contractor shall be refunded along with the payment of the final bill, if the dated upto which the contractor has agreed to maintain the work in good order is over. If such dated is not over only 50% amount of security deposit shall be refunded along with the payment of final bill. The amount of security deposit retained by the government shall be released after expiry of period up to which the contractor has agreed to maintain the work in good order is over. In the event of the contractor has agreed to maintain the work in good order then subject to provision of clauses 17 and 20 here of the amount of security deposit retained by the government shall be adjusted towards the excess cost incurred by the department on rectification work.

Clause 2. The time allowed for carrying out the work as entered in the tender shall be strictly observed the contractor and shall reckoned from the date on which the order to commence work in given to the contractor. The work shall thorough the stipulated period of the contract be proceed with all due diligence (time being deemed to be the séance of the contract on the part of the contractor) and the contractor shall pay as compensation an amount equal to one percent or such smaller amount as the Superintending Engineer (whose decision in writing shall be final) may decide of the amount of the estimated cost of the whole as shown by the tenderer for every day that the work remains uncompleted or unfinished after the proper dates and further to ensure good progress during execution of the work. The contractor shall be bound in all cases in which the time allowed for any work exceeds one month to complete. *Compensation for delay.*

Of the work in	of the time
25%	25 days
50%	50 days
75%	75 days
100%	90 days

Note:- The quantity of the work to be done within a particular time to be specified above shall be fixed and inserted in the blank space kept for the purpose by the officer competent to accept the contracts after taking into consideration the circumstance of each case and abide by the programme of detailed laid down by the Executive Engineer.

The following proportion will usually be found suitable in 1/1, ½, ¾ of the time.

Reasonable progress of earth work, 1/6, 1/2, 3/4 of the total value of the work to be done.

Reasonable progress of masonry work 1/10, 4/10, 8/10 of the total value of the work to be done.

In the event of the contractor failing to comply with this conditions he shall be liable to pay as compensation an amount equal to one percent or such smaller amount as the Superintending Engineer (whose decision in writing shall be final) may decide of the said estimated cost of the whole work for every day that the due quantity of work remains incomplete provided always that the total amount compensation to be ad under the provisions of this clause shall not exceed 10 percent of the estimated cost of the work as shown in the tender. Superintending Engineer should be the final authority in this respect, irrespective of the fact that the tender is accepted by Chief Engineer, Additional Chief Engineer, Superintending/Executive Engineer or Asst. Engineer/Deputy Engineer.

Clause 3. In any case in which under any clause of this contract the contractor shall have rendered himself liable to Signature of the Contractor pay compensation amounting to the whole of this security deposit whether paid in one sum or deducted

Action when, whole of security deposit is forfeited.

Contractor

Executive Engineer

by installments of in the case of abandonment of the work owing to serious illness or death of the contractor or any other cause the engineer, on behalf of the Government of Maharashtra, shall have power to adopt any of the following courses, as he may deem best suited to the interest of Government:-

- (a) The respond the contract (for which recession notice in writing to the contractor under the head of Executive Engineer shall be conclusive evidence) and in that case the security deposit of the contractor shall stand forfeited and be absolutely at the disposal of Government.
- (b) To carry out the work or any part of the work departmentally debiting the contractor with the cost of the work, expenditure incurred on tools and plant, and charges on additional supervisory staff including the cost of work-charged establishment employed for getting the un-executed part of the works completed and crediting him with the value of the work done departmentally in all respect in the same manner and at the same rates as if it had been carried out by the contractor under the terms of his contract. The certificate of the Executive Engineer as to the costs and other allied expenses so incurred and so the value of the work so done departmentally shall be final and conclusive against the contractor.
- (c) To order that the work of the contractor be measured up and to take such part there of as shall be unexecuted out of his hands, and to give it to another contractor to complete, in which case all expenses incurred on advertisement for fixing a new contracting agency, additional supervisory, staff including the cost of work charged establishment and the cost of the work executed by the new contract agency will be debited to the contractor and the value of the work done or executed through the new contractor shall be credited to the contractor in all respects and in the same manner and at the same rates as if it had been carried out by the contractor under the terms of his contract. The certificate of the Executive Engineer as to all the cost of the work and other expenses incurred as aforesaid for or in getting the unexecuted work done by the new contractor and as to the value of the work so done shall be final and conclusive against the contractor.

In case the contract shall be rescinded under clause (a) above the contractor shall not be entitled to recover or he paid, any sum for any work therefore actually performed by him under this contract unless and until the Executive Engineer shall have certified in writing the performance of the such work and the amount payable to him in respect there of and he shall only be entitled to paid the amount so certified. In the event of either of the courses referred to in clause (b) or (c) being adopted and the cost of the work executed departmentally or through a new contractor the amount of excess shall be deducted from any money due to the contractor by Government under the contract or otherwise howsoever or from his security deposit or the sale proceeds there of provided, however, that contractor shall have no claim against. Government even if the certified value of the work done departmentally or through a new contractor exceeds the certified cost of such work and allied expenses, provided always that whichever of the there courses mentioned in clause (a), (b) or (c) is adopted by the Executive Engineer, reason of his having purchased or procured any materials, or entered into any engagements, or made any advance on account of or with a view to the execution of the work or the performance of the contract.

Clause 4. In the progress of any particular portion of the work is unsatisfactory the Executive Engineer shall notwithstanding that the general Progress of the work is in accordance with the conditions mentioned in clauses 2, be entitled to take action under clause 3(b) after giving the contractor 10 day's notice in writing. *Action when the progress of any particular portion of the work is unsatisfactory.*

Contractor

Executive Engineer

The contractor will have no claim for compensation, for any loss sustained by him owing to such action.

Clause 5. In any case in which any of the powers conferred upon the Executive Engineer by clause 3 and 4 here of shall have become exercisable and the same shall not have been exercised the non-exercise there of shall not constitute a waving of any of the conditions here of and such powers shall not with standing be exercisable in the event any future case of default by the contractor for which under any clause here of he is declared liable to pay compensation amounting to the whole of his security deposit and the liability of the contractor for past and future compensation shall remain unaffected. In the event of the Executive Engineer taking action under sub-clause (b) or (c) of clause 3, he may, if he so desires, take possession of all any tools and plant, materials and stores in or upon the work of the site there of or belonging to the contractor, or there of paying or allowing for the same in account at the contract rates, or in the case of contract rates not being applicable at current market rates, or in the case of contract rates not being applicable at current market rates to be certified by the Executive Engineer whose certificate there of shall be final. In the alternative the Executive Engineer may, after giving notice in writing to the contractor or his clerk of the work, for man or other authorized agent require him to remove such tools and plant, materials, or stores from the premises within a time to be specified in such notice and in the event of the contractor failing to comply with any such requisition, the Executive Engineer may remove them at the contractor's expense or sale them by action or private sale on account of the contractor and at his risk in all respect and the certificate of the Executive Engineer as to the expense of any such removal and the amount of the proceeds and expense of any such sale shall be final and conclusive against the contractor.

Contractor remains liable to pay compensation if action not taken under clauses 3 and 4.

Power to take possession of or require removal of or sell contractor's plant.

Extension of time. **Clause 6.** If the contractor shall desire an extension of the time for completion of work on the ground of his having been unavoidable hindered in its execution or on any other ground he shall apply in writing to the Executive Engineer before the expiration of the period stipulated in the tender or before the expiration of 30 days from the date on which he was hindered as a foresaid or on which the cause for asking for extension occurred, whichever is earlier and the Executive Engineer, or in the opinion of Superintending Engineer, or Chief Engineer as the case may be if in his opinion, there were reasonable grounds for granting an extension, grant such extension as he thinks necessary or proper.

