accidents or severe maintenance problems.
- (i) Close Inspection: Close inspections for assessment of defects/deficiencies of Project Highway shall be periodic in nature and would require detailed examination of all elements of the Project Highway. Close inspection may be visual or may involve investigations to be carried out using instruments. The frequency of close inspections would depend upon the nature of the elements of Project Highway. This inspection is to be carried out by the Highway/Bridge Engineer having good knowledge of Highway with theoretical background to analyze the nature, and extent of

defects/deficiencies, suggest suitable remedial measures to rectify/remedy them and quantify repair work.

- (ii) **Thorough Inspection:** A thorough inspection is comprehensive and detailed assessment of defects/deficiencies of the Project Highway with the aid of standard equipment and non-destructive testing. Such an inspection is to be carried out on the basis of comprehensive checklist of items related to the materials, condition of element of Project Highway. A checklist is to be prepared well in advance of inspection. The thorough inspection should be undertaken during the most critical weather condition. Thorough inspection carried out will offer the most critical evaluation of the performance of the Project Highway elements.

Besides being a qualified Highway/Bridge engineer, the inspection team leader must be familiar with design and construction features of the Highway /Bridges to be inspected so that the condition can be properly and accurately assessed for a meaningful report and quantification of repair works. The competence of team leader to recognize any structural distress/deficiencies and assess its seriousness with complete recommendation for appropriate repairs are important pre-requisites for entrusting this assignment to him.

After thorough visual inspection and detailed condition survey of various bridge components at 5 years interval and also when whenever distress serious distress observed in the conditional survey following test shall need to be carried out:

S. No	Name of Tests	Minimum no. of tests sample per span/pier/abutment	Minimum no. of spans to tested in a bridge	Frequency of testing
1	Ultra-Pulse Velocity Test	3	1 span for every 3 spans	5 Years
2	Rebound Hammer Test	3	1 span for every 3 spans	5 Years
3	Half Cell Potential Test	3	1 span for every 3 spans	5 Years
4	Carbonation Depth	3	1 span for every 3 spans	5 Years
5	Transient Dynamic Response test	3	1 span for every 3 spans	5 Years
6	Laser vibrometer test (only for span greater than 30 m)	1 at mid span	1 span for every 3 spans	10 Years

- (j) The Concessionaire shall strictly maintain the assets of the Project Highway and adhere to the Project deliverables and Tolerance Criteria as mentioned in Annex-I.

**Annex-I
(Schedule-K)**

The Concessionaire shall repair and rectify the defects and deficiencies specified in this Annex- I of Schedule–K within the time limit set forth herein.

SAFETY REQUIREMENTS

1 Guiding principles

- 1.1 Safety Requirements aim at reduction in injuries, loss of life and damage to property resulting from accidents on the Project Highway, irrespective of the person(s) at fault.
- 1.2 Users of the Project Highway include motorised and non-motorised vehicles as well as pedestrians and animals involved in, or associated with accidents. Vulnerable Road Users (VRU) include pedestrians as well as riders of motorised two-wheelers, bicycles and other vehicles which do not provide adequate occupant protection.
- 1.3 Safety Requirements apply to all phases of construction, operation and maintenance with emphasis on identification of factors associated with accidents, consideration of the same, and implementation of appropriate remedial measures.
- 1.4 Safety Requirements include measures associated with traffic management and regulation such as road signs, pavement marking, traffic control devices, roadside furniture, highway design elements, enforcement and emergency response.

2 Obligations of the Concessionaire

The Concessionaire shall abide by the following insofar as they relate to safety of the Users:

- (a) Applicable Laws and Applicable Permits;
- (b) Manual for Safety in Road Design, issued by MORTH;
- (c) relevant Standards/Guidelines of IRC relating to safety, road geometrics, bridges, culverts, road signs, pavement marking and roadside furniture;
- (d) provisions of this Agreement; and
- (e) Good Industry Practice.

3 Appointment of Safety Consultant

For carrying out safety audit of the Project Highway under and in accordance with this Schedule-L, the Authority shall appoint from time to time, one or more qualified firms or organisations as its consultants (the “**Safety Consultant**”). The Safety Consultant shall employ a team comprising, without limitation, one road safety expert and one traffic planner to undertake safety audit of the Project Highway.