Final certificate **Clause 7.** On the completion of the work the contractor shall be furnished with a certificate by the Executive Engineer (hereinafter called the Engineer-in-charge) of such completion, but no such certificate shall be given nor shall the work be considered to be complete until the contractor shall have removed from the premises on which the work shall have been executed, all scaffolding, surplus materials and rubbish, and shall have cleaned off, the dirt from all wood work, doors, windows, wall, floor or other parts of any building in or upon which the work has been executed or of which he may have had possession for the purpose of executing the work, or until the work shall have been measured by the Engineer-in-charge or where the measurement have been taken by his subordinates until they have received approval of the Engineer-in-charge, the said measurements being binding and conclusive against contractor. In the contractor shall fail to comply with the requirements of this clause as to the removal of scaffolding surplus materials and rubbish and cleaning of dirt on or before the date fixed for the completion of the work the Engineer-in-charge may at the expense of the contractor, remove such

scaffolding, surplus materials and rubbish, and dispose off the same as he thinks fit and clean of such dirt aforesaid and the contractor shall forthwith pay the amount of all expenses so incurred, but shall have no claim in respect of any such scaffolding or surplus materials as aforesaid except for any sum actually realized by the sale thereof.

Payment on intermediate certificate to be regarded as advance.

Clause 8. No payment shall be made for any work estimated to cost less than rupees one thousand till after the whole of work shall have been completed and a certified of completion given. But in the case of works estimated to cost more than rupees on thousand the contractor shall on submitting a monthly bill therefore be entitled to receive pay-in-charge, whose certificate of such approval and passing of the sum so payable shall be final and conclusive against the contractor. All such intermediate payments shall be regarded as payments by way of advance against the final payments only and not as payments for work actually done and completed and shall not preclude the Engineer-in-charge from

requiring any bad, unsound imperfect or unskillful work to be removed or taken away and reconstructed or re-erected not shall nay such payment be considered as an admission of the due performance of the contract or nay part thereof in any respect or the occurring of any claim nor shall it conclude, determine or effect in any other way the powers of the Engineer-in-charge as to the final settlement and adjustment of the accounts or otherwise, or in any other way very or effect the contract. The final bill shall be submitted by the contractor within one month of the date fixed for the completion of the work otherwise the Engineer-in-charge's certificate of the measurements and of the total amount payable for the work shall be final and binding

Payment at reduced rates on

Cl: *account of items of work not accepted as completed,* several items of work estimated to cost more than Rs.1,000 agreed to valid only when the item concerned is accepted as having been in accordance with the sanctioned specifications. In case where one items of work are not accepted as so completed by the Engineer-in-charge make may payment on account of such items at such reduced rates as he may consider reasonable in the preparation of final or on account bills.

to be at the discretion of the Engineer-in-charge.

Clause 10. A bill shall be submitted by the contractor in each month or before the date fixed by the Engineer-in-charge shall take or cause to be taken the requisite measurement for the purpose of having the same verified and the claim, so far as it is admissible, shall be adjusted, if possible, within ten days from the presentation of the bill. If the contractor does not submit the bill within the time fixed as aforesaid, the Engineer-in-charge may depute a subordinate to measure up the said work in the presence of the contractor or his duly authorized agent whose countersignature to the measurement list shall be sufficient warrant, and engineer-in-charge may prepare a bill from such list which shall be binding on the contractor in all respects.

Bill to be submitted monthly

Clause 11. The contractor shall submit all bills on the printed forms to be had on application at the office of the Engineer-in-charge. The charges to be made in the bills shall always be entered at the rates specified in the tender or in the case of any extra work ordered in pursuance of these conditions, and not mentioned or provided for in the tender at the rates hereinafter for such work.

Bills to be on printed forms

Clause 12. If the specification or estimate of the work provides for the use of any special description of material to be supplied from the store of the Department store of if it is required that the contractor shall use certain stores to be provided by the Engineer-in-charge. (such material and stores and the prices to be charged therefore

Stores supplied by Government

as hereinafter mentioned being so far as practicable for the convenience of the contractor but not so as in any way to control the meaning or effect of h\this contract specified in the schedule or memorandum here to annexed) the contractor shall be supplied with such materials and stores as may be required from time to time to be sued by him for the purpose of the contract only, and value of the full quantity of the materials and stores f\so supplied shall be set off or deducted from any sums then due, or thereafter to become due to the contractor under the contract, or otherwise, or from the security deposit or the proceeds of sale there of the security deposit is held in government and shall n no account be removed from the site of the work, and shall at all time be open for inspection by the Engineer-in-Charge so requires by a notice in writing given under his hand but the contractor shall not be entitled to return any such materials except with consent of the Engineer-in-charge so requires by a notice in writing given under his hand but the contractor shall not be entitled to return any such materials except with consent of the Engineer-in-charge and he shall have no claim for compensation on account of any such material supplied to him as aforesaid but remaining unused by him or any wastage in or damage to any such materials.

Clause 12.(A) - All stores of controlled materials such as cement, steel etc. supplied to the contractor by Government should be kept by the contractor under lock and key and will be accessible for inspection b the Executive Engineer or his agent at all the times.

Works to be executed in accordance with Specification, drawing, orders, etc.

Clause 13. The contractor shall execute the whole and every part of the work in the most substantial and workmanlike manner, and both as regards materials and every other respect in strict accordance with specifications. The contractor shall also son form exactly, fully and faithfully to the designs, drawing and instructions in writing relating to the work signed by the Engineer-in-charge and lodged in his office and to which the contractor shall be entitled to have access for the purpose of inspection at such office, or on the site of the work during office hours. The contractor will be entitled to receive their sets of contract drawing and working drawings as well as one certified copy of the accepted tender along with the work order free of cost further copies of the contract drawings and workings drawings if required by him, shall be supplied at the rate of Rs..... Per set of contract drawings and Rs..... Per working drawing except where otherwise specified.

Alteration in specifications and designs not to invalidate contracts

Clause 14. The Engineer-in-charge shall have power to make any alteration in or additions to the original specifications, drawings designs, and instructions that may appear to him to be necessary or advisable during the progress of the work and the contractor shall be bound to carry out the work in accordance with any instructions in this connection which may be given to him in writing signed by the Engineer-in-charge and such alteration shall not invalidate the contract, and any additional work which the contractor may be directed to do in the manner above specified as part of the work shall be carried out by the contractor on the same conditions in all respect on which he main work, and at the same rates as are specified in the tender for the main work and if the additional and altered work includes any class of work for which no rate is specified in this contract, then such class of works shall be carried out at the rates entered in the schedule of rates of the division or at the rates mutually agreed upon between the Engineer-in-charge and the contractor whichever are lower. It the additional or altered work for which no rate is entered in the schedule of rates of the division is ordered to be carried out before the rates are agreed upon then the contractor shall within seven days of the date of

Rates for works not entered in estimate or schedule of rate of the district.

receipt by him of the order to carry out of the work, inform the Engineer-in-charge of the rate which it is his intention to charge for such class of work and if the Engineer-in-charge does not agree to this rate he shall by notice in writing be at liberty to cancel his order to carry out such class of work and arrange to carry out in such manner as he may consider advisable provided always that if the contractor shall commence work or incur any expenditure in regard there to before the rates shall have been determined as lastly hereinbefore mentioned, then in such case he shall only be entitled to be paid in respect of the work carried out or expenditure incurred by him prior to the date of the determination of the rate as aforesaid according to such rate or rates as shall be fixed by the Engineer-in-charge. In the event of a dispute the decision of Superintending Engineer of the circle will be final.

Where, however the work is to be executed according to the designs, drawings and specifications recommended by the contractor and accepted by the completed authority the alterations above referred to shall be within the scope of such designs drawings, and specifications appended to the tender.

The time limit for the completion of the work shall be extended in the proportion that increase in its cost occasioned by alterations or additions bears to the cost of the original contract work, and the certificate of the Engineer-in-charge as to such proportion shall be conclusive.

Extension of time in consequence of additions or alterations.

No claim to any payment or compensation.

Clause 15. (1) If any time after the execution of the contract documents the Engineer shall for any reason what-so-ever (other than default on the part of the contractor for which the Government is entitled to rescind the contract) desires that the whole or any part of the work specified in the tender should be suspended for any period or that the whole or part of the work should not be carried out at all he shall give to the contractor a notice in writing of such desire and upon the receipt of such notice the contractor shall forthwith suspend or stop the wholly or in part as required, after having due regard to the appropriate stage at which the work should be stopped or suspended so as not to cause any damage or injury to the work already done or endanger the safety thereof provided that the decision of the Engineer as to the stage at which the work or any part of it could be or could have been safely stopped or suspended shall be final and conclusive against the contractor. The contractor shall have no claim to any payment or compensation whatsoever by reason of or in pursuance of any notice as aforesaid, on account of any suspension, stoppage or curtailment except to the extent specified hereinafter.

(2) Where the total suspension of work ordered as aforesaid continued for continuous period exceeding 90 days the contractor shall be at liberty to withdraw from the contractual obligations under the contract so far as it pertains to the unexecuted part of the work by giving a 10 day's notice of such intention and requiring the Engineer to record the final measurement of the work already done and to pay final bill. Upon giving such notice the contractor shall be deemed to have been discharged from his obligations to complete the remaining unexecuted work under his contract. On receipt of such notice the Engineer shall proceed to complete the measurements and make such payment as may be final due to the contractor within a period of 90 days from the receipt of such notice in respect of the work already done by the contractor. Such payment shall not in any manner prejudice the right of the contractor to any further compensation under the remaining provisions of this clause.

Executive Engineer

- b) In case of discrepancy between percentage rate quoted in figures and words, the lower of the two will be considered for acceptance of tender.
- c) In all case of omissions and or doubts or discrepancies in the dimensions or description of any item of specification, a reference shall be made to the Executive Engineer
- d) The special provision in detailed specification and wording of any item shall again precedence over corresponding contradictory provision (if any) in the Standard Specifications of Public Works Department Hand Book where reference to such specification is given without reproducing the details in contract.

5. AGENT AND WORK ORDER BOOK:-

The contractor shall himself manage the work or engage an authorized all time agent on the work capable of managing and guiding the work and understanding the specifications and contract conditions. A qualified and experience. Engineer-in charge considers this is essential for the work & so directs contractors. He will take orders as will be given by the Executive Engineer or his representative and shall be responsible for carrying them out. This agent shall not be his representative and shall be responsible for carrying them out. This agent shall not be changed without prior intimation to the Executive Engineer and his representative on the work site the contractor shall supply to the Engineer the details of all supervisory and other staff employed by the Contractor and notify changes when made and satisfy the Engineer regarding the quantity and sufficiency of the staff, thus employed. The Engineer will have the unquestionable right to ask for changes in the quality and numbers of Contractor's supervisory staff and to order removal from work of any of such staff. The Contractor shall comply with such staff and to order removal from work of any of such staff. The Contractor shall comply with such orders and effect replacements to the satisfaction of the Engineer.

6. SETTING OUT:-

i) ROAD WORKS:-

6.1 The contractor shall establish working bench marks in the area soon after taking possession of the site. The reference Bench mark for the area shall be as indicated in the Contract Documents. The working bench marks/shall be at the rate of four per KM and also at or near all drainage structures, over bridge and underpasses. The working bench marks / levels should be got approved from the Engineer Checks must be made on these bench marks every month and adjustments if any got agreed with the Engineer and recorded. An up to date record of all bench marks including approved adjustment, if any shall be maintained by the contractor and also a copy supplied to the Engineer for his record.

6.2 The lines and levels of formation, side sloes, drainage, carriageways and shoulders shall be carefully set out and frequently checked, care being taken to ensure that correct gradients and cross sections are everywhere obtained.

6.3 In order to facilitate the setting out of the works, the centre line of the carriageway or highway must be accurately established by the contractor and approved by the Engineer. It must then be accurately referenced, in a manner satisfactory to the Engineer, every 50m intervals in plain and rolling terrain and 20m intervals in hilly terrain and in all curve points as directed by the Engineer, with marker pegs and change boards set in or near the fence-line and a schedule of reference dimension shall be prepared and supplied by the contractor to the Engineer. These markers shall be maintained until the work reach finished formation level and are accepted by the Engineer.

6.4 On construction reaching the formation level stage the centre line shall again be set out by the contractor and when approved by the Engineer shall be accurately referenced in a manner satisfactory to the Engineer by marker by marker pegs set at the outer limits of the formation.

6.5 No reference pegs or marks shall be moved or withdrawn without the approval of the Engineer and no earthwork or structural work shall be commenced until the centre line has been referenced.

6.6 The contractor will be the sole responsible party for safeguarding all survey movements, bench marks, beacons etc. The Engineer will provide the contractor with data necessary for the setting out of the centre line. All dimensions and levels shown on the drawings or mentioned in documents forming part of issued under the contract shall be verified by the contractor on the site and he shall immediately inform the Engineer of any apparent errors or discrepancies in such dimensions or levels. The contractor shall after or in connection with the setting out of the centre line, survey the terrain along the road and shall submit to Engineer for his approval a profile along the road centerline and cross sections at intervals as required by the Engineer.

6.7 After obtaining approval of the Engineer, work on earthwork can commence and the profile and cross sections shall form the basis for measurement and payment. The contractor is responsible for checking that all the basic traverse points are in place at the commencement of the contract and if any are missing, or appear to have been disturbed, the contractor shall make arrangements to re-establish these points.

A' survivor Files* containing the necessary data will be made available for this purpose, if in the opinion of the Engineer, design modifications of the centre line or grade are advisable, the Engineer will issue detailed instructions to the contractor and the contractor shall perform the modifications in the field, as required and modify the ground levels on the cross sections accordingly as many times as required. There will be no separate payment for any survey work performed by the contractor. The cost of these services shall be considered as being included in the cost of the items of work in the bill of Quantities.

6.8 The work of setting out shall be deemed to be part of general works preparatory to the execution of work and no separate payment shall be made for the same.

Contractor

No. of Corrections

Executive Engineer

ii) SETTING OUT FOR (BRIDGE WORKS) :-

Immediately on receipt of the work order, the contractor shall at his own expense clean the site and take up a provisional and final setting out and lining out of the work under the supervision of his responsible representative and shall provide necessary material, labour, tools, instruments etc. required for the same.

One tentative abutment location will be indicated by Engineer-in-charge and the center line or the bridge shall be defined by him. The contractor will then have to fix up the location of the adjusted. Once the final location of abutments is so finalized, it wills the contractor's responsibility to line out and locate the remaining foundations.

The contractor shall be responsible for true and proper setting out of the works and for the correctness of the positions, level dimensions and arrangements of all parts of works and for providing all necessary instruments appliances and labours in connection there with at his own cost. Officers may assist the contractor in proper setting out. Government instruments may be allowed to be used for setting out of work, for any errors arise in regard to levels or dimensions or alignment of any part of the work, rectification thereof on being required to do so, will be carried out by the contractor at his cost, unless such errors are based on incorrect data, supplied in writing by the Engineer or his authorized representative in which case the expensed of the rectification shall be refunded by Government.

The checking of any setting out or checking of levels by the Engineer or his authorized representative shall not in any way relieve the contractor of his responsibility for the correctness there of the contractor shall carefully protect and preserve all bench marks site rails, pegs and other things used in setting out of works.

RESPONSIBILITIES FOR LEVEL AND ALIGNMENT:-

The contractor shall be entirely and exclusively responsible for the horizontal and vertical alignment the levels and correctness of every part of the work and shall rectify effectual any errors or imperfections there in, such rectifications shall be carried out by the contractor at his own cost, when instruction are issued to the effect by Engineer-in-charge.

7. LEVELING INSTRUMENTS:-

If measurements of items of the work are based on volumetric measurement calculated from levels taken before and after construction of the item, a large number of leveling staves, tapes etc. in required numbers may cause delay in measurements and the work. The contractor will have therefore to keep sufficient number of these readily available at site.

8. AUTHORITIES OF THE-ENGINEER IN CHARGE'S REPRESENTATIVE:-

The duties of the representative of the Engineer-in-charge are to watch and supervise the work and to test and examine any material to be used or workmanship employed in connection with the works.

The Engineer-in-charge may from time to time, in writing delegate to his representative any powers and authorities vested in the Engineer-in-charge and shall furnish to the contractor a copy of all such delegations of powers and authorities. Any written instruction of approval given by the representative of the Engineer-in-charge to the contractor within the terms of such delegations (but not otherwise) shall bind the contractor and the department as though it had been given by the Engineer-in-charge, provide always as follow:

Failure of the representative of the Engineer-in-charge to disapprove any work or materials shall not prejudice the power of the Engineer-in-charge thereafter to disapprove such work or materials and so order the putting down, removal or breaking up thereof.