4 Safety measures during Development Period

- 4.1 Not later than 90 (ninety) days from the date of this Agreement, the Authority shall appoint a Safety Consultant for carrying out safety audit at the design stage of the Project. The Safety Consultant shall collect data on all fatal crashes and other road accidents which occurred on the Project Highway in the preceding two years by obtaining copies of the relevant First Information Reports (FIRs) from the police stations having jurisdiction. The information contained in such FIRs shall be summarised in the form prescribed by IRC/MORTH for this purpose and the data shall be analysed for the type of victims killed or injured, impacting vehicles, location of accidents and other relevant factors.
- 4.2 The Concessionaire shall provide to the Safety Consultant, in four copies, the relevant drawings containing the design details that have a bearing on safety of Users (the “**Safety Drawings**”). Such design details shall include horizontal and vertical alignments; sightlines; layouts of intersections; interchanges; road cross-section; bridges and culverts; side drains; provision for parked vehicles, slow moving vehicles (tractors, bullock carts, bicycles) and pedestrians; bus bays; truck lay-bys; and other incidental or consequential information. The Safety Consultant shall review the design details and forward three copies of the Safety Drawings with its recommendations, if any, to the Independent Engineer who shall record its comments, if any, and forward one copy each to the Authority and the Concessionaire.
- 4.3 The accident data and the design details shall be compiled, analysed and used by the Safety Consultant for evolving a package of recommendations consisting of safety related measures for the Project Highway. The safety audit shall be completed in a period of three months and a report thereof (the “**Safety Report**”) shall be submitted to the Authority, in five copies. One copy each of the Safety Report shall be forwarded by the Authority to the Concessionaire and the Independent Engineer forthwith.
- 4.4 The Concessionaire shall endeavour to incorporate the recommendations of the Safety Report in the design of the Project Highway, as may reasonably be required in accordance with Applicable Laws, Applicable Permits, Manuals and Guidelines of Authority, MORTH and IRC, Specifications and Standards, and Good Industry Practice. If the Concessionaire does not agree with any or all of such recommendations, it shall state the reasons thereof and convey them to the Authority forthwith. In the event that any or all of the works and services recommended in the Safety Report fall beyond the scope of Schedule-B, Schedule-C or Schedule-D, the Concessionaire shall make a report thereon and seek the instructions of the Authority for funding such works in accordance with the provisions of Article 18.
- 4.5 Without prejudice to the provisions of Paragraph 4.4, the Concessionaire and the Independent Engineer shall, within 15 (fifteen) days of receiving the Safety Report, send their respective comments thereon to the Authority, and not later than 15 (fifteen) days of receiving such comments, the Authority shall review the same alongwith the Safety Report and by notice direct the Concessionaire to carry out any or all of the recommendations contained therein with such modifications as the Authority may specify; provided that any works or services required to be undertaken hereunder shall be governed by the provisions of Article 18.

5 Safety measures during Construction Period

- 5.1 A Safety Consultant shall be appointed by the Authority, not later than 4 (four) months prior to

the expected Project Completion Date, for carrying out a safety audit of the completed Construction Works.

5.2 The Safety Consultant shall collect and analyse the accident data for the preceding two years in the manner specified in Paragraph 4.1 of this Schedule-L. It shall study the Safety Report for the Development Period and inspect the Project Highway to assess the adequacy of safety measures. The Safety Consultant shall complete the safety audit within a period of 4 (four) months and submit a Safety Report recommending a package of additional road safety measures, if any, that are considered essential for reducing accident hazards on the Project Highway. Such recommendations shall be processed, *mutatis mutandis*, and acted upon in the manner set forth in Paragraphs 4.3, 4.4 and 4.5 of this Schedule-L.

5.3 The Concessionaire shall make adequate arrangements during the Construction Period for the safety of workers and road Users in accordance with the guidelines of IRC for safety in Construction Zones, and notify the Authority and the Independent Engineer about such arrangements.

6 Safety measures during Operation Period

6.1 The Concessionaire shall develop, implement and administer a surveillance and safety programme for Users, including correction of safety violations and deficiencies and all other actions necessary to provide a safe environment in accordance with this Agreement.

6.2 The Concessionaire shall establish a Highway Safety Management Unit (the “HSMU”) to be functional on and after COD, and designate one of its officers to be in-charge of the HSMU. Such officer shall have specialist knowledge and training in road safety and traffic engineering by having attended a course conducted by a reputed organisation on the subject.

6.3 The Concessionaire shall keep a copy of every FIR recorded by the Police with respect to any accident occurring on the Project Highway. In addition, the Concessionaire shall also collect data for all cases of accidents not recorded by the Police but where a vehicle rolled over or had to be towed away. The information so collected shall be summarised in the form prescribed by IRC/ MORTH for this purpose. The Concessionaire shall also record the exact location of each accident on a road map. The aforesaid data shall be submitted to the Authority at the conclusion of every quarter and to the Safety Consultant as and when appointed.

A decision by the Tribunal that the contract is null and void shall not entail ipso jure the invalidity of the arbitration agreement.
- 20.2 The plea that the Tribunal does not have jurisdiction shall be raised not later than in the Statement of Defense. A plea that the Tribunal is exceeding the scope of its authority shall be raised promptly after the Tribunal has indicated its intention to decide on the matter alleged to be beyond the scope of its authority. In either case the Tribunal may nevertheless admit a late plea under this Rule if it considers the delay justified. A party is not precluded from raising such a plea by the fact that he has nominated, or participated in the appointment of an arbitrator.
- 20.3 The Tribunal must rule on an objection that it lacks jurisdiction as a preliminary question upon the objection being raised. It may rule on an objection that it exceeds the scope of its authority either as a preliminary question or in an award on the merits, as it deems just and convenient.
- 20.4 In addition to the jurisdiction to exercise the powers defined elsewhere in these Rules, the Tribunal shall have jurisdiction to determine any question of law arising in the arbitration; proceed with the arbitration not with sanding the failure or refusal of any party to comply with these Rules or with the Tribunal's orders or directions, or to attend any meeting or hearing, but only after giving that party written notice that it intends to do so; and to receive and take into account such written or oral evidence as it shall determine to be relevant, whether or not strictly admissible in law.