9. CO-ORDINATION:-

When several agencies for different sub-works of the project are to work simultaneously on the project site, there must be full co-ordination and co-operation between different contractors to ensure timely completion of the whole Project smoothly. The scheduled dates for completion specified in each contract shall therefore, be strictly adhered to Each contractor any make his independent arrangement for water, power, housing etc. if they so desire On the other hand the contractors are at liberty to mutual agreement in this behalf and make joint arrangements with the approval of the Engineer, No single Contractor shall take or cause to be taken any steps or action that may cause, disruptions discontent, or disturbance of work, Labour or arrangement etc. of other Contractor in the Project localities. Any action by any contractor which the Engineer in his unquestioned discretion may consider as infringement of the above code, would the Engineer in his unquestioned discretion may consider as infringement of the above code, would be considered as a breach of the Conditions and shall be dealt with as such.

In case of any dispute, disagreement between the contractors the Engineer's decision regarding the co-ordination, co-operation and facilities to be provided by any the contractors shall be final and binding on the contractors concerned and such a decision or decisions shall not vitiate any contract nor abortive the contractor (s) of his / their obligation under the contract not consider for the grant for any claim or compensation.

10. QUARRIES :-

10.1 No. Government quarries are available / with this department. The contractor(s) shall have to arrange the same he / themselves.

10.2 The quarrying operations snail is. Carried out by the Contractor with proper equipment such as compressors, jack-hammers drill bits, explosives etc. and sufficient number of workmen shall be employed so as to get required out turn.

10.3 The contractor shall carry out the works in the quarries in conformity with all the rules and regulations already laid down or that may be laid down from time to time by Govt. Any cost incurred by Governments due to non compliance of any rules or regulations or due to damages by the Contractor shall be the responsibility of the Contractor.

The Engineer-in-charge or his representative shall be give full facilities by the Contractor for inspection at all times of the working of the quarry records, maintained the stocks of the explosives and detonators etc., so as to enable him to check that the working records and storage are all in accordance with the relevant rules. The Engineer-in-charge or his representative shall at any time be allowed to inspect the work buildings and equipment at the quarters.

10.4 The Contractor shall maintain at his own cost the books, registers etc. required to be maintain under the relevant rules and regulations and as directed by the Engineer-in-charge These books shall be open for inspection at all times by the Engineer-in-charge or his representative and the Contractor shall furnish the copies or extracts or books or registers as and when required.

10.5 All quarrying operations shall be carried out by the contractor in organized and expeditions manner, systematically and with proper planning. The Contractor shall engage linked blaster and adopt electric blasting and/or any other approved method which would ensure complete safely to all the men engaged in the quarry and its surrounding. The Contractor shall himself provide suitable magazines and arrange to procure and store explosives etc. as required under the rules at his own cost. The designs and the location of the magazine shall be got approved in advance from the Chief inspector of Explosives and the rules and regulations in this connection as laid down by the Chief Inspector of Explosive from time to time shall be strictly adhered to by the Contractor. It is generally experienced that it takes time to obtain the necessary license for blasting and license for storage of materials from the concerned authorities the contractor must therefore take timely advance action for procuring all such licensor so that the work progress may not be hampered.

10.6 The approached to the quarrying place from the existing public roads shall have to be arranged by the Contractor at his own cost ant the approaches shall be maintained by the Contractor at his own cost till the work is over.

10.7 The quarrying operations shall be carried out by the Contractor to the entire satisfaction of the Engineer-in-charge and the development of the quarry shall be made efficiency so as to avoid stage of stones. Only such stones are of the required quality shall be used on the work. Any stone which is in the opinion of the Engineer-in-charge, not in accordance with the specification or of required quality will be register at any time at the quarry or at the site of work. The rejected stones shall not be used on the work and such rejected materials shall be removed to the place shown at the Contractor's cost.

10.8 Since all stones quarried from Government quarry (it made available) by the Contractor including the excavated over burden are the property of the Govt. No stones or earth shall be supplied by the Contractor to any other agencies or works are allowed to be taken away for any other works. All such surplus quarried materials not required for work under this contract shall be the property of the Govt. and shall be handed at the spots indicated by the Engineer-in-charge. The Contractor will be entitled to the refund or royalty if any paid by him for such quantity handed over to Govt. for which necessary certificate will

be issued by Executive Engineer as per usual procedure. If however, the Government does not require such surplus material, the contractor may be allowed to dispose off or use such materials elsewhere with prior written permission of the Engineer-in-charge. Leaving off a quarry face or opening of a new quarry face shall be done only on the approval of the Engineer-in-charge.

10.9 Quarrying permission will have to be directly obtained by the Contractor, from the Collector of the District concerned for which purpose the department will render necessary assistance. All quarry fees, royalty charges, octroi duties, ground rent for stacking materials etc. if any to be paid, shall be paid directly by the Contractor as per rules in force. The Contractor will however be entitled to a refund of part of such charges as are admissible under rules as maintained elsewhere in this contract, after obtaining a certificate from the Engineer-in-charge that material was required for use on Government works.

10.10 The Contractor will be permitted to erect at his own risk and cost at the quarry site if suitable vacant space in government area is available for the purpose, his own structures for stores, offices, etc. at places approved by the Engineer-in-charge. On completion of the work the contractor shall remove all the structure erected by him and restore the site to its original condition.

10.11 The contractor shall not use any land in the quarry either for cultivation or for any other purpose except, that required for breaking or stacking or transporting stones.

11. TREASURE-TROVE :-

In the event of discovery by the contractor or his employees, during the progress of the work of any treasure, fossils, minerals or any other articles of value or interest, the contractor shall give immediate intimation thereof to the Engineer and forthwith hand over to the Engineer such treasure or things which shall be the property of Government.

12. EXPLOSIVE :-

The contractor shall at his own expense construct and maintain proper magazines if such are required for the storage of explosives for use in connection with the work and such magazine being situated, constructed and maintained in accordance with the Government Rules applicable in the behalf. The contractor shall at his own expenses obtain such license of licenses may be necessary for storing and using explosives. Notwithstanding that the location etc. or storage of explosives are approved by the Engineer, the Government, shall not be incurring any responsibility whatever in connection with storage and use of explosives on the site or any accident or occurrence whatsoever in connection, there with, all operations in or for which explosive are employed being at the risk of the contractor and upon his sole responsibility and the contractor hereby gives to Government an absolute indemnity in respect thereof.

13. DAMAGE BY FLOODS OR ACCIDENTS :-

The contractor shall take all precaution against damage by floods or like or from accident etc. No compensation will be allowed to the contractor shall be liable to make good at his cost any plant or material belonging to the Government lost or damaged by flood or from any other case which is in his charge.

14. POLICE PROTECTION :-

For the Special Protection of camp and of the Contractor work, the Dep't. Will help the contractor as far as possible to arrange for such protection with concerned authorities, if so required by the Contractor in writing. The full cost of such protection shall be borne by the contractor.

15. TRAFFIC REGULATION FOR ROAD WORKS :-

15.1 Unless separately provided for in the contract. The Contractor shall have to make all necessary arrangement for regulating traffic, day & night during the period of construction to the entire satisfaction of the Engineer. This includes the construction and maintenance to diversions if necessary. The contractor shall have to provide necessary caution boards, barricades, flags, lights and watchmen etc. so as to comply with the latest Motor Vehicles rules and regulation and for traffic safely and he shall be responsible for all claims from accidents which may arise due to his negligence whether in, regulating the traffic or in stacking materials on roads, or due to any other reasons.

15.2 The Contractor shall at all times carry out the work on the road in the manner creating least in interference to the flow of traffic, while consistence with the satisfactory execution of the same, for all works involving S/Rs to the existing road, the contractor shall, in accordance with the directives of the Engineer-in-charge, provide and maintain, during the execution of work a passage for traffic, either along or part of the existing carriageway under S/R or along a temporary diversion constructed close to the road.

15.3 TRAFFIC REGULATION FOR BRIDGES AND C.D. WORKS :-

It is to clearly understood that whatever work carried out by the Contractor for construction of diversion road including earthwork, W.B.M. bituminous surface dressing R.C.C. pipe drains etc. will be paid for only once if due to flow of traffic, due to floods or do to any other cause, this diversion road and for the R.C.C. drain gets damaged it shall be repaired and maintained by the contractor in good condition till completion of the whole work at his own expenses.

16. SUPERVISION AND INSPECTION OF WORKS AND QUALITY CONTROL :-

16.1 SUPERVISION :-

The contractor shall either himself supervise the execution of the works or shall appoint the competent agent approved by the Engineer-in-charge to act on his behalf. If in the opinion of the Engineer-in-charge, the contractor has himself no sufficient knowledge and experience of receiving instruction or cannot give his full attention to the works, the contractor shall at his own expenses employ as his accredited agent a qualified Engineer approved by the Engineer-in-charge orders given to the contractor's agent shall be considered to have the force as if there had been given to the contractor himself, if the contractor fails to appoint suitable agent as directed by Engineer-in-charge, the Engineer-in-charge shall have full power to suspend the execution of the work until such date a suitable agent is appointed and the contractor shall be responsible for the delay so caused

to the works and the contractor shall be entitled for any compensation on this behalf.

16.2 INSPECTION :-

The contractor shall inform the Engineer-in-charge in writing when any portion of the work is ready for inspection giving him sufficient notice to enable him to inspect the same without effecting the further progress of the work. The work shall not be considered to have been completed in accordance with the terms of the contract until the Engineer-in-charge shall have certified in writing to the effect / approval of materials or workmanship or approval of part of the work during the progress of execution shall not bind the Engineer-in-charge or in any way affect him even to reject the work which is alleged to be completed and to suspend the issue of his certificate of completion. Until such alteration and modification or reconstruction have been effected to his satisfaction.

The contractor shall provide at his cost necessary ladders and such arrangements as to provide necessary facilities and assistance for proper inspection of all parts of the work at his own cost.

17. INITIAL MEASUREMENT FOR RECORD :-

Where, for proper measurement of the work. It is necessary to have an initial set of levels or other measurements taken, the same as recorded in the authorized field book or measurement book of Government by the Engineer or his authorized representative will be signed by the contractor who will be entitled to have a true copy of the same made at his cost. Any failure on the part of the contractor to get such levels etc. recorded before starting the work will render him liable to accept the decision of the Engineer as to the basis of taking measurement. Difficult or impossible without first getting the same jointly measured by himself and the authorized representative of the Executive Engineer. The record of such measurements on the Government side will be signed by the contractor and he will be entitled to have a true copy of the same made at his cost.

18. SAMPLES AND TESTING OF MATERIAL :-

i) All materials to be issued on work shall be got approved in advance from the Engineer-in-charge and shall pass the test and / or analysis required by him which will be :-

- a) As specified in the specification for the items concerned and / or
- b) I.S.I. Specifications (whichever and wherever applicable) or
- c) Such recognized specifications acceptable to Engineer-in-charge as equivalent there to or in absence of such authorized specifications.
- d) Such requirement test and / or analysis as may be specified by the Engineer-in-charge in order of precedence given above.

ii) The contractor shall at his risk and cost make all arrangements & / or shall provide for all such facilities as the Engineer-in-charge may require for collecting preparing required number of samples for tests or for analysis at such time & to such place or places as may be directed by the Engineer and bear all charges & cost of testing. Such samples shall also be deposited with the Engineer-in-charge.

iv) The contractor shall not be eligible for any claim or compensation either arising out of any delay in the work or due to any corrective measures required to be taken on account of and as a result of testing of the materials.

v) The contractor or his authorized representative will be allowed to remain present in the departmental laboratory while testing samples furnished by him. However the results of all the tests carried out in the departmental laboratory in the presence or absence of the contractor or his authorized representative will be binding on the contractor.

vi) The contractor shall at his own set up laboratory to carry out the routine tests of materials which are to be used on the work. The test will have to be carried out either in his field laboratory or in an approved laboratory. In case tests are carried out in field laboratory, at least 50% tests should be carried out in nearest quality control laboratory of the Department.

vii) In case of materials procured by the contractor, testing as required by the codes and specifications shall be arranged by him at his own cost. Testing shall be done in the presence of authorized representative of the Engineer-in-charge at the nearest approved laboratory. If additional testing other than as required by specification is ordered, the testing charges, shall be borne by the Department, if the test results are satisfactory and by the contractor if the same are not satisfactory.

viii) In case of materials supplied by the Government, if the contractor demands certain testing, the charges there of shall be paid by the contractor if the testing results are satisfactory and by the department if the same are not satisfactory.

19) CHANGES OF CEMENT CONTENT ETC. :-

The tendered rates for any item, involving the use of cement, shall apply to the quantity of cement specified for the mix for the item in the specification. If for any reasons except those required for compensating the deficiencies, in the components, the cement content and properties are altered by the Engineer (Engineer-in-charge) at any time or from time to time the tendered rates for that properties item and quantity or quantities, shall be duly enhanced or reduced only to account for the addition or reduction in cost of the cement content from that laid down in the specification at the rates specified in the schedule 'A' of the contract plus 10% to cover all other incidental charges whatsoever likewise if any additives compounds water proofing materials etc. are ordered by Engineer to be added to the mortar or concrete, no extra rate shall be payable for this change which shall be carried out as per directions of the Engineer-in-charge, provided cost of such additives etc. is borne by Government or these are supplied free of cost contractor at site by Government.

20. MEDICAL AND SANITARY ARRANGEMENTS TO BE PROVIDED FOR LABOUR EMPLOYED IN THE CONSTRUCTION BY THE CONTRACTOR:-

- a) The contractor shall provide an adequate supply of portable water for the use of labours on work and in camps.

- b) The contractor shall construct trench or semi permanent latrines for the use of the laborers, Separate latrines shall be provided for men and women.
- c) The contractor shall build sufficient number of huts on a suitable plot of land for use of the Labourers according to the following specifications.
 - 1. Huts of Bamboos and grass may be constructed
 - 2. A good site not liable to submergence shall be selected on high ground remote from jungle but well provided with trees, shall be chosen wherever it is available. The neighborhood of tank, jungle, grass or woods should be particularly avoided Camps should not be established close to large cuttings of earth work.
 - 3. The lines of huts shall have open spaces of at least ten yards between rows. When a good natural site cannot be procured, particular attention should be given to the drainage.
 - 4. There should be no over crowding. Floor space at the rate of 30 Sq Ft. per head shall be provided. Care should be taken to see that the huts are kept clean and in good order.
 - 5. The contractor must find his own land and if he wants Government land, he should apply for it and pay assessment for it, if made available by Government.
 - 6. The contractor shall construct a sufficient number of bathing places. Washing places should also be provided for the purpose of washing clothes.
 - 7. The contractor shall make sufficient arrangements for draining away the surface and sewage water as well as water from the bathing and washing places and shall dispose off this waste water in such way as not to cause any nuisance.
- d) The contractor shall engage a Medical Officer with a traveling dispensary for a camp containing 5. Or more persons if there is no Govt. or other private dispensary situated within 8 kilometers from the camp. In case of emergency the contractor shall arrange at his cost for transport for quick medical help to his sick worker.
- e) The contractor shall provide the necessary staff for effecting a satisfactory drainage system & cleanliness of the camp to the satisfaction of the Engineer. At least one sweeper per 200 persons should be engaged.
- f) The assistant Director of Public Health shall be consulted before opening a labour camp and his instruction on matters such as water supply, sanitary conveniences, the camp site accommodation and food supply shall be followed by the contractor,
- g) The contractors shall make arrangements for all anti-malaria – measures to be provided for the Labour employed on the work. The anti-malaria measure shall be provided as directed by the Assistant Director of Public Health.

21. SAFELY CODE :-

Suitable Scaffolds shall be provided for workmen for all works that cannot safely be done from the ground from solid construction except such short period work as can be done safely from ladders. When ladder is used an extra mazdoor shall be engaged for holding the ladder and If the ladder is used for carrying materials as well, suitable footholds and handholds shall be provided on the ladder shall be given an inclination not steeper than 1 to 4 (1 horizontal and 4 vertical).

Scaffolding of staging more than 3.25m above the ground of floor, swing or suspended from an overhead support or erected with stationary supports, shall have a guard rail properly attached bolted, braced and otherwise assured at least 1m high above the floor a platform of such scaffolding or staging and extending along the entire length of the outside and ends there of with only such openings as may be necessary the delivery of materials, such scaffolding or staging so fastened as to prevent it from swaying from the building or structure

Working platform, gangways, and stairways shall be so constructed that they do not sag unduly or is more than 3.25m above ground level or floor level. If shall be closely boarded, have adequate width and suitable fenced as described in 2 above.

Safe means of access shall be provided to all working platform and other working places Every ladder shall be securely fixed. No portable single ladder shall be over 9m in length, width between side rails in a rung ladder shall is no case be less than 30cms for ladders up to and including 3m length for longer ladders this width shall be increased at least 6 mm for each additional 30 Cms. of length. Uniform step spacing shall not exceed 30 Cms.

Adequate precaution shall be taken to prevent danger from electrical equipments. No materials on any of the site shall be stacked or placed as to cause danger or inconvenience to any person or the public. The contractor shall provided all necessary fencing and lights to protect public from accidents and shall be bound to bear expenses of defense or every suit, action or other proceedings at law that may be brought by any person for injury sustained owing to neglect of the above precaution and to pay damages and costs which may be awarded in any such suit action or proceedings to any such person or which may with the consent of the contactor, to be paid to compromise any claim by any such person.

EXCAVATION AND TRENCHING :-

All trenches, 1.5 meters or more in depth, shall at all times be supplied with at least one ladder for each 30 meters in length or fraction thereof, Ladder shall be extended from bottom of trench to at least 1 meter above surface of the ground, sides of a trench which is 1.5 meters or more in depth shall be stepped back to give suitable slope, or security held by timber branching. So as to avoid the danger of sides collapsing Excavated materials shall not be placed with 1.3 meters of edge of trench or half of depth or trench whichever is more. Cutting shall be done from top to bottom under no circumstances shall undermining or undercutting be done.

DEMOLITION :-

Before any demolition work is commenced and also during the process of the work,

- a) All roads and open areas adjacent to the site shall either be closed or suitably protected.
- b) No electrical cable or apparatus which is liable to be a source of danger or a cable or apparatus used by operator shall remain electrically charged.
- c) All practical steps shall be taken to prevent danger to person employed from risk of fire or explosion or hooding. No floor, roof or other part of building shall be so overloaded with debris of materials as to render it unsafe.

All necessary personal safety equipments as considered adequate by the Engineer-in-charge are available for use of persons employed on the site and maintained in condition suitable for immediate use and contractor shall take adequate step to ensure proper use of equipment by those concerned.

- a) Workers employed on mixing asphaltic materials cement and lime mortars concrete shall be provided with protective footwear and protective goggles.
- b) Those engaged in handling any materials which is injurious to eyes shall be provided with protective goggles.
- c) Those engaged in welding works shall be provided with welder's protective eye shields.
- d) Stone breakers shall be provided with protection, goggles and protective clothing and seated at sufficiently safe intervals.
- e) When workers are employed in sewers and manholes which are in use, the contractor shall ensure that manhole covers are opened and manholes are ventilated at least for an hour before workers are allowed to get into them. Manholes opened shall be cordoned off with suitable railing and provided with warnings signals or boards to prevent accident to public.
- f) The contractor shall not employ, men below the age of 18 and women on the work of painting with products containing lead in any form wherever men above the age of 18 are employed on the work of lead painting the following precautions shall be taken.
 - i) No Paint containing lead or lead product shall be used by used except in the form of paste or readymade paint.
 - ii) Every rope used in hoisting or lowering materials or as means of suspension shall be of durable quality and of adequate strength and free from potent defects.
 - iii) Overalls shall be supplied the contractor to workman and adequate facilities shall be, provided to enable working painters to wash during and on cessation of work.
- g) When work is done near and place where there is risk of drowning all necessary equipment shall be provide and kept ready for use and all necessary steps taken for prompt rescue of all injuries likely to be sustained during the course the course of the work.

- a) These shall be of good mechanical construction, sound materials and adequate strength and free from potent defects and shall be kept in good repair and in good working order.
- ii) Every rope used in hoisting or lowering materials or as a means of suspension shall be of durable quality and of adequate strength and free from potent defects.
- b) Every crane driver pre-hoisting appliance operator shall be properly qualified and no person under the age of 21 years shall be in charge of any hoisting machine including any scaffolding.
- c) In case of every hoisting machine and of every chain ring hook shackle ownel and pulley block used in hosting of lowering or as means of suspension safe working load shall be ascertained by adequate means. Every hoisting machines and all gear referred to above shall be plainly marked with safe working loads.

In case of hoisting machine having a variable safe working load, each safe working load and conditions under which it is applicable shall be clearly indicated. No part of any machine or of any gear referred to above in this paragraph shall be loaded beyond safe working load except for the purpose of testing.

- d) In case of departmental machines safe working load shall be notified by the Engineer-in-charge. As regards contractor machines the contractor shall notify safe working load of each machine to the Engineer-in-charge whenever, he brings it to site of work and get it verified by the Engineer-in-charge.

Motors, gearing, transmission, electric wiring and other dangerous parts of hoisting appliances shall be provided with such means as will reduce to the minimum the risk of accidental descent of load. Adequate precaution shall be taken to reduce to the minimum the risk of any part of a suspended load becoming accidentally displaced, when workers are employed. On electrical installations which are already energized insulating material wearing approved such as gloves, sleeves and coats as may be necessary shall be provided. Workers shall not wear any rings, watches any, carry keys of their materials which are good conductors of electricity.

All Scaffolds, ladders, and other safety devices mentioned or described herein shall be maintained in a safe condition and no scaffold or equipment shall be altered or removed while it is in use. Adequate washing facilities shall be provided at near places of work.

These safety provisions shall be brought to the notice of all concerned display on a notice board at prominent place at the work spot. Persons responsible ensuring compliance with the safety code shall be named there by the contractor.

- i) To ensure effective enforcement of the rules and regulations relating to safety precautions, arrangements made by the contractor shall be open to inspection by the Engineer-in-charge or his representatives and the inspecting officers.

ii) Failure to comply with the provision hereunder shall make the contractor liable to pay to the Department as penalty an amount not exceeding Rs. 50/- for each default and decision of the Engineer-in-charge shall be final and binding.

Notwithstanding the above conditions 1 to 14 the contractor is not exempted from the operation of the order Act or rules in force.

22. PAYMENTS :-

a) Running Bills:-

Two payments in a month will be granted by the Engineer-in-charge if the progress is satisfactory. Contractor should submit bills to the Engineer-in-charge in appropriate forms.

b) Final Bills:-

The contractor should submit final bill within one month after completion of work and the same will be paid within 3 months if it is in order. Disputed items and claims, if any, shall be excluded from the final bill and settled separately after later on.

23. HANDING OVER OF WORK :-

All the working and materials before finally taken over by Government will be the entire liability of the contractor for guarding. Maintaining and making good any damages of any magnitude. Interim payments made for such work will not alter this position. The handing over by the Contractor and taking over by the Executive Engineer or his authorized representative will be always in writing of which copies will go to the Executive Engineer or his authorized representative and the contractor, it is however understood that before taking over such work Government will not put into regular use as distinct from casual or incidental one, except as specifically mentioned elsewhere in this contract or as mutually agreed to.

24. CLAIMS :-

Bills for extra work or for any claim shall be paid separately apart from the interim bill for the main work. The payment of bills for the main work shall not be withheld for want of decision on the extra or claims not covered in the appendices.

Claims for extra work shall be registered with 30 days of occurrence of the event. However, bills for these claims including supporting data / details may be submitted subsequently.

25. Procurement of R.C.C. Pipe :-

The R.C.C. pipes required for the work shall be procured from the MSSIDC only. The payment toward providing and fixing NP2 / NP3 / NP4 Pipes will be released only after the contractor submits the bills of MSSIDC to authenticate that the pipes have been purchased from the MSSIDC. No payment towards the item of providing & laying of the pipe will be released in absence of the submission of requisite documents.

ANNEXURE-I**QUALITY CONTROL TESTS & THEIR FREQUENCIES**

Sr.No.	Material	Test	Frequency of Testing	Remarks
1	Sand	i) Fineness Modules	At the beginning & if there is change in source	
2	Metal	i) Crushing Value	One test per 200 Cum or part hereof	P.W.D. hand book I.S.2386 Part -IV
		ii) Impact Value		
		iii) Abrasion Value		
		iv) Water Absorption		
		v) Flakiness Index		
		vi) Stripping value		
		vii) Gradation		
3	Cement Concrete	Compressive Strength	Upto 5 Cum – 1 set	M.O.R.T.& H. Specification. 1716 (Fourth revision 01)
			6-15 – 2 sets	
			16-30 – 3 sets	
			31-50 – 4 sets	
			51 & Above – 4 sets + 1 additional 50 Cum or part thereof	
4	Cement	i) Compressive Strength	One test for each consignment of 50 MT (1000 bags) or part thereof.	I.S. 8112 - 1989
		ii) Initial Setting Time		
		iii) Final Setting Time		
		iv) Specific Gravity		
		v) Soundness		
		vi) Fineness		
5	Steel	i) Weight per meter	One test for every 5.0 M.T. or part thereof for each diameter.	I.S. 432 IS 1786-1985
		ii) Ultimate Tensile Stress		
		iii) Yield Stress		
		iv) Elongation		
6	Granular Sub-Base	i) Gradation	One test per 200 cum	MORT&H specification Table 900-3 (Fourth Revision 2001)
		ii) Aturberg limits	One test per 200 cum	
		iii) Moisture content prior to compaction	One test per 250 cum	
		iv) Density and compacted layer	One test per 500 Sqm	
7	Water Bound Macadam	i) Aggregate impact value	One test per 200 cum	MORT&H specification Table 900-3 (Fourth Revision 2001)
		ii) Gradation	One test per 100 cum	
		iii) Flakiness index & Elongation index.	One test per 200 cum	
		iv) Atterberg limits of binding material.	One test per 25 cum of binding material.	
		v) Atterberg limits of portion of aggregates passing 425 Micron.	One test per 100 cum of aggregate	
8	Prime coat/tack coat/ for spray	i) Quality of Binder	No.of samples per lot and tests as per I.S. 73 I.S. 217 and I.S. 8887 as applicable.	MORT&H specification Table 900.4 (Fourth Revision 2001)

Contractor

No. of Corrections

Executive Engineer

		ii) Binder Temperature	At regular close intervals,	
		iii) Rate of spread of binder.	1 test per 500 sqm. and not less than two tests per day.	
9	Seal coat/ Surface Dressing	i) Quality of Binder	Same as mentioned under Sr.No.8	MORT&H specification Table 900.4 (Fourth Revision 2001)
		ii) Impact Value/Los Angle's Abrasion value	1 test per 50 cum of aggregate.	
		iii) Flakiness & Elongation Index	1 test per 50 cum.	
		iv) Stripping value of aggregate (Immersion tray test)	Initially 1 set of 3 representative specimen for each source of supply subsequently when warranted by change in the quality of aggregates.	
		v) Water Absorption		
		vi) Water sensitivity of mix (if required)		
		vii) Gradation.	1 test per 25 cum	
		viii) Soundness.	Initially one determination by each method for each source of supply, then as warranted by change in the quality of aggregate.	
		ix) Temp. of binder	At regular close intervals,	
		x) Rate of spread of materials	1 test per 500 Sqm. and not less than 2 tests per day.	
		xi) Percentage of fractured faces	When gravel is used. One test per 50 cum.,.	
10	Open graded premix surfacing/ Close graded premix surfacing	i) Quality of Binder	Same as per Sr.No.8	MORT&H specification Table 900.4 (Fourth Revision 2001)
		ii) Impact Value/Los Angle's Abrasion value	Same as per Sr.No.9	
		iii) Flakiness & Elongation Index	Same as per Sr.No.9	
		iv) Stripping value	Same as per Sr.No.9	
		v) Water Absorption	Same as per Sr.No.9	
		vi) Water sensitivity of mix	Same as per Sr.No.9	
		vii) Gradation.	Same as per Sr.No.9	
		viii) Soundness.	Same as per Sr.No.9	
		ix) Temp. of binder	At regular close intervals,	

		x) Binder content	1 test per 500 Sqm. and not less than 2 tests per day.	
		xi) Rate of spread of materials	Regular control through checks of layer thickness.	
		xi) Percentage of fractured faces	Same as per Sr.No.9	
11	Bituminous Macadam/BBM	i) Quality of Binder	Same as per Sr.No.8	MORT&H specification Table 900.4. (Fourth revision 2001) Fo BBM-Annexure-A on page 102.
		ii) Impact/ Abrasion value	Same as per Sr.No.9	
		iii) Flakiness/ Elongation Index	Same as per Sr.No.9	
		iv) Stripping value	Same as per Sr.No.9	
		v) Water sensitivity of mix	Same as per Sr.No.9	
		vi) Water absorption	Same as per Sr.No.9	
		vii) Soundness	Same as per Sr.No.9	
		viii) Percentage of fractural faces	Same as per Sr.No.9	
		ix) Gradation	2 tests per day per plant both on individual constituents and mixed aggregates from dryer.	
		x) Binder content & aggrt. Grading	Periodic subject to minimum of 2 tests per day plant.	
		xi) Control of temp of binder & aggregates for mixing & of the mix at the time of laying & rolling.	At regular close intervals.	
		xii) Density of compacted layer	Regular control through check of layer thickness. As directed by the Engineer-in-charge.	
12	Bitumen (Pure)	i) Penetration ii) Ductility iii) Softening point iv) Flash/fire point v) Specific gravity	2 test per lot as per I.S. 73	

ANNEXURE-II

SPECIFICATION FOR BITUMINOUS BOUND MACADAM

Item: Providing and constructing 75 mm/ 50 mm thick bituminous bound macadam (BBM) road surface including all materials, preparing the existing road surface, spreading 40 mm stone metal lexicess 30% crusher broken metal + 70% hand broken (by breaking rubber obtained, by blasting) heating and spraying the bitumen 60/70@ 2 kg/sqm, spacing 12 mm size chips, compacting with static roller.

1) General :

The work consists of supply of materials and labour required for providing and laying bituminous bound macadam surface for compacted thickness of 75mm/50mm. The item includes preparing the existing road surface to receive the bituminous bound macadam course i.e. picking the existing W.B.M. surface or application of tack coat on existing B.T. surface spreading of 40mm size metal layer in required thickness with compaction with power roller, heating and spraying bitumen with required thickness with compaction with power roller heating and spraying bitumen with sprayer etc. spreading key aggregates, 12 mm. chips, and final compaction with power roller, etc. complete and finishing in accordance with the requirement of and in close conformity with grades, lines, cross section and thickness as per approved drawings etc. complete.

2) Diversions:

Temporary diversions shall be constructed and maintained by the contractor at his own cost. Diversions shall be watered if dust is likely to blow on to the road being Bituminised.

3) Materials :

(A) Aggregates: The aggregates for providing B.B.M. surface shall comply with specification Nos. Rd.41 for 40 mm and 12 mm size metal, and shall normally comply with the following regarding to size and quality of aggregate and grade and quantities of bitumen.

Sr. No.	Description	Rate of application for 100 sqmt.			
		75 mm		50 mm	
		On asphalt surface	On WBM Surface	On asphalt surface	On WBM Surface
a)	40 mm size hand broken metal	9.00 Cum	9.00 Cum	6.00 Cum	6.00 Cum
b)	12mm size chips	1.80 Cum	1.80 Cum	1.20 Cum	1.20 Cum
c)	Bitumen for grouting I.S. penetration or S.65 with (60/70 grade)	200 Kg	200 Kg	175 Kg.	175 Kg.

Contractor

No. of Corrections

Executive Engineer

	penetration				
d)	Tack coat for existing Bitumen surface with 60/70 bitumen	50 Kg	-	50 Kg	-

Note : 70% Hand broken metal and 30% crusher broken metal of total quantity for 40 mm size metal shall be used.

(B) Bitumen :

The bitumen shall be paving bitumen of suitable penetration grade within the range S-35 to S-65 i.e. 60/70 as per Indian Standards Specifications for "Paving Bitumen" IS 73-1992.

4) Preparation of Base:

Any pot holes in the existing bituminous road surface and broken edges shall be patched well and the surface shall be brought to correct level and camber with additional metal and bitumen as required which will be paid separately. Before starting the work the bituminous surface shall be swept clean of all the dirt, mud cakes, animal droppings & other loose foreign material.

If so required by the Engineer, the contractor shall keep the side width & nearby diversion watered to prevent dust from blowing over the surface to be bituminous. Existing water bound macadam surface shall be picked for and surface loosened for a dept of 2.5 cm and the picked surface shall be brought approximately to the correct camber and section Edge line shall be correctly marked by dog belling the surface to form a continuous the notch.

There shall always be sufficient length of prepared surface ahead of the bituminous surfacing operations as directed by the Engineer to keep these operations continuous.

5) Tack Coat on bitumen surface:

Applying tack coat for existing B.T. surface only at the rate of 50 kg/100 m² as per specification No. Rd-47.3.3.

6) Picking of existing W.B.M. Surface :

Picking of existing W.B.M. surface for receiving bituminous bound macadam as per Rd. 33.

7) Spreading and Compaction

7.1 Spreading of 40 mm metal (70% Hand broken & 30% crusher broken):- 40 mm metal shall be spreaded evenly at the specified rate of 9 cubic metres/6 cubic metre per 100 squares of area so as to form a layer over the width of road with correct camber/super elevation as required. Any foreign matter, organic matter, dust, grass etc. shall be removed immediately. The sections shall be checked with camber board

and straight edge batten etc. Any irregularities shall be made good by adding aggregates in case of depressions and removing aggregates from high spots.

- 7.2 Compaction of 40mm size metal :-** The surface of 40 mm metal layer after bringing to necessary grades and sections shall be rolled with the use of 8 to 10 tonnes power roller. Roller shall commence from the edges and progress toward the centre longitudinally except on super elevation portion it shall progress from the lower to upper edges parallel to the centre line of pavement. Whether the roller has passed over the whole area and high spot or depressions which become apparent shall be corrected by removing or adding aggregates. The rolling shall then continued till the entire surface has been rolled to desired compaction such that there is no crushing of aggregates and all roller marks have been eliminated. Each pass of roller shall uniformly overlap not less than one third of the track made in the preceding pass.
- 8) Application of Bitumen :**
Bitumen of I.S. grade supplied for the work shall be heated to temperature of 177 Celsius to 191 Celsius (350 F to 375 F) in a bitumen boiler and temperature shall be maintained at the time of actual application. The hot bitumen shall be applied through a pressure on the road surface uniformly at the rate of 200 kg. Per 100 sqm. The road surface shall be divided into suitable rectangles marked by chalk so as to ensure correct rate of application of the bitumen.
- 9) Key Aggregates:**
On Completion of bitumen application, 12 mm size key aggregates shall be spread immediately at a uniform rate of 1.8 cubic meters/ 1.2 cubic meters per 100 sqm. of area when entire surface in hot condition Brooms shall be used to ensure even distribution of key aggregates.
- 10) Final Compaction:**
Immediately after spraying of bitumen and spreading of key aggregates, the surface shall be rolled with a power roller to obtained full compaction and to force the blindage of key aggregates in to the interstice of the course aggregate. The rolling shall continue till the asphalt surface hardens and key aggregates stop moving under power roller.
- 11) Surface Finish and Quality Control:**

THE SURFACE FINISH SHALL CONFORM TO REQUIREMENTS OF CLAUSE 902 OF SPECIFICATION FOR ROADS AND BRIDGES BY MINISTRY OF SURFACE TRANSPORT (COPY ENCLOSED) QUALITY CONTROL TEST AND THEIR FREQUENCIES SHALL BE AS PER TABLE BELOW.

Sr.No.	Test	Frequency
1	Quality of binder	Two samples per lot to be subjected to all or some test as directed by the Engineer.
2	Aggregate Impact Value	One test per 200 cubic meter of aggregate.
3	Flankiness Index and Elongation Index	One test per 200 cubic meter of aggregate.
4	Stripping value	Initially one set of three representative

Contractor

No. of Corrections

Executive Engineer

		specimen for each source of supply subsequently when warranted by changes in the quality of aggregate.
5	Water absorption of aggregates	Initially one set of three representative specimen for each source of supply subsequently when warranted by changes in the quality of aggregate.
6	Aggregate grading	One test per 100 cubic meter of aggregate
7	Temperature of binder at application	At regular close intervals.
8	Rate of spreading for binder.	One test per 500 square meter of area.

12) Item to Include:

I) DIVERSIONS UNLESS SEPARATELY PROVIDED IN THE TENDER

- ii) Preparing the road surface.
- iii) Applying tack coat on existing B.T. or picking the existing W.B.M. surface.
- iv) Supplying spreading and compaction of 40 mm and 12 mm size aggregate.
- v) Supplying, heating and spraying of bitumen.
- vi) Supplying and spreading and compaction of 12 mm size chips (By Power roller.
- vii) All labour, materials, including bitumen and aggregates used of tools, plants and equipment for completing the item satisfactorily.

13) Mode of Measurement and Payment.

The contract rate shall be for 1.00 Sqm. The measurements shall be for the width of the road as executed, limiting it to the width specified or as ordered by the Engineer and the length measured along the centerline. The measurement dimensions shall be recorded correct upto two places of decimals of a meter and the area worked out correct upto one place of decimal of a Sqm.

ANNEXURE-III

SPECIFICATIONS FOR TRAFFIC SAFETY MEASURES DURING WIDENING OF ROADS WHERE TRAFFIC CAN BE PASSED OVER PART WIDTH

Providing Traffic Safety Measures on Road during Widening of roads comprising of Traffic Sign Boards and devices as per detailed design, drawing, specification and as directed by Engineer-in-charge.

SPECIFICATIONS :-

The item includes providing traffic safety arrangements required for traffic control near has stretch of road where widening work is being taken up, before actual start of widening work of road. The contractor will have to provide the traffic safety arrangements as per the detailed drawing. The traffic safety arrangements will have to be got approved from the Engineer-in-charge by the Contractor before taking any construction activities for Widening of works.

The Engineer-in-charge shall get himself satisfied about the traffic safety arrangement provided on the work site before allowing contractor to dismantle the existing structure and a certificate to get effect shall be recorded in the Measurement Book.

Executive Engineer

- A) The Sign No. 1 "SPEED LIMIT (20)" shall be placed at a distance of 120 m away from the point where the transition of carriageway begins. The Sign Board shall be of size 60 cm dia. Having white background and red border and the numericals shall be in black colour as per IRC 67-1977. Distance between Sign No.2 shall be minimum 20 m.
- B) The Sign No.2: "NARROW ROAD AHEAD" shall be placed at a distance of 80 m away from the point where transition of carriageway starts. The Sign board shall be of an equilateral triangle of size 90 cm. having white background. Retro reflective border in Red colour and non reflective symbol of black colour as per IRC: 67-1977.
- C) The sign No.3: The sign board indicating "MAN AT WORK" shall be placed at a distance of 40 m. away from the point where the transition of carriageway starts.. The sign board shall be of an equilateral triangle of size 90 cm. having white backgrounds. Retro reflective border of Red colour and non reflective symbol of black colour as per IRC 67-1977.
- D) The sign No. 4: The board displaying the message "GO SLOW-WORK IN PROGRESS" shall be placed near point of transition of carriageway. The sign board shall be of size 1.0m x 1.0m having red background and message in white colour.**
- F) Retro Reflective Strong Inviolable Stand Type Barrier painted black and having white Retro Reflective Strips for closer of traffic shall be placed to cover the entire width of carriageway including shoulder as per drawing. The Barricades shall not be removed unless permission is given by the responsible officer of the rank not less than Sectional Engineer. The Barricade shall have two plates of size 1.30 x 0.20m painted black and shall have white Retro Reflective Strips and mounted on angle iron stand of 1.0 m height.
- G) Yellow light flasher shall be kept lit from sunset to sunrise, 2 nos. along with white painted line and 2 Nos. at barriers on both sides as indicated in the drawing.
- H) Informatory sign board indicating name or work, estimated cost, completion period defect liability period. Name of contractor with telephone no. Name of Engineer with telephone no. shall provided between sign board no.4 and the barricade. The Sign board shall be having green back ground and white messages retro reflective as per IRC :67-1977.
- J) This is incidental to work (being Safety Measures) and no payment will be made on account of this

कंत्राटदारने शासकीय विमानिधीपाशी कंत्राट कामाचा विमा उतरवावा म्हणून करारनाम्यात समाविष्ट करावयाच्या अटीचे प्रारूप
